The International Market

IS WELL UNDERSTOOD BY CLIFF42, WE CAN IDENTIFY AREAS FOR INNOVATION SO FOCUS IS PLACED CORRECTLY

Service Offerings

Cliff42 is able to support your cloud journey from **vision and strategy** through to secure **design assurance and development**.

We have **unique domain knowledge** with leaders in policing and technology - former operational senior officers through to technology leaders that have delivered national policing technology programmes and advised Chief Officer teams. We have an **exceptional understanding of the cross-government technology landscape and challenges** and are therefore well placed to help public safety organisation adopt cloud technologies securely and in a way that sees **value for the public**.

Our proprietary method called “Griffon” is an **innovative approach to understanding the problem** and existing landscape, which can be **visually mapped** alongside the user requirements. We combine expertise in Wardley Mapping alongside situational awareness and a depth of **understanding of both the operational elements and the technology**.
