Crowdfunder Connect Pricing for G-Cloud 14

Our programmes

Crowdfunder Connect offers two core service levels covered by our 'Hosted' and 'Enterprise', licence fees. Both come with a fund distribution service included so this is all you need to get started.

Hosted programmes run on the core Crowdfunder.co.uk website and provide you with all the tools and technology to effectively run a fund distribution programme, which enables validation from the community as well as amplification of funding - meaning your funds have a bigger impact.

Enterprise programmes are built on a microsite which can built in a specific brand and style - this creates an ecosystem around the topic you want to fund with the opportunity to customise content to increase the relevance to your audience.

Both programmes come with reporting, education and customer support to ensure we are providing an effective service to your community.

Additional products:

You can customise your programme with additional products - such as multiple funding methods, maybe you want to add employee giving to your live match funding programme. Or engage people in fundraising and/or volunteering for the organisations you are supporting with funds. With multiple funding methods available, customise your programme to maximise the benefits to your community.

The Crowdfunder Connect team can also provide expert training to staff and/or organisations through tailored webinars, increasing their knowledge and skills in digital fundraising.

Our team can administer your programme, through application management and moderation, taking away some of the heavy lifting through our technology and team.

Term:

All of our programmes have a minimum 12 month term or minimum commitment.

Prices exclude VAT.
