

Agile Spiral

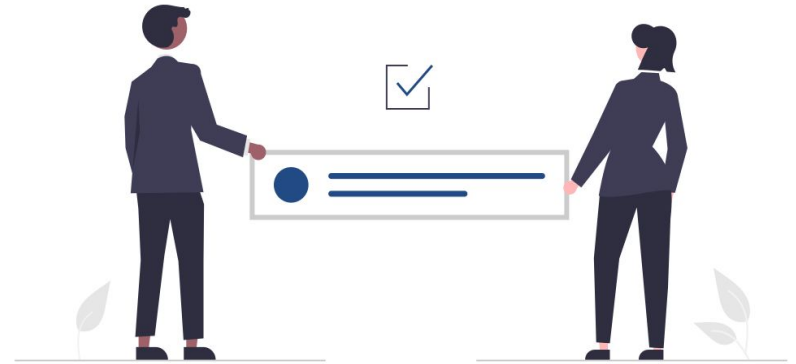

Service Definition Document

Who we are

At Agile Spiral, we're more than just a consultancy – we're your partner in the journey of digital transformation.

Passionate about empowering organizations to embrace digital change seamlessly, we provide expertise and tools for success. With a commitment to excellence, we ensure every project is executed with care, aligning with government standards and user-centric design principles.

What we do

At Agile Spiral, we pride ourselves on offering comprehensive solutions and expert guidance tailored to your unique needs. Here's an overview of the services and support we provide:

End-to-End Solutions

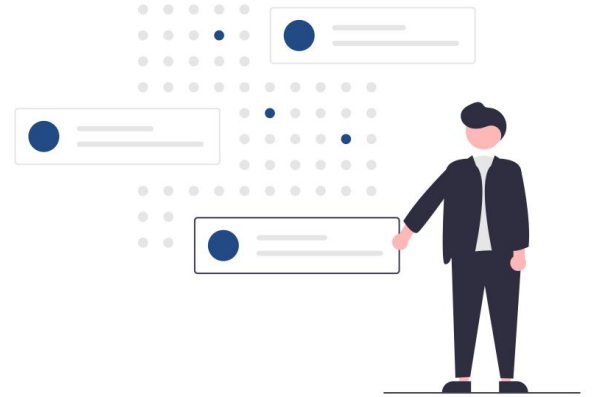

Our people excel in delivering end-to-end services, seamlessly managing projects from discovery to live deployment. Whether it's navigating through the stages of discovery, alpha, beta, or live services, we have the expertise to drive success at every step.

Flexible Support

We provide flexible support options tailored to your ongoing projects, ensuring smooth progress and optimal outcomes every step of the way.

Integration and Collaboration

We're happy to integrate seamlessly with your internal teams and other suppliers, working together to achieve common goals within your budget and timeline.

Service

Seamlessly transition your infrastructure from on-premise to the cloud, or migrate between cloud platforms such as AWS, Azure, and Google Cloud. We manage the entire migration process, from the initial assessment through to post-migration optimization. Our expert team ensures a smooth, secure, and efficient transition that minimizes downtime.

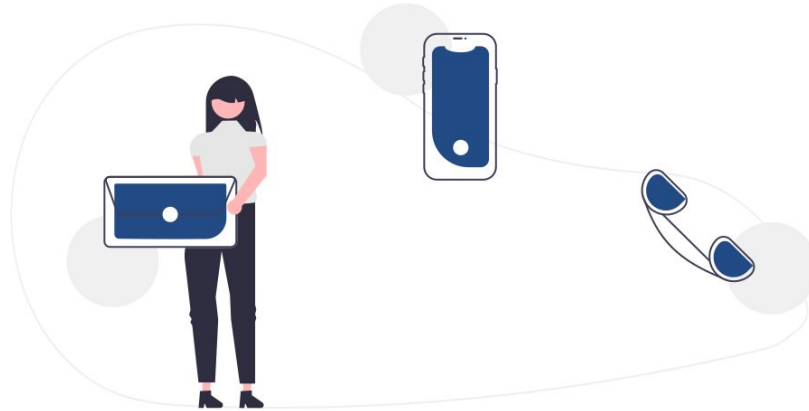

Features

- Complete on-premise to cloud migration
- Seamless transitions between cloud providers
- Integration with existing IT ecosystems
- Scalability and resource optimization
- Real-time monitoring
- Post-migration technical support
- Resource allocation optimization
- Training on new cloud environments

Benefits

- Reduces infrastructure costs
- Minimise downtime during migration
- Increases operational flexibility
- Optimises cloud resource usage
- Tailors cloud solutions to specific business needs
- Improves IT system performance and reliability
