Integrated Managed Infrastructure (IMI) for AWS Azure

The Managed Services listed within this guide are typically invoiced as a Monthly Recurring Charge with some services available as One Off Charge.

All prices **Exclude** Travel expenses where applicable

Our service is a fully integrated managed service that allows organisations to make best use of their enterprise cloud IT infrastructure, without the need to bring in new people and adopt new support processes. Prices are charged on a Monthly Recurring basis and charged typically by the cumulative number of service units i.e. Compute 'x' number of instances. This charge can vary monthly based on the service units consumed within a particular month.

Managed Components	Pricing Unit	List Price UK monthly recurring
Compute Base - This service provides the essential management service wrap; providing management of customers' infrastructure deployed on public clouds. AWS (EC2+EBS+Snapshot Backups) Azure (VM + Managed Disks + Azure Backup)	Per Instance	£39.94
