

G-Cloud 14

**Service Definition - Wipro Decarbonisation, Sustainability
Strategy & Culture, Impact Assessment, Impact and ESG Data
Reporting & Analytics**

Wipro Decarbonisation, Sustainability Strategy & Culture, Impact Assessment, Impact and ESG Data Reporting & Analytics

Features

- Evaluate Impact progress with industry standards and targeted improvement levers
- Develop CTAP to accelerate climate strategy with SBTi Progress Tracking
- Establish Impact Management Office for Net Zero Goals and Governance
- Drive sustainability goals with Nextgen Technology
- Minimize resources for full data ecosystem from ingestion to assurance
- Create Impact Data Ecosystem for Goals, Risks, Compliance, and Reporting
- Enhance decision-making with fast feedback from data and framework synthesis
- Continuous tracking of sustainability metrics and outcomes
- Tailor ESG data reporting to meet stakeholder requirements and standards

Benefits

- Provides scalable, auditable, flexible, automated cloud agnostic sustainability data ecosystem
- Improves decision-making with data-driven insights on sustainability impacts
- Mitigates risk associated with climate change and regulatory compliance
- Increases alignment with industry best practices and disclosure Frameworks
- Augments tracking towards short, medium, and long-term sustainability goals
- Increases stakeholder trust through transparent and accountable sustainability reporting
- Facilitates informed decision-making and strategic ESG performance improvements

Assessment & Roadmap

Assess, plan and manage your impact.

Business leaders need to **operationalize** their Impact strategy. This includes assessing **progress against goals**, understanding sustainability **risks and opportunities**, identifying and adjusting improvement initiatives, ensuring sustainability **governance**, and roadmaps aligned to Climate Transition Action Plans (and SBTi).

Services

Solutions

Impact Health Check Assessment

Wipro's brings clarity of Impact progress-to-plan across the extended value chain, based on industry standard frameworks and measures, options to dive into focus areas, with guided levers to close gaps and drive improvement efforts.

- Comprehensive or Focused Health Check
- Based on integrated global regulatory standards and disclosure frameworks
- Incorporating your Sustainability goals and progress
- Considering benchmark and ratings

Climate Transition Action Planning

As a founding member of the 'Transform to Net Zero' alliance, Wipro has developed a suite of approaches to Climate Transition Action Planning (CTAP) to help organizations operationalize and accelerate their climate strategy and plans.

- Developing or updating the CTAP
- Establishing SBTi and tracking progress
- Driving CTAP roadmap improvement activities

Impact Management Office

Wipro can help your organization establish an Impact Management Office, a leading approach to drive the transformation roadmap and achieve sustainability and Net Zero goals.

- Stakeholder Governance
- Goals, targets and KPI tracking
- Improvement activity portfolio management
- Sustainability training and development

Impact Innovation Lab

In partnership with Wipro's Lab45 and Wipro Ventures, we can help your organization drive innovation, standardization, and adoption of Nextgen technology and solutions to help achieve sustainability goals through hackathons, connections to the startup ecosystem, and other innovative approaches.

- Co-branded Innovation
- Nextgen and innovative capability building

- Wipro & Partner Solutions:
- Impact Health Check Assessment solution
 - Pre-built Impact Data Ecosystem
 - Data Governance Framework
 - Sustainability Stack (Microsoft, Enablon, SAP, etc.)

- Wipro & Partner Solutions:
- Transform to Net Zero Climate Transition Action Planning solution
 - Transform to Net Zero Supplier Transformation Framework
 - Impact Intelligence Dashboards

