About Enique IT Solutions

Our Passion – ‘Build & Maintain Trust by Delivering Quality Task within the Agreed Commitments’.

The contemporary business process is inseparably linked to a robust solution, always-on technical and IT infrastructure. The technical infrastructure supporting such critical business processes has to meet a wide range of end-user expectations flexibly. Such an ever-changing landscape requires a strong talent backbone that brings expertise and competence to the complex tasks that are considered a given by today’s end users.

ENIQUE Solutions[®] partners with its customers to provide them with a wide array of solutions culled from the deep experience of its staff. ENIQUE Solutions[®] leverages the technical depth, expertise and competence of its talent pool to deliver smart solutions to complex problems and services to critical business processes. Quick turnaround to support its clients, who have to meet their customer demands and stakeholders’ requirements in an ever-changing environment is the cornerstone of the ENIQUE culture.

Testing Service Overview

ENIQUE engages by businesses and organizations to verify that their new or updated technical products, software, and services are performing according to their requirements and specifications. We scale up your test team fast and increase test productivity.

Our Managed Test Services are designed to suit both private and public sector clients and their specific circumstances from design to deployment, we can manage and deliver testing throughout all phases of Software development lifecycle (SDLC).

Our Specialised Test Services support smaller scale projects, such as defining your test process improvement strategy, testing the launch of your new application or website, and the integration of new services or upgrades to your estate. We have STQB qualified team will apply best practices across testing, automation and quality assurance, to help you deliver more frequent, higher quality releases to market, to meet increasing demand. We also do performance testing and managing defect reporting to a better standard and quality

Enique IT Solutions are expertise in delivering below test services:

- **Functional Testing**
- **Non-Functional testing**
- **Automation Testing**

Our Services

Discovery

Our team will work with you to Gain a better understanding of your requirements and current capabilities for delivering business critical applications.

Features:
