

CYBERQ GROUP:

Cloud Security Experts at Your Service

At CyberQ Group, we're passionate about securing your cloud environment. As a leading provider of Specialist Cloud Services under the G-Cloud Framework, we offer a comprehensive suite of Information Assurance and Cyber Security solutions.

Our team boasts industry-proven consultants with the highest levels of security clearance. This ensures you receive unparalleled expertise and an in-depth understanding of cloud security best practices.

We take pride in our efficient approach. By meticulously matching your needs with the most qualified consultants, we deliver effective solutions rapidly, saving you valuable time and resources.

CyberQ Group: Cloud Security Experts at Your Service

Here's what sets CyberQ Group apart:

- Specialists in Cloud Security:

We focus exclusively on cloud security, providing targeted solutions and deep technical knowledge.

- Top-Tier Consultants:

Our team holds the highest security clearances and possesses a proven track record of success.

- G-Cloud Framework Expertise:

We leverage the G-Cloud Framework to deliver efficient and cost-effective security services.

- Streamlined Approach:

We prioritize efficient service delivery, ensuring you receive the right consultant for the job, quickly.

CyberQ Group: Securing Your Cloud Journey

At CyberQ Group, we understand the power and potential of cloud computing. We also recognize the crucial role of security in maximizing its benefits. That's why we offer a comprehensive suite of services designed to ensure your cloud environment meets the highest standards of confidentiality, integrity, and availability.

Addressing Your Cloud Security Needs:

- **HMG Compliance and International Standards:**

We align our services with HMG (UK Government) policies and international security best practices, guaranteeing your cloud infrastructure adheres to the strictest regulations.

- **Vendor-Agnostic Security Reviews:**

Regardless of your chosen cloud service model (SaaS, PaaS, or IaaS), we provide independent and thorough security assessments. Our expertise ensures the final solution you receive is appropriately secured and meets your specific needs.

- **Risk Management and Accreditation Support:**

We understand that you, as the risk owner, are ultimately responsible for accreditation and risk management. CyberQ Group empowers you with the tools and knowledge to effectively manage these aspects within your cloud environment.

Our Cloud Security Services:

Our extensive portfolio encompasses a wide range of G-Cloud services delivered by dedicated divisions:

- **Cybersecurity:**

Benefit from expert consulting on CCP compliance, security policies, security audits, and architecture design. We guide you in achieving PSN compliance and fortify your network security.

- **Penetration Testing:**

Identify and address vulnerabilities in your cloud applications and infrastructure through our rigorous penetration testing services.

- **Managed Security:**

Our managed security services include detection and response, SIEM/SOC management, and incident response planning (including emergency response and table-top assessments). Additionally, we offer purple team engagements and digital risk protection solutions.

- **Data Privacy:**

Our data privacy experts provide consulting services and conduct audits to ensure your cloud environment adheres to data privacy regulations.

CyberQ Group: Your Partner in Secure Cloud Adoption

At CyberQ Group, we understand the complexities of adopting cloud services, especially when it comes to security. Our comprehensive Cyber Security practice empowers you to confidently integrate cloud solutions into your operations while maintaining the highest levels of protection.

Tailored Security Expertise for Your Cloud Journey:

ASSURANCE FOR GOVERNMENT CLASSIFIED MATERIAL:

Is your cloud solution intended for storing, processing, or transmitting sensitive government data? We ensure it adheres to the stringent requirements of the Security Policy Framework through rigorous assessments and expert guidance.

VENDOR-SPECIFIC SECURITY CONSULTING:

Our team boasts security architects specializing in Infrastructure as a Service (IaaS), Platform as a Service (PaaS), and Software as a Service (SaaS) offerings. This ensures you receive targeted security advice tailored to your chosen cloud service model.

Tailored Security Expertise for Your Cloud Journey:

SECURE SYSTEM DESIGN AND ARCHITECTURE:

Our technical security architects collaborate with you to design cloud systems with security as a core principle. This collaborative approach guarantees compliance with your chosen security framework, paving the way for successful accreditation and certification.

FORENSIC INVESTIGATIONS AND SUPPORT:

CyberQ Group offers experienced forensic consultants to investigate security incidents within your cloud environment. We meticulously analyze potential breaches and guide you in implementing robust measures to prevent future attacks.

Achieving Government Accreditation:

CyberQ Group streamlines your path to government accreditation by providing:

- **Cyber Essentials and Code of Connection (CoCo) Reviews:** We offer comprehensive reviews and expert advice to ensure your network meets the strict requirements of the Public Service Network (PSN), Government Secure Intranet (GSI), and the Police National Network (PNN). Audits can be conducted upon request to confirm compliance.

Post-Incident Response and Support:

Has your cloud environment already experienced a security breach? We can help you assess the situation:

- **Comprehension of Compromised Information:** Our team investigates the nature of the incident and identifies any information that may have been compromised.
- **Future-Proofing Your Security Posture:** We work closely with you to implement robust security measures that prevent similar attacks from occurring in the future.

CyberQ Group: Your Managed Security Partner for a Threat-Aware Future

At CyberQ Group, we understand that cybersecurity is an ongoing battle. Our threat-driven approach to Managed Security Services empowers you to stay ahead of evolving threats and proactively manage your cyber risk posture.

Why Choose CyberQ Group for Managed Security?