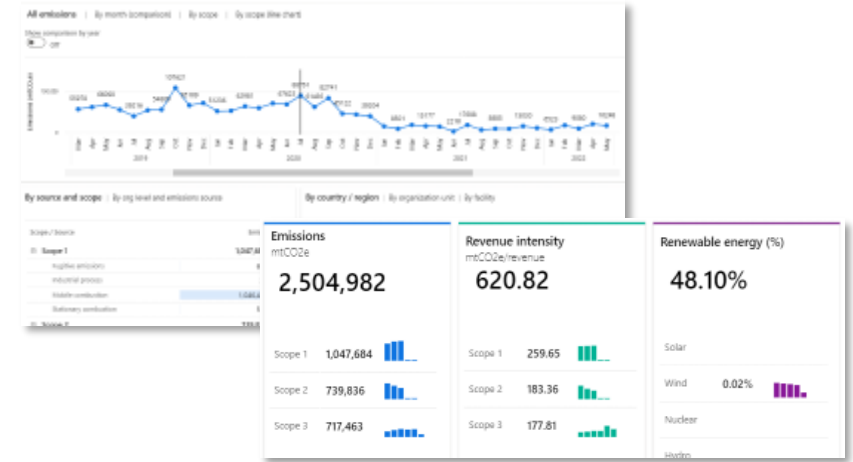

- Wipro & Partner Solutions:
- Leading governance and program management frameworks
 - Impact Intelligence Dashboards
 - Customized sustainability training and development approaches

- Wipro & Partner Solutions:
- Lab45 innovation approaches
 - Wipro Ventures connections to the innovation ecosystem
 - Next Gen Technology (AI, etc.)
 - Green Coding/Hackathon solutions

Impact Intelligence

Creating a reliable and responsible sustainability data ecosystem.

Wipro's **Impact Intelligence** enables an end-to-end data and analysis ecosystem to track and evaluate progress toward sustainability goals. NextGen technologies enable decision-making in an increasingly complex system of data, frameworks, metrics, and stakeholders.

Impact Data Services

Reduce resource requirements to manage the end-to-end data integrations ecosystem (i.e., data ingestion, integration, and quality assurance).

- Sustainability Frameworks Data-as-a-Service
- Ratings Data-as-a-Service
- Sustainability Data Integration and Services

Wipro Solutions:

- Integrated Impact Frameworks DaaS
- Impact Ratings DaaS

Impact Intelligence Ecosystem

Establish integrated Impact data management and performance ecosystem to track towards sustainability goals, analyze risks, and generate compliance and disclosure reporting.

- Impact Intelligence Solution
- Impact Data Quality & Management
- Compliance and Disclosure Reports
- Impact Portfolio Management

Wipro & Partner Solutions:

- Pre-built Impact Data Ecosystem
- Data Governance Framework
- Sustainability Stack (Microsoft, Enablon, SAP, etc)
- Sustainability Data governance (Microsoft, etc.)
- Impact Intelligence Dashboards

Analytics and Decision Making

Provide faster feedback loops and clarity for business decisions by synthesizing an increasing volume of data and industry frameworks.

- Forecasting
- Life Cycle Analysis (LCA) Modeling
- NextGen Decision-Making

Wipro Solutions:

