

Agilisys GenAI Solutions

Lot 2: Cloud Software, Service ID: 422124348157713

Pricing Structure

1. Overview

We offer a flexible, transparent pricing model, based on annual volumes bundled into monthly subscription fees. This approach accommodates buyers of varying sizes and caseloads, and allows for scalability with optional top-ups.

Pricing is banded into three tiers depending on anticipated annual plan volume, with bundled services and optional add-ons specified.

2. Annual Volume-Based Pricing Bundles

Tier	Annual EHCPs Drafted	Monthly Fees
Small	500	£3,000
Medium	1,000	£5,000
Large	1,500	£7,000

Each tier includes all core features (see Section 4) and scales based on buyers' annual caseload.

3. Optional Add-Ons

Buyers can purchase additional EHCP Drafts if they exceed their annual bundle. These are available in flexible increments and charged at the same per-plan rate as their original banding.

4. What is Included in a Bundle?

All bundled plans include the following:

- **Bespoke Templates** tailored to your local processes
- **Automated Draft Generation** for EHCPs
- **Hands-on Onboarding** and initial training
- **Ongoing Customer Support** (chat, email, and scheduled calls)
- **Account Management** with quarterly reviews

Additional support options can be discussed upon request.

5. Important Notes

- Pricing is subject to client requirements and unique implementation costs.
- All add-ons are optional and transparently priced.
- Monthly pricing reflects a minimum 12-month commitment.
- All pricing is exclusive of VAT.

We invite you to reach out to discuss your specific needs in detail.
