Nortal is delighted to participate in the latest release of the G-Cloud framework. This document provides an overview of the service **Low Code Solutions**.

We deliver end to end services from cloud strategy and migration to solving specific business challenges through building cloud native digital solutions. These technology-driven services are supplemented by our business and people capabilities allowing for end-to-end change and adoption.

Nortal is a strategic innovation and technology company with an unparalleled track-record of delivering successful transformation projects for over 20 years. As a valued partner for governments, healthcare institutions, leading businesses, and Fortune 500 companies we deliver value by challenging the status quo and succeeding where legacy firms fail.

1. Introduction to the Service

Achieve rapid development with minimal resources using our Low Code expertise, driving down infrastructure, development, and maintenance costs.

Our engagements follow a mature software development life cycle with teams well-versed in Agile/Scrum methodologies with activities including requirements gathering, tracking development progress to meet key milestones, and performing quality assurance testing in concert with development activities.

2. Service Description

We help companies and public sector organisations to thrive in the transformative age by reinventing themselves constantly, experimenting with new ideas and scaling successes. Our services include strategy, architecture, governance, service design, innovation management, commercial management and advice pertaining to legal and compliance matters. We help businesses transform and evolve quickly to seize the opportunities and help mitigate the risks that digital transformation creates. To respond to these new challenges, public sector organisations need to:

- See the future and define their purpose
- Orchestrate, accelerate, and unblock a portfolio of initiatives

- Re-think and re-create services like a start-up
- Design, build, test and iterate
- Plan, invest, and scale up at pace
- Embrace transformation as a continuous way of working

To enable cloud transformation, this service delivers :

- **Automated Business Processes:** Streamlined processes using low code platforms to enhance efficiency.
- **Customized Low Code Applications:** Tailored applications built rapidly to address specific business challenges.
- **Integration Solutions:** Guidelines and implementations to integrate low code solutions with existing systems.

3. Our Approach

1. **Client Needs Analysis:** Understand the specific processes and areas that can benefit from low code platforms.
2. **Platform Selection:** While our expertise lies in Microsoft Power Platform, we select the best fit for the client's needs.
3. **Rapid Prototyping:** Quickly develop and iterate prototypes to get early feedback and ensure alignment with business goals.
4. **Process Automation:** Use low code platforms to automate business processes, such as business trip requests and reports.
5. **Continuous Evolution:** Regularly refine and expand the solutions as business needs evolve.

4. Pricing

This service is priced in accordance with the SFIA rate card provided and can be modelled using a range of commercial approaches e.g. time & materials, fixed price, etc. Nortal is also able to provide near-shore pricing at reduced rates. 'Ordering and Invoicing' and 'Termination' are to be undertaken in accordance with G-Cloud 14 contract terms unless varied by mutual agreement and detailed within a call-off contract.