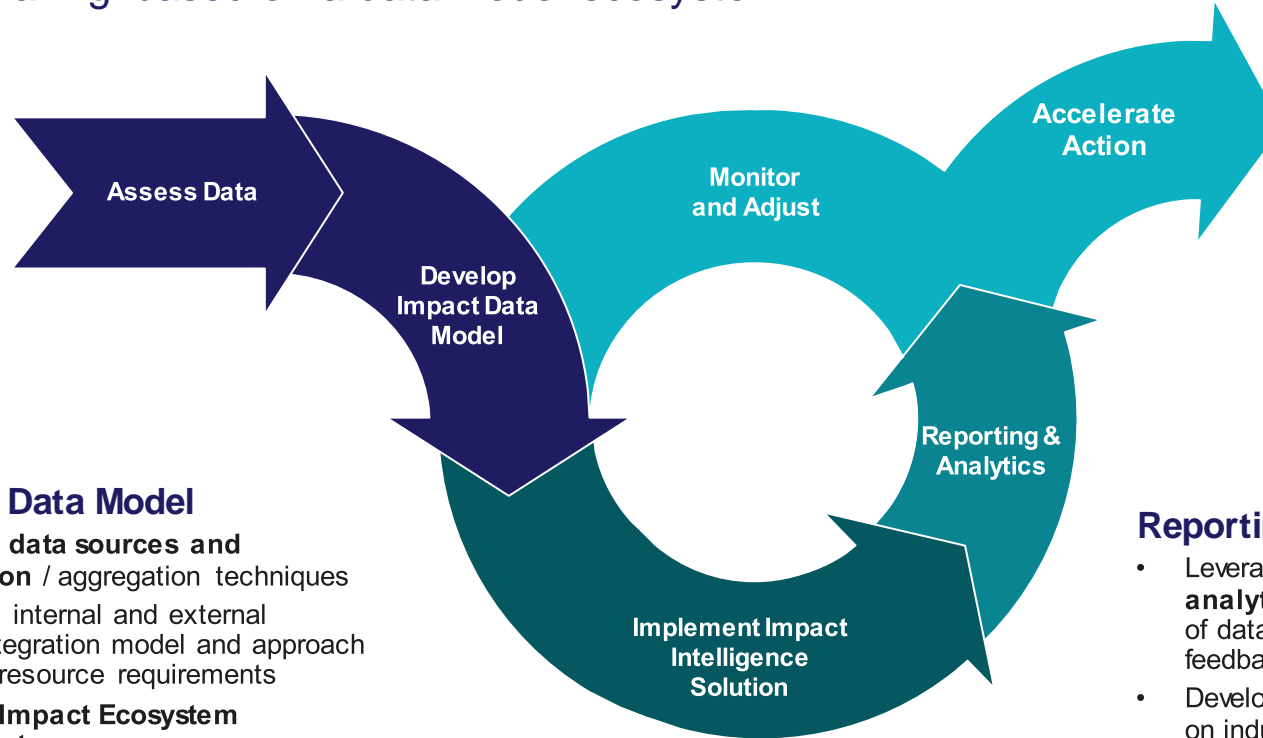

- Scenario Modelling
- Smart i-connect IoT
- Data Center Carbon Footprint Calculator
- Travel Emissions Calculator
- NextGen smart analytics starter

Wipro Impact Intelligence Approach

Enables impact decision-making based on a data model ecosystem

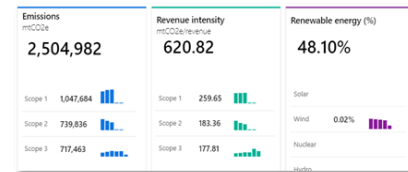

Assess Data

- Leverage Wipro's **Impact Framework** to identify reporting requirements / gaps; accelerates required taxonomy, metrics, and calculations
- Conduct sustainability data current state assessment and identify gaps

Action

- Leverage Impact Intelligence to identify **improvement initiatives and reduction strategies**
- Share success and best practices from across the organization

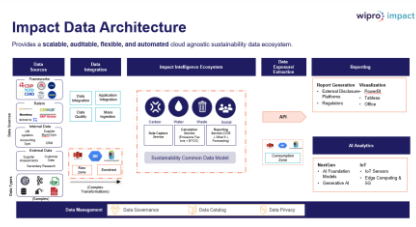

Reporting & Analytics

- Leverage **AI and NextGen analytics** to synthesize growing numbers of data and drive faster insights and feedback loops
- Develop reporting and dashboard based on industry frameworks

Develop Data Model

- Identify **data sources and ingestion** / aggregation techniques
- Provide internal and external data integration model and approach to limit resource requirements
- Define **Impact Ecosystem architecture**

