ITAM Optimisation Services

Disclaimer

1. Pricing

ITAM Worx's ITAM Optimisation services are:

Service Name	Service Description
SaaS Application Review	Our expert team of consultants will review of an organisations SaaS spend which gives visibility by showing customers what they are spending and where and providing a baseline and cost optimisation opportunities to reduce spend.
Commercial Optimisation Service	Our expert commercial consultants will review your top 10 vendor agreements to provide a benchmark review allowing organisations to confidently develop a long-term category plan whilst embedding in the short/mid/long term strategy to optimise (or demise) existing supply chains.
Cloud Process Framework Service	Our Cloud Financial Consultancy service is designed to help organisations manage cloud spend by creating and designing a framework set of policies and processes to stay in control of spend.
SaaS Spend Management	Our SaaS Spend Managed Service is a set of annually scheduled activities to ensure organisations are continually managing spend and optimisation to ensure costs are controlled, our experts will take the pain away from customers and present regular reporting to save the customer time and resources.
Contract Renewal Management	Our Contract Renewal Managed Service is proactively managing your software renewals and providing you with a contract schedule of upcoming renewals so you have central visibility to enable opportunities to rationalise, standardise and rightsize to achieve potential cost saving and cost avoidance.
Vendor Compliance Review	Our expert team of licensing consultants will assess your current inventory against current entitlement to produce an effective licensing position (ELP) for your organisation. In addition, we will highlight potential risks and then provide you with recommendations to manage and mitigate this risk.
Accelerator Packages	Our experts are on hand to help as and when the customers business drivers arise. We provide 'accelerator packs' which means the customer can call off from a package to be used for one off activities such as; Azure spend analysis, vendor audit support, vendor compliance assessments, contract renewal support etc.
Azure Spend Analytics	We can do a spend review on your customers Azure usage to provide a clear and easy readable view of where the spend is happening to enable customers to make informed decisions and optimise spend on their Azure environments.

All services are based on the number of devices, users or vendors in the organisation and the customer has or is purchasing the applicable ITAM Technology to be able to deliver these services successfully. All services are on a fixed price basis.

Below example pricing is indicative only and subject to full scoping.
