Cyber Security Technical Assurance and Information Governance

GSA Global provides both point-in-time assessment and testing, and continuing managed vulnerability management and testing services to support clients with limited internal testing capability and/or capacity. GSA Global offers human and physical testing services that assess the vulnerability to inadvertent and/or deliberate compromise by staff and/or intruders in organisations and their critical third parties.

Who We Are

The Cyber division of GSA Global has significant experience and knowledge in all aspects of security and cyber security across the private, public and defence sectors.

GSA Global combines deep UK security insight and expertise drawn from decades of experience in leading and advising on public and private sector security and resilience.

What makes us unique is our heritage in leading major UK police forces, security organisations and our shared commitment to protecting people, organisations and assets.

Why Choose Us

Deep Industry Experience

Our consultants have experience performing various penetration tests, consultation, and CE/CE+ across both private sector (Retail, Financial, Insurance, Health etc), public sector (Local Government, NPSA, DHSC, DVSA, Universities and research institutes) and MoD.

Industry Accreditations

The Cyber division is CREST accredited and our consultants are certified to CREST and Cyber Scheme certifications.. We are Cyber Essentials Plus and UKAS ISO27001 certified.

GSA Global

As part of a larger Group, we can draw on the expertise and experience of the group leadership and the other services offered by group.
