

G-Cloud 14 Service Definition

Secure by Design for Cloud Services

May 2024

 **accenture**

Service introduction

Secure by design

Our service enables your organisation to laterally integrate security principles into cloud service design and lifecycle, by correlating business context and industry standards to greatly minimise chance of disruption or compromise to systems.

Service features and benefits

Service features

- Embedding security principles into your Secure Software Development Lifecycle (SSDLC), including detection, response and remediation capabilities.
- Architecture design approach defined by NIST and OWASP frameworks and advisories.
- Security designs and patterns defined by use of cloud-native services alongside use of threat modeling.
- Experienced and certified cloud security specialists.
- Embedding landing zone architectures, to enable secure by design as a foundational principle in systems which further ensures baseline security controls can be flexibly applied with ease at scale.
- Design and implementation of logging/monitoring to utilise cloud-native SaaS/PaaS tooling to capture all serverless and host-based logging.
- Continuous assurance integrated into operational lifecycle, including vulnerability management processes and evidenced based reporting on security control efficacy, leveraging native integrations with CIS and NIST benchmarks.

Service benefits

- Reduces complexity of implementing secure defaults.
- Enables continuous and real-time monitoring and auditing.
- Minimises organisational attack surface.
- Centralised collation of data for logging and monitoring.
- Integrates security testing and assurance early into development process.
- Improved visibility into security control compliance.

Key differentiators

Our expert teams blend Engineering, Architecture and Cyber Security to ensure your systems and services are designed, built, assured and ran securely from project initiation to live.

Service implementation

Key Secure by Design Principals

Adopt a Risk-Driven Approach

We will help you to establish and maintain an understanding of your risk appetite and assess the existing risks to ensure appropriate controls are in place to protect you from the evolving threat landscape.

Design Flexible Architectures

We will helping you to architect flexible systems and services that allow for easier integration of security controls providing better protection from cyber threats, vulnerabilities and changing business requirements.

Defend in Depth

We will ensure your systems and services are created with layered controls to make it harder for attackers to fully compromise and access these systems should a control fail or be overcome.

Why 6point6?

Technology
agnostic and
outcome driven

We mobilise
quickly and
deliver
at pace

Integration and
support
capabilities
around the UK

Our people
are proven
experts

Transformation secured

We work to

Create innovative new digital products to
keep your business ahead

Transform the way you do business with
focused insight and analytics

Strengthen your operations, supporting
and developing your team and
infrastructure

Secure your data and your technology
investments

“6point6 is my go-to supplier if I need advice or support with regards to cyber security. We see them as our trusted partner, and they have been helping us in our journey to build a secure bank.”

Daniella Somerscales CISO, ClearBank
