

# Pricing Document

## Pricing

Below prices are an estimation. Pricing for endpointX's cyber hygiene and preventative security service are based on:

- Size of engagement
- Number of devices in scope
- Services selected – out of:
  - Asset management & discovery (including software asset management)
  - Operating system & software patching automation
  - Configuration management & enforcement
  - Vulnerability management
  - Performance management
- Amount of engagement needed – endpointX can run these services either as a light touch – install, config, train and step away, through to a full managed service – patching and management of devices without need for customer headcount

## Guide prices

Example a – 500 devices, just asset management and patching, endpointX minimally involved

£4.23 /device per month – inclusive of all support, training and setup

Example b – 1000 devices, all above services, endpointX minimally involved

£8.67 /device per month – inclusive of all support, training and setup

Example c – 3000 devices, all above services, endpointX very involved in maintenance and running of platform & downstream services, patching, config management, vulnerability management etc

£18.28 /device per month – inclusive of all support, training, setup & management
