Service Definition - Wipro CloudApps Testing as a Service

Service Description

Wipro's Cloud Apps Testing as a Service Offering is a delivery model through which shared resources for specific skill set are utilized as per the project need along with the full time resources within the project. Quality as a Service offering carried out through a scalable delivery model anchored by two major drivers The Co Pilot and the Top Gear Community. Co-pilot is the challenge co-ordinator, who works on getting challenges assigned to specific members to ensure on time submission and review of the same

This includes various skill sets of testing Salesforce, ServiceNow, MS Dynamics, Workday, PEGA, Appian, AEM and other SaaS applications.

QaaS model

- Standard delivery model (hours / per month) agreed upon customer requirement (Ex: 10 to 15 hrs a week to execute 35 test cases per person)
- Co-pilot reviews the test cases and test deliverables, which will be processed further for release of TopGear Rewards
- QaaS team follows the Test approach to understand the requirements and challenges in alignment with overall project scope (Ex: 10 to 15 hrs a week to design 30 test cases per person)
- QaaS Delivery model includes 1) Base Pack 2) Maintenance and Execution pack
- For Functional Testing, if the Test Management/Defect management tool to be provided by Wipro, then additional tool cost will be added to the Base package.
- Costs are indicative and will be updated based on the nature, size and complexity of TC's to be scripted and executed
- Test Environment provisioning and Maintenance cost is not considered
- 1 complimentary pack for every 5 packages