- **Enhanced Security Effectiveness:** Our proven methodology prioritizes the most impactful security measures, ensuring you get the most out of your security budget.
- **Expertly Managed Security Operations:** We leverage a comprehensive suite of modern security operations services, meticulously tailored to your specific needs.

The CyberQ Group Advantage:

- **Unmatched Accreditation and Expertise:** We are one of the UK's most accredited independent cybersecurity organizations, holding certifications in ISO 27001 (Security Management), ISO 27701 (Privacy Information Management), ISO 9001 (Quality Management), CREST (Government Recognized Cyber Security Scheme), and SOC 2 Type 1 (Security, Availability, Processing Integrity, Confidentiality).
- **Protecting Critical Infrastructure:** Our Security Operations team has extensive experience safeguarding the UK's critical infrastructure. This translates to real-world expertise in daily threat response and incident management.

CyberQ Group: Uncovering Vulnerabilities with Expert Penetration Testing

At CyberQ Group, we believe a strong defense starts with a clear understanding of your vulnerabilities. Our industry-leading Penetration Testing services, delivered in accordance with CESA, CREST, and PCI requirements, provide a comprehensive assessment of your security posture.

Why Choose CyberQ Group for Penetration Testing Services?

Unveiling Potential Threats:

Our penetration testing process goes beyond the surface, employing a blend of automated and manual techniques. This ensures we uncover both known and unknown vulnerabilities in your hardware, software, and applications.

Delivering Actionable Insights:

Upon completion, you'll receive a detailed report outlining all identified vulnerabilities. This report includes prioritized recommendations for mitigation strategies and necessary fixes. We don't stop there – we offer retesting to verify the effectiveness of implemented controls, ensuring your security posture remains fortified.

Comprehensive Penetration Testing Services:

Our team of skilled penetration testers offers a diverse range of services to address your specific needs, including:

- **IT Health Checks:** Gain a thorough understanding of your overall security posture.
- **Infrastructure Security Testing:** Identify and address vulnerabilities within your IT infrastructure.
- **Application Security Testing:** Safeguard your web and mobile applications from exploitation.
- **Mobile Application Security Testing:** Ensure your mobile applications are secure against emerging threats.
- **Application Source Code Reviews:** Uncover potential vulnerabilities within your codebase.
- **Wireless Testing:** Secure your wireless networks and prevent unauthorized access.
- **Social Engineering:** Evaluate your organization's susceptibility to social engineering attacks.

CyberQ Group: Navigating the Evolving Data Privacy Landscape

At CyberQ Group, we understand the complexities of data privacy regulations like GDPR and the UK Data Protection Act. Our team of dedicated, certified, and highly experienced Data Privacy consultants empowers you to confidently navigate this ever-changing landscape.

Navigating the Evolving Data Privacy Landscape

Your Trusted Partner for Data Privacy Compliance:

- **Holistic Approach:** We go beyond basic legal advice. Our consultants combine legal expertise with compliance, risk management, and information security best practices to create a comprehensive data privacy strategy.
- **Achieving and Maintaining Compliance:** We provide tailored guidance and support to help you achieve and maintain compliance with GDPR and the Data Protection Act.
- **Protecting Personal Information:** Our focus is on safeguarding personal data, including names, addresses, financial information, and personal opinions.

Addressing Your Data Privacy Challenges:

- **Compliance Assessments:** We conduct thorough assessments to identify potential data privacy gaps within your organization.
- **Data Mapping and Risk Management:** Our team assists you in mapping your data flows and implementing robust risk management strategies.
- **Developing Data Privacy Policies and Procedures:** We collaborate with you to develop watertight data privacy policies and procedures that meet regulatory requirements.

Our Accreditations:

Don't just take our word for it, we're proud of our team and the industry accreditations we have gained together.

CyberQ Group: Your Simple Path to Strong Cybersecurity

Cybersecurity shouldn't be complex.

At CyberQ Group, we make it easy for businesses to secure their data and reputation. We're not just experts, we're your partners, working with you to understand your needs and build a customised defence.

A Word from Our Founder, Chris Woods:

"At CyberQ Group, we're passionate about helping businesses of all sizes navigate the ever-evolving cyber threat landscape. We believe in the power of partnership, working alongside you to develop a customised security strategy that aligns with your specific needs and goals. We're not just here to sell you products – we're here to be your trusted advisor, guiding you on your cybersecurity journey every step of the way."

The CyberQ Group logo is displayed within a large, light blue circle. The logo itself consists of the words "CYBERQ" and "GROUP" in a bold, dark blue, sans-serif font. The "Q" in "CYBERQ" is stylized with a small cluster of dark blue squares to its upper right, suggesting a digital or networked theme.

Here's what sets us apart:

- **We focus on you, not technology.**
We recommend the best solutions, not just what sells.
- **We become an extension of your team.**
We collaborate to understand your unique challenges.
- **We're passionate about your success.**
Our team of experts is dedicated to keeping you safe.

Our Services:

- **24/7 Threat Detection:** Our advanced monitoring centre identifies and stops attacks before they happen.
- **Deep Web Investigations:** We uncover hidden threats lurking online to protect your data and reputation.
- **Employee Risk Assessments:** We identify potential vulnerabilities to keep your organisation secure from within.

Benefits of Partnering with CyberQ Group:

- **Reduced Risk:** Sleep soundly knowing your business is protected.
- **Simplified Security:** Focus on your business, we'll handle the cyber headaches.
- **Long-Term Peace of Mind:** Enjoy a secure future with a trusted partner by your side.
