Cloud Consulting – Service Definition

Somniac provides advanced Cloud consulting across AWS, Azure and Google Cloud (GCP).

Our experienced team of cloud architects and engineers will assess, optimise and migrate your applications to your choice of cloud provider. We have in-depth experience across the full range of cloud consulting activities.

We have experience spanning government, financial services and other industry verticals. Our team is accustomed to working within highly regulated organisations sometimes involving highly sensitive projects and data sets.

Our independence and UK centric knowledge allows us to provide unbiased guidance and consulting that is highly relevant to UK government organisations.
