Peruzzi Solutions

Transforming Businesses with AI for a Smarter Future

G-Cloud 14 – Service Definition Document

## 2018

Our company was founded in Hungary

First projects with Azure Cognitive services.

2020

We are Microsoft partners since 2020

We have our first Fortune 500 company as our client. Using Data Lake and other data storage and analytics services to consolidate their data.
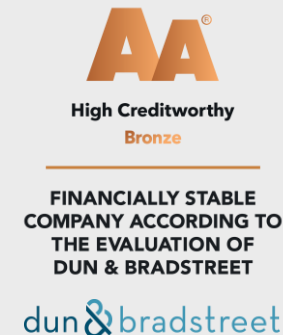

2022

ISO Certified

We have one of the biggest real estate investors amongst our clients. Handling data in a more efficient level.

2024

Double A rating from D&B, proving our financial stability.

We are delivering designs incorporating LLMs such as Open AI's Chat GPT.

2030

Our vision is to become the leading Microsoft partner for AI in Europe

Helping you getting from data to intelligence

Problem   Solution

Consulting services

Understanding business objectives and current AI adoption maturity.

AI & Data Engineering in the Cloud

Building scalable data processing, analytics and reporting solutions on the Azure data stack and harnessing the features of Power BI and AI platforms.

AI output

We leverage Microsoft Azure AI and cognitive services to build intelligent applications and solutions.
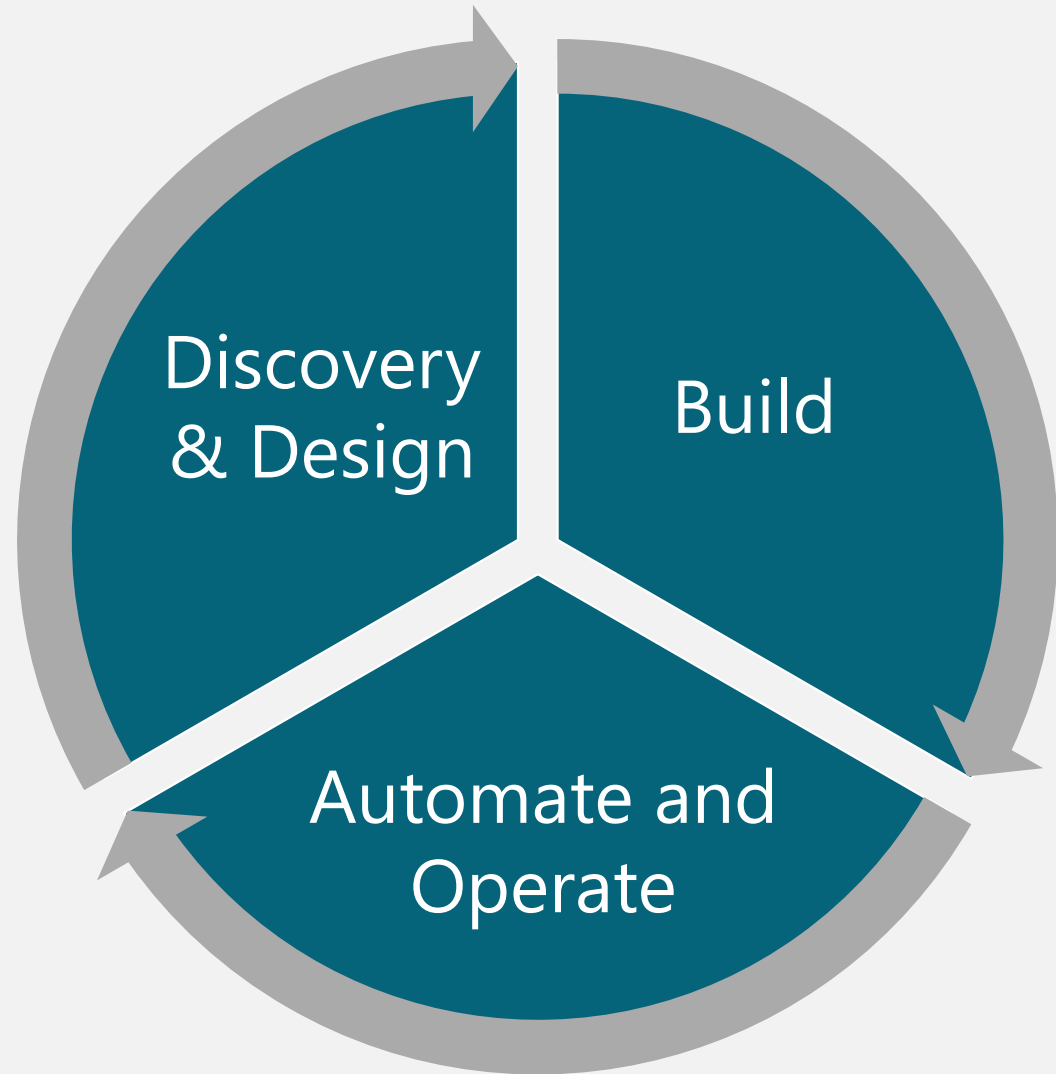

To give our customers a competitive advantage.

