# About OnePlanet

OnePlanet was founded in 2019 to provide software solutions that enable any local government, organisation or business to deliver joined-up outcomes around health, climate nature recovery and more.

The OnePlanet platform maps & aligns strategies around co-benefits. It takes a collaborative, systems-approach to solve issues & deliver effective action more efficiently.

# Context

UK Local Governments have many issues they need to respond to such as the climate emergency, nature recovery and health. Resolving these needs a whole government response. Yet these are only a few amongst many challenges that organisations in the Public Sector face as they try to tackle issues ranging from; affordable housing, car parking, air quality, local employment to fuel poverty.

The only response to this complexity is focus on the overarching Outcomes that Public Sectors are aiming to achieve – focusing on the co-benefits of environmental or social action to align objectives rather than see them as competing priorities. This requires collaboration across departments and recognising the benefits of wider community engagement.

# Our solution

Achieving Net Zero, nature recovery and better health outcomes requires a coordinated and whole organisation response.

OnePlanet offers support to align key action plans and strategies to deliver joined-up outcomes.

We deliver this by supporting users to achieve this through training, guidance and the use of specific tools and facilitation.

**Align the Climate, health and nature strategies with existing plans - maximising collaboration and impact**

**Work with our experts to build the business case, refine your strategy and start to implement your plans.**

# Basic training and resources

We offer 1-hour training sessions to provide clients with all the knowledge they need to get set up on the OnePlanet platform. The training will allow users to create, update and manage their Action Plans on the OnePlanet platform. These sessions can range from one-to-one training to large group sessions of 20 people.

Clients will then be supplied with all the resources they need to support their learning and use of the OnePlanet platform.

# Consultancy and technical support

We offer consultancy services and technical support to help clients create a roadmap for implementing the OnePlanet platform throughout their organisations and to external stakeholders.

This enables our customers to get the most use out of the platform, receiving expert advice from our team about how to use the platform to integrate their plans and strategies with their health, nature recovery and climate goals.

# Strategy upload and alignment

Support in uploading action plans and strategies onto the OnePlanet platform and aligning them with the OnePlanet logical framework of Outcomes: what you want to achieve; Actions: how you will achieve these outcomes; Indicators: how you are measuring progress.

From this, OnePlanet will support customers with the review of key goals and metrics and setting as Shared Outcomes and Shared Indicators in the platform and cross-referencing of these into the action plans.

# Workshops

OnePlanet staff can support the planning and delivery of Workshops with customers. Workshops can range in content depending on the customer's goals, examples include using OnePlanet:

- Learn collaboratively, either internally or with external stakeholders, about key interventions and best practice for customers to achieve their goals
- Analyse existing activity and using this to inform and create new strategies
- Collaboratively design templates which will streamline processes to deliver the customer's goals

# Software integration & custom functionality

Integrations with software the customer is already using to embed OnePlanet into existing, familiar processes and to avoid duplication.

Exploring technology functionality that needs to be created on the OnePlanet platform to support the customer further to deliver their goals.

# Templates

Templates can be made on the OnePlanet platform to help customers:

- Create Action Plans that are guided by best practice and sustainability frameworks
- Support in setting up reporting templates to allow automatic reporting
- Embed carbon mitigation, climate adaptation and equity into major decisions

# Levels of Lot 3 Support

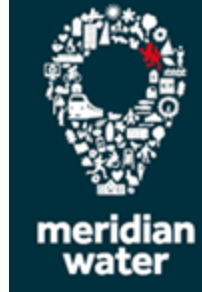

<b>Staff support</b>	<b>Hours of support</b>	<b>Cost of support</b>
Level 1	8	£800
Level 2	14	£1400
Level 3	32	£3200
Level 4	50	£5000

# OnePlanet benefits

OnePlanet's platform and service has been shown to:

- Reduce reporting times and burden
- Build capacity of Public Sector staff in delivering joined-up action
- Leverage co-benefits of health and nature recovery to build the business case for climate action
- Enhancing collaboration by aligning strategies through shared vision
- Increase engagement with key stakeholders

OnePlanet.

# Case study: Meridian Water

Meridian Water is a major £6bn, 25-year London regeneration programme led by Enfield Council, bringing 10,000 homes and 6,000 jobs to Enfield, north London

## Better outcome

- Managing compliance of 40 projects connected to single ecosystem plan, with over 50 indicators and more than 100 requirements
- Simplifying the process to enable the Value Chain to focus on creative solutions rather than process and reporting
- Automatically enable reporting on different levels; board through to local newsletter
- Connecting design through to operational phase

## Relationship building

- Engaging interface enables participation of all stakeholders – design and construction teams and building occupiers
- Municipality using OnePlanet technology more widely

*'Net Zero/sustainability is complex and involves lots of stakeholders. OnePlanet has allowed us to collaborate with wider project teams unlocking their experience and creativity as opposed to us having to drive the agenda on our own. By allowing performance to be viewed through different 'lenses' the requirements are understandable to all audiences, who understand how they are contributing to our ambitious targets.*

*Rafe Bertram, Meridian Water - Sustainability Facilitator*

# Case study: London Borough of Enfield

In July 2019 the Council declared a climate emergency and in August 2020 adopted its ambitious Climate Action Plan. The Council commissioned OnePlanet to support a root and branch review of the Climate Action Plan, to identify innovative approaches to mapping and monitoring climate action across the organisation and borough.

OnePlanet digital platform is being used to map key Council, London-wide and national plans, strategies and policies. This allows:

- Alignment of all Council strategies to enable simultaneous delivery of all key goals
- Tracking of all key strategies
- Reporting on the climate strategies in multiple formats, such as; Carbon Disclosure Project, Council Plan, UK Net Zero strategy.
- Communication to and engagement with local stakeholders about the climate strategy.

# Case study: APIO Housing Solution

APIO Housing have a modular housing solution aimed at the Housing Association market. They have used OnePlanet to embed sustainability into their company operations and ensure their key suppliers are fully aligned to their vision.

## Positioning:

- OnePlanet used to map ESG landscape and create ESG
- Client trained intuitively in sustainability to meet 'Purpose' enhancing brand
- Platform used to cascade sustainability throughout their organisation and beyond through their stakeholders

## Better outcome

- Unlocked implicit knowledge of Value Chain to collaborate to embed sustainability in the design, construction and operations of their developments
- Massive saving on time to organise data for both individual project compliance and company reporting

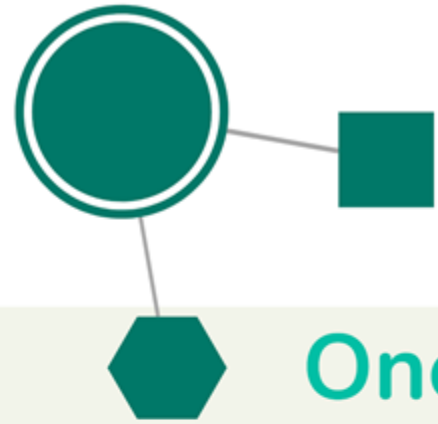

## Relationship building

- Sense of co-creation and engagement - 'hearts and minds'
- Supply chain embracing sustainability purpose and use of OnePlanet technology

*'OnePlanet has allowed us to ensure all our projects are automatically aligned with our company purpose and maximise the engagement with key suppliers. This delivers us a more integrated strategy for less time and effort.'*

*Hercu Viljoen, CEO, Apio*
