Empowering Decisions,
Enhancing Project Outcomes

About

At ProBid, we transform project delivery in the Defence, Nuclear and Construction sectors by integrating Decision Intelligence. Our niche approach integrates Quantitative Cost and Schedule Risk Analysis and Advanced Analytics with our Knowledge and Data Management infrastructure to offer unmatched capability in project delivery.

We are dedicated to empowering decision-making with integrity, increasing social value and advancing the project profession, whilst ensuring solutions are aligned with client objectives.

By fostering a culture of innovation and experimentation, we ensure our services are future-ready. Our team of qualified and experienced project professionals, along with our industry and vendor partnerships, are the perfect complement.

Our consultancy uniquely embeds our Digital PMO Transformation and Integrated Modelling Services for project organisations to adopt data in the cloud, emerging technologies and data-driven insights for strategic direction.

ProBid

Empowering Decisions, Enhancing Project Outcomes

What we do

We help drive successful outcomes for mega and major projects through comprehensive project controls, advanced analytics, transformative digital solutions, and sophisticated modelling techniques. Our expertise spans across industries, helping clients make informed decisions, optimise performance, and achieve their strategic objectives.

Who we are

Incorporated in 2018, ProBid Ltd is a consultancy born from the founder's extensive experience as an Estimator and Risk Analyst at the planning stage of public and private sector major projects. Founded on the principle that strategic decision-making should be data-driven and rooted in expert analysis with utmost integrity.

Why ProBid

Our small team combines 35+ years of expertise on complex major and mega projects in roles spanning Project Controls, Project Management and Data Science. Additionally, strategic industry and vendor partnerships give us an expert resource pool, enabling us to integrate and tailor cloud and on-premises technology.

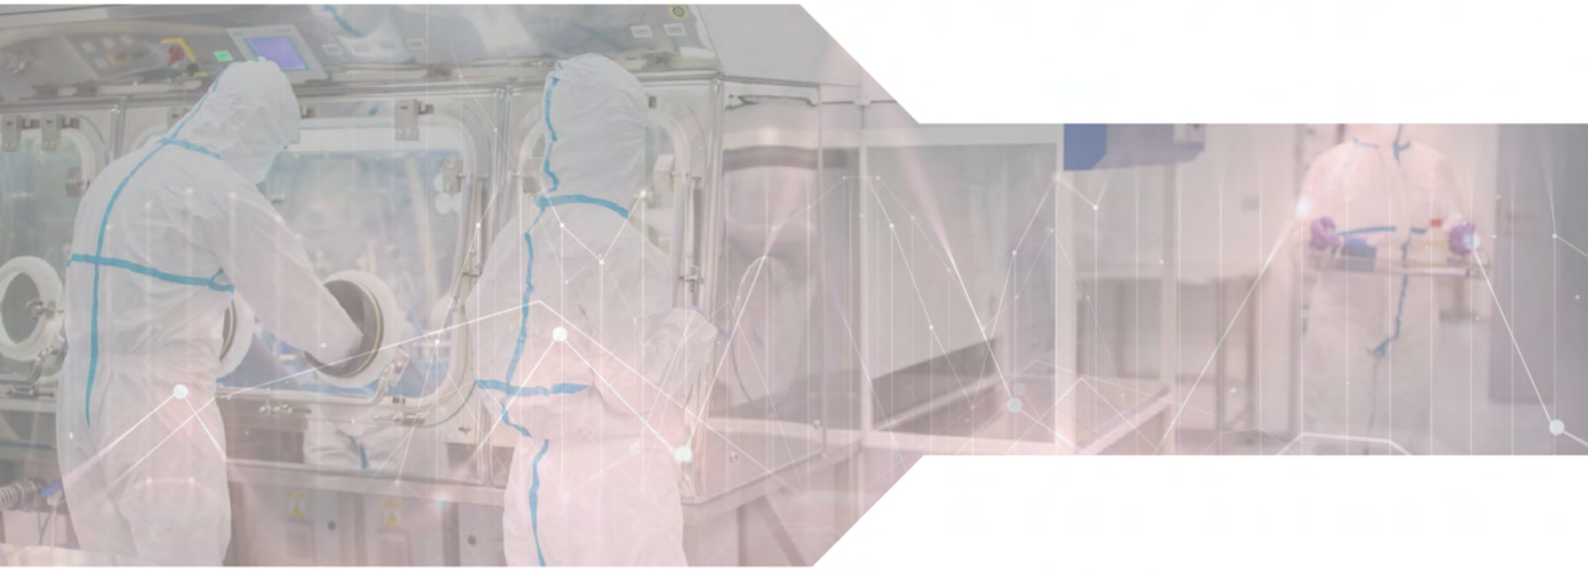
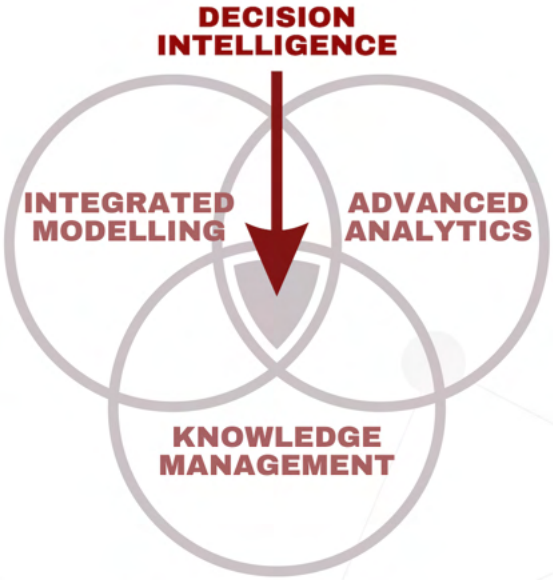
ProBid

