MODCLOUD TECHNICAL DELIVERY

CACI have experience in providing technical support and consultancy to MOD in the design and implementation of MODCloud platforms and services under the CES (ASDT) CIRRUS EMPORIUM programme. We can support the creation, maintenance and evolutions of ACE (Azure), ICE (AWS) and VMWare services in line with MOD security (JSP 604) and cloud best practice. By working successfully with MOD design, accreditation, and security authorities CACI have a proven ability to successfully obtain and maintain Interim Approval to Operate (IATO) for MODCloud. Features of the service include:

- Delivery of MODCloud platform services on ACE (Azure) and AWS (ICE).
- Provision of MODCloud Personal Shopper services to applications moving to MODCloud.
- Consultation on Cloud transformation to support continuous evolution of secure and accredited cloud platforms.
- Monitoring and Audit solutions for security and compliance including GDPR
- Provision of DevSecOps and Architecture skills working in collaboration with MOD teams.
- Architectural best practices in line with the Well-Architected Framework
- Scalable solutions suitable for development, test and production environments, using Infrastructure as Code (IaC) best practice
- Implementation and management of Identity and Access Management (IDAM) Organisations policies
- Agile, SAFe (Scaled Agile Framework) delivery
- Close collaboration with Cloud partners (Azure, AWS, VMWare)

CACI prides itself in being easy to do business with. After actively engaging with our customers to make sure our solution is the right fit, we can offer a flexible commercial solution to ensure value for money. We have three typical models, namely Time & Materials, Fixed Price or Managed Service based. The following table provides more detail:

Model	Detail
Time and Materials (T&M)	T&M is appropriate where the requirements need further elaboration and are subject to change, or where customer consumption of certain elements, such as Architect or DevOps resource is variable. T&M is typically calculated on day rate using the SFIA rate card.
Fixed Price (FP)	Fixed pricing can be offered when the statement of work requirements are clearly defined and agreed by both parties. This necessitates the availability of mature and accurate input documents so that the amount of effort to achieve the project deliverables can be calculated. In addition, any project risks, issues, assumptions or dependencies need to be stated and measured. Pricing is available on request and is based upon the day rates shown in the SFIA rate card.
Managed Service (MS)	Managed Services are typically delivered via CACI's 24x7, 3-tier technical support working within our ITIL_V3 aligned Service Management system. Pricing is tailored to meet the customer's Service Level Requirements and is based upon the day rates shown in the SFIA rate card.

Full details and pricing can be found within CACI's SFIA Rate Card which shows the range and cost of expertise from £430 to £1,500 per person per day.
