fusionAIx Pega Implementation Services

1. About Us

fusionAIx is a Pega Authorised Partner specialising in digital transformations and provides implementation services across the globe using Pega Constellation, and Pega PRPC (earlier versions). Our leadership carries over 100+ years of combined Pega implementation experience and have been trusted advisors to many governments and customers worldwide. Our consultants have vast experience in Pega framework implementations including Customer Service, Customer Decision Hub, and many other strategic applications.

With a specific focus on Public Sector, fusionAIx works with Public Sector and Government bodies globally to implement and manage their Pega Platform and digital solutions. fusionAIx delivers Pega services including onsite, offshore and hybrid models.

fusionAIx worked very closely with the Pega product team and contributed to the Constellation Migration tool with enhancements and feedback to build new features.

2. Scope of Services

fusionAIx provides a comprehensive suite of services including Pega Implementation, architecture consulting, BA services, Upgrades etc. and are outlined here.

6. Business Benefits

fusionAIx provides the following business benefits:

- Business outcome focused development ensures quicker time to market
- Enhanced focus on business design and ensures 'Build once and re-use many times' philosophy
- Fusion development using low code and AI ensures business SMEs are involved in every stage of the process ensuring lesser rework
- Cost effective milestone or outcome-based commercial models
- Provide specialist resources based on specific requirements
- Simplified solutions for complex business processes / problems
- Business managed applications and processes
- Leverage fusionAIx core domain expertise for multiple customers across the globe

7. Pricing

fusionAIx offers services based on either fixed price (fixed scope and timeline) or as time & material (variable scope and timeline). The pricing depends on multiple factors including the project scope, services required, duration of the project, data migration, integrations requirements, and location of the services (onsite/offshore/hybrid). Based on these specifications, fusionAIx will provide a commercial offer for a fixed bid. If the services required are based on time & material, our price is as per the attached SFIA rate card.
