

Unlocking Organisational Success Through and for People

## Lot 3 Delivery Management

# Delivery Management

## WHY AVANTIS

We specialise in helping organisations in the secure and public sector environments solve complex business and digital problems. Experts in critical decision making we deliver robust business and digital solutions.

Through our business advisory and consultancy services we develop innovative digital solutions, de-risk your delivery, develop talented workforces, transform business capabilities and support your business. Our expert consultants don't simply deliver transformational success, they future-proof your projects. In everything from Business Analysis & Requirements, Decision Support, Procurement, P3M and project controls to learning and development, we give your teams the skills they need..

## SERVICE DESCRIPTION

Avantis provides expert delivery management for IT projects in the public sector, specialising in service delivery, strategic planning, stakeholder engagement, and risk management. We ensure services are delivered in an efficient, compliant, and effective manner, aligning technology solutions with governmental needs for improved service delivery and user satisfaction.

## DELIVERY APPROACH

Avantis' delivery management teams have developed best practice over years of working with public sector departments to deliver some of the most complicated services in the most restrictive environments the public sector has to offer.

The delivery management function is honed to identifying what your organisation really needs from its services and developing streamlined delivery plans to achieve those needs. Working closely with service owners and P3M functions, the team utilise a wide range of tools and best practice to ensure comprehensive development of all management artefacts to ensure the successful implementation and transition of your services.

## SERVICE FEATURES AND BENEFITS

- Increased efficiency through optimised processes, technology implementations, and data exploitation.
- Enhanced effectiveness of implemented systems, realising maximum value-for-money.
- Improved stakeholder satisfaction and user adoption.
- Reduced costs through optimised delivery methods and processes.
- Strategic planning to align digital service delivery with organisational strategies.
- Proactive risk management ensuring service deliveries remain within tolerance.

## ASSUMPTIONS & DEPENDENCIES

Detailed assumptions and dependencies will be assessed on an individual contract basis and form part of our proposal to a Statement of Requirement.

Cyber Security and Cyber Resilience	Service Management
Data Analysis and Management	Target Operating Model Definition & Organisational Design
Delivery Management	Training Needs Analysis & Development Mapping

## ORDERING AND INVOICING

Avantis will require a signed Purchase Order before work commences.

We typically define a mutually agreed Milestone Payment Plan (MPP) as part of the onboarding process, based on deliverables.

Invoices are raised monthly in arrears in accordance with the MPP and are payable within 30 days of receipt.

Avantis is able to use the MOD's CP&F electronic purchasing system.

## SERVICE LEVELS AND SUPPORT HOURS

We provide a nominated Delivery Manager to be the single point of contact for the contract.

Avantis will use Key Performance Indicators (KPIs) to monitor the quality of work. These will be agreed for each assignment, and include performance metrics relating to Quality, performance, responsiveness and management.

Our staff will be available to support you on-site or remotely, as required for the duration of the contract during the normal business day. Nominally this is an eight-hour day between 8am and 6pm, Monday to Friday, excluding Public Holidays. Support outside these hours can be arranged by negotiation.

## AFTER-SALES SUPPORT

We will conduct a Post Project Review to assess how well the delivered outcomes have provided the expected. We openly discuss any concerns or follow up actions and answer queries.

## ONBOARDING AND OFFBOARDING

We tailor our onboarding to each customer requirement, which starts at the tendering stage to determine IT, security clearance, sites access, Handover/Takeover and project delivery requirement. We use this to inform our onboarding plan, which is reviewed and agreed with each customer on commencement. We will actively manage onboarding of each resource to ensure they are able to deliver value as quick as possible.

Prior to the end of our engagement we will plan our exit, preparing to ensure that our customers are able to maintain service delivery after we exit. We work with all stakeholders to enable a smooth transition, providing handover documentation and artefacts to preserve critical knowledge and information. Our offboarding process will ensure our customers are satisfied with Avantis' performance and delivery.

We will undertake a close-down meeting to ensure all contractual obligations have been met, deliverables are signed off and service delivery is maintained, including ensuring that knowledge transfer has been undertaken and relevant staff have been upskilled.

## IMPLEMENTATION AND PLANNING

Avantis' implementation planning starts at the bidding phase and more detailed on notification of contract award.

We undertake an assessment of your requirements, determine the scope of work, together with the risks, assumptions and dependencies to create a realistic draft implementation schedule. We will develop work packages, underpinned by a detailed Work Breakdown Structure, which will enable monitoring and management of the tasks. We will continually mature our plan to include:

- Resources required to deliver the outcomes of each work package
- Detailed mapping of each deliverable and milestone
- Reporting and meeting drumbeat
- Payment and quality milestones
- Any other plans, such as security and quality.

Our proven approach will enable our delivery to the expected quality within timescales required.

Avantis will assess and manage risks, issues and dependencies. We will share our assumptions and work with you to ensure our delivery and enable you to realise maximum benefit.
