SECURE UK-OFFICIAL CLOUD ENVIRONMENTS SERVICE

CACI design and implement public cloud environments that meet NCSC's Cloud Security Principles and are suitable for data classified at UK OFFICIAL SENSITIVE. This includes development, test and operational environments hosting enterprise level applications. Our expert Cloud Engineers will work with you to deliver a solution that minimises security and compliance risk. Features of the service include:

- Designed for UK-OFFICIAL (SENSITIVE) in-line with NCSC and CIS principles
- Monitoring and Audit solutions for security and compliance including GDPR
- Reliable, repeatable and scalable solution using CloudFormation scripts
- Architectural best practices in-line with the AWS Well-Architected Framework
- Solutions tailored to your specific data and security requirements
- Scalable solutions suitable for development, test and production environments
- Identity and Access Management (IAM) including AWS Organisations policy-based management
- Monitoring via GuardDuty, CloudWatch, Cloudtrail, Macie and AWS Config
- Multi VPC and subnet architecture providing secure compartmentalisation
- Management VPC providing monitoring and administration.

CACI prides itself in being easy to do business with. After actively engaging with our customers to make sure our solution is the right fit, we can offer a flexible commercial solution to ensure value for money. We have three typical models, namely Time & Materials, Fixed Price or Managed Service based. The following table provides more detail:

Model	Detail
Time and Materials (T&M)	T&M is appropriate where the requirements need further elaboration and are subject to change, or where customer consumption of certain elements, such as Architect or DevOps resource is variable. T&M is typically calculated on day rate using the SFIA rate card.
Fixed Price (FP)	Fixed pricing can be offered when the statement of work requirements are clearly defined and agreed by both parties. This necessitates the availability of mature and accurate input documents so that the amount of effort to achieve the project deliverables can be calculated. In addition, any project risks, issues, assumptions or dependencies need to be stated and measured. Pricing is available on request and is based upon the day rates shown in the SFIA rate card.
Managed Service (MS)	Managed Services are typically delivered via CACI's 24x7, 3-tier technical support working within our ITIL_V3 aligned Service Management system. Pricing is tailored to meet the customer's Service Level Requirements and is based upon the day rates shown in the SFIA rate card.

Full details and pricing can be found within CACI's SFIA Rate Card which shows the range and cost of expertise from £430 to £1,500 per person per day.
