

UNITY Data Transformation and Migration Service Definition

What is the Service?

Data Transformation

Our data transformation combines our 25 years of experience and knowledge within the IT and Technology market to provide a turnkey approach to digital transformation and data migration projects.

Our digital consulting and delivery teams create value by assessing, developing, and implementing digital transformation projects. Our team work to create value through enabling better decision making, improving the application of data and technology to increase business performance.

Our team work to define a digital strategy that delivers the customers vision through innovative digital solutions from across the Unity World group. We strive to transform business with insights from data, improved decision making and enables them to use a rapidly changing technology and data landscapes.

Our teams comprise of multi skilled engineers and consultants that deliver ongoing digital transformation that futureproof and allow for ongoing improvements to the environment. Through a structured and agile approach to project management, we implement a continuous improvement approach to the delivery of digital transformation and data migration projects.

Data Migration

We implement a full service offering that supports our customers through the project lifecycle of data migration projects. We build our packages in a flexible manner that allows us to integrate into multiple different areas within the project and to implement full turnkey data migration projects.

The service starts with data migration strategy which is provided by data migration and cloud specialists which understand the pros and cons of multiple different cloud environments, including private, public and hybrid cloud environments. We then support on the delivery and providing of resources to ensure that the data migration project is a success, whether this is additional resources to work alongside existing teams to manage the extra resources required. We also deliver end to end implementation services that outsource your data migration and project management to Unity.