Empowering Decisions,
Enhancing Project Outcomes

Our Approach





Decision Intelligence, a strategic nexus where our three core pillars converge, empowering decisions to enhance project outcomes.

1

INTEGRATED MODELLING:

Our Integrated Modelling combines comprehensive services with a systems approach for robust data integration for enhanced programmatic modelling across the project lifecycle.

2

ADVANCED ANALYTICS:

Our Advanced Analytics harnesses machine learning, visual tools, and AI to elevate project outcomes from automation and data-driven insights to predicting variance of outcomes.

3

KNOWLEDGE MANAGEMENT:

Our Knowledge Management approach leverages knowledge graphs and databases to enhance data comprehension, standardise project taxonomies, and streamline information flow.

Our Services

We offer two distinct services under the G Cloud 14 framework, designed to enhance project delivery and add substantial value. Both services are complementary but can also be procured separately to best meet your organisations needs.

1 - DIGITAL PMO TRANSFORMATION

Our Digital PMO Transformation service empowers projects with data, analytics, and AI to drive project and programme success. Through a phased approach, we assess your current PMO landscape, develop a tailored data strategy, and implement an integrated project controls system architecture.

2 - INTEGRATED MODELLING SERVICES

ProBid's cloud-based integrated modelling services combines project controls artefacts for cross-portfolio analysis. Our evidence-based approach provide reliable decision intelligence, empowering robust investment appraisals and business cases with confidence.

Our Services

INTEGRATED MODELLING SERVICES

ProBid leverages a systems methodology for project data integration for Quantitative Risk Analysis (QRA). We maintain an auditable golden thread and assess data maturity, suitability, configurability, and accessibility. This enables our evidence-based approach, enhancing confidence in model outputs, predicting variance, and managing change throughout the lifecycle of projects and programmes.

Key Service Features

- Cost Estimating, Risk Management and Planning and Scheduling support services
- Tailored cost models using our advanced excel workbooks for integration within your project infrastructure
- Quantitative Risk Analysis (QRA) of cost, risk and schedule using any market-leading leading tool
- Independent assurance of contractor and client-side Project Controls artefacts and QRA models, adhering to guidance and standards from industry and government departments
- Business Case and Investment Appraisal management including advisory and development of a 5-case model

Benefits

- Dynamic Data Management to effectively capture assumptions and manage data throughout the project
- Aligned work, cost, and risk breakdown structures across projects and programmes for a traceable golden thread
- Iterative model refinement of underpinning data and assumptions for clarity and confidence until completion
- Predicting variance, planning for corrective actions and actively mitigating emerging risk
- Stronger Business Cases resulting in well-justified investment decisions

QRA Modelling Approach