Managed Services

Monitor cloud applications, remediate issues. Proactive maintenance. Updating code base to follow latest trends and technology.
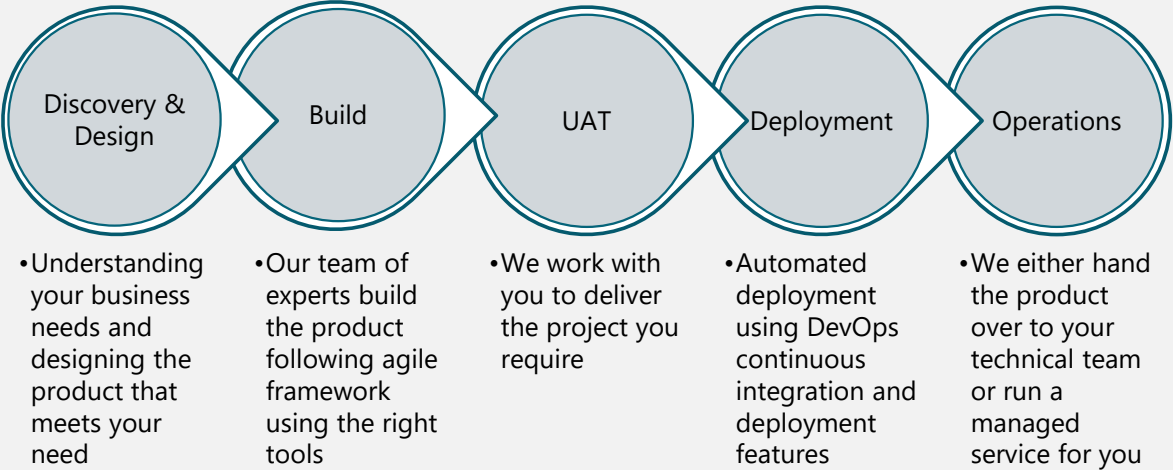

Approach

- At Peruzzi Services, we believe in partnership. We understand that every client is unique, and their needs vary. That's why our dedicated team is committed to working closely with you, utilizing your preferred project methodology to achieve your goals effectively.

- Whether you have a specific project methodology in mind or you're open to suggestions, we've got you covered. Our flexible approach ensures that we adapt to your preferences seamlessly. If no particular methodology is preferred, we default to Agile – a proven framework that emphasizes collaboration, adaptability, and delivering value incrementally.
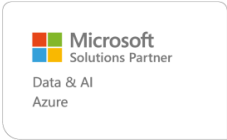

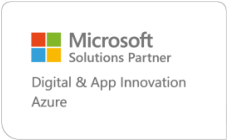

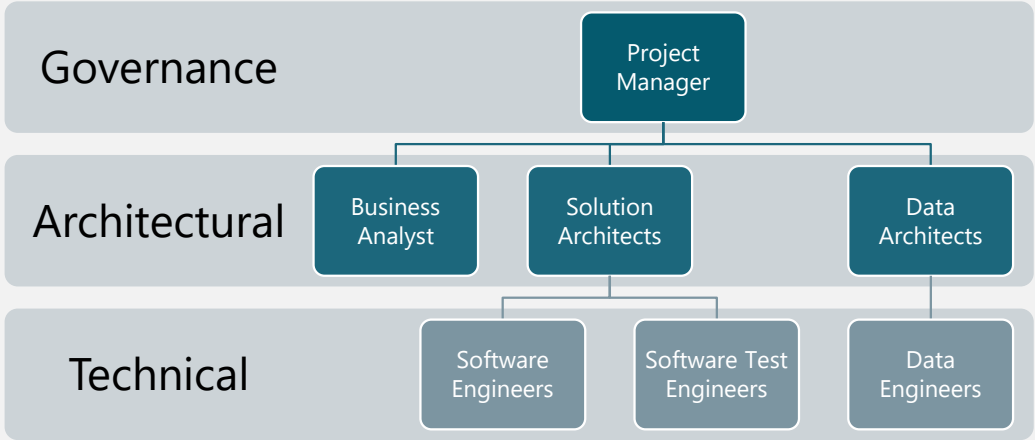

Unlocking Success Together

Project Delivery

- We've partnered with numerous businesses to develop practical data and AI strategies that directly support their business objectives, leading to enhanced growth, boosted revenues, and decreased operational and compliance risks.

- Collaboratively, we embark on a comprehensive transformation journey, identifying areas for improvement and crafting customized solutions to pave the way for leveraging data and AI as a competitive edge for your business.

Discovery & Design → Build → UAT → Deployment → Operations

- **Discovery & Design:** Understanding your business needs and designing the product that meets your need

- **Build:** Our team of experts build the product following agile framework using the right tools

- **UAT:** We work with you to deliver the project you require

- **Deployment:** Automated deployment using DevOps continuous integration and deployment features

- **Operations:** We either hand the product over to your technical team or run a managed service for you

A typical team deployment could look like.

Governance	Project Manager
Architectural	Business Analyst · Solution Architects · Data Architects
Technical	Software Engineers · Software Test Engineers · Data Engineers

Our Skills

Hybrid Delivery

- In our hybrid delivery model, our engineers work as part of your team.

- We work remotely from our headquarters or onsite when requested.

- All our team members work the same work hours as your team members do.

- You can choose between covering just a few specific roles or provisioning an entire team to deliver subprojects / subsystems for you.

  - Collibra: Foundation of Data Governance
  - Collibra: Data Governance Lead
  - … and many more

Managed Service

- Our Managed Services go beyond traditional IT support. We take a proactive approach to managing your IT environment, leveraging the latest technologies and best practices to ensure maximum uptime, reliability, and security.

- With our team of Microsoft Certified Engineers at your side, you can rest assured that your IT infrastructure is in good hands. From day-to-day maintenance and troubleshooting to strategic planning and optimization, we handle it all, allowing you to focus on what matters most – running your business.

- One of the key benefits of our Managed Services is scalability. Whether you're a small startup or a large enterprise, our solutions are flexible and adaptable, allowing you to scale up or down as your business needs evolve. With our pay-as-you-go pricing model, you only pay for the services you need, helping you save costs and maximize efficiency.