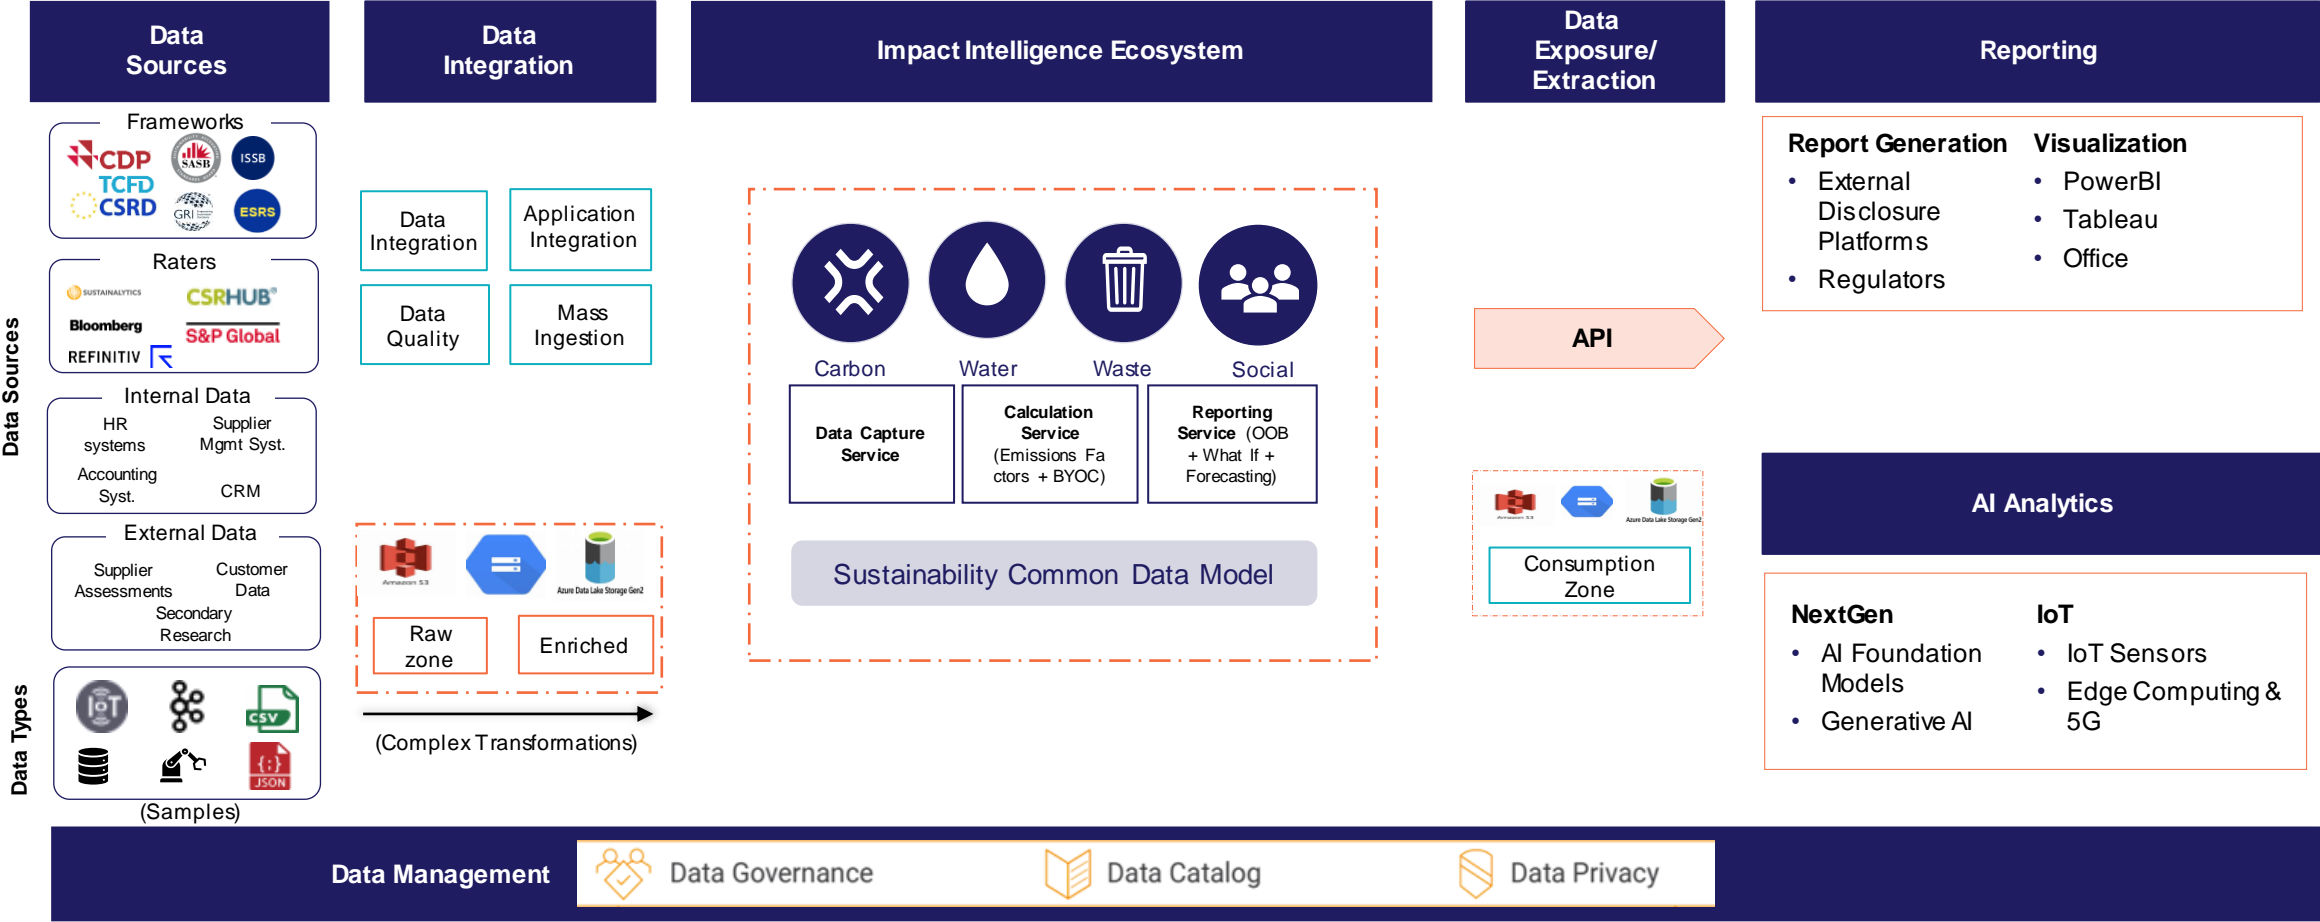

Implement Solution

- Implement Sustainability stack
- Establish **integrated Performance Management** ecosystem to track progress toward sustainability goals
- Develop **data governance** model to manage quality / risk

Impact Data Architecture

Provides a **scalable, auditable, flexible, and automated** cloud agnostic sustainability data ecosystem.

Wipro Impact accelerators summary

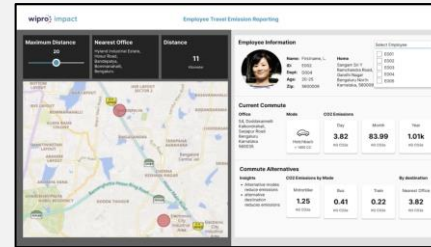

1 Data centre carbon footprint calculator

Provide a single view of data centre emissions with minimal data inputs

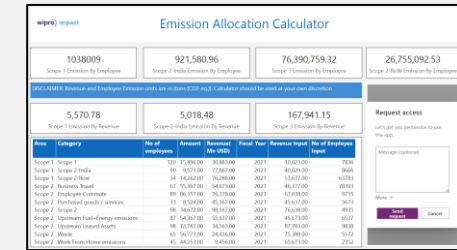

2 Travel emissions calculator

Find solutions to implement low-carbon commute across the board

3 Project team emissions calculator

Evaluates emission impact of account teams

4 Carbon value modelling

A framework to analyse emissions current state and decarbonise

5 Harmonized impact framework & gap analysis

Harmonized view of main frameworks for clients to align on requirements

Thank you.
