1 Service Overview

Capgemini works with business stakeholders to understand and articulate their performance against recognised cross-industry practice. This analysis can be developed for different purposes in support of cloud-based services. Our Maturity Assessment and Facilitation service provides support in the form of assessment of the current state and the design of personalised workshops to identify gaps and the potential for improvement. The primary goal is to deliver valuable insight within a particular area or capability, utilising a structured format of questioning. This is done through a consultancy engagement, typically carried out over a 2-week period.

2 Business Need

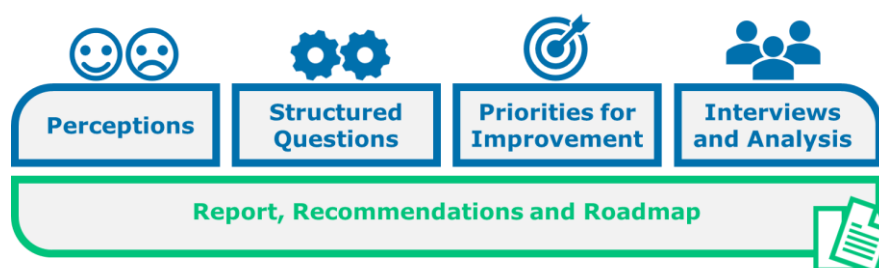

Public sector organisations often need to understand how they compare with their peers in delivering business solutions to users and citizens. The maturity assessment serves as a driver for continuous improvement, as well as for the successful delivery of change programmes. They can benefit from understanding approaches and solutions in use in organisations in other sectors of the wider economy, including the private sector. This is particularly important in the application of processes and solutions involving emerging technologies and cloud-based services.

Conducting maturity assessments can be especially valuable when starting a work program. They help identify the current state of the organisation and highlight which areas of improvement should be prioritised. They can also be employed regularly as part of ongoing improvement efforts. This involves assessing progress against previous benchmarks to spot any needed corrections and determine priorities aligned with the desired benefits.

Capgemini has the capability to deploy a project team of change experts and business analysts to work with business stakeholders to help them identify opportunities and develop solutions.

3 Our Approach

Our maturity assessment approach can assess current capability in a set of specified areas (chosen by the client) using a defined group of questions, activities, and discussions to provide a clear foundation for defining priorities, roadmaps, and monitoring improvement. The diagram below illustrates key elements of the approach.

This diagram is for illustration purposes only and does not represent any obligation or responsibility of Capgemini.

Experienced Capgemini consultants undertake a high value, low cost, and concise, series of engaging and entertaining activities that capture qualitative and quantitative data in a structured methodology.

This would enable the client to assess themselves against a defined set of criteria, with Capgemini delivering a report at the end of the engagement visualising the following:

- A. The client's baseline position, capturing where the customer is today.
- B. The client's target position, capturing where the customer aspires to be.
- C. An action plan and roadmap of activities and actions that will enable the client to move from A to B.

4 Buyer Responsibilities

Please refer to the Supplier Terms listed with this service on the Platform. These may contain additional Buyer obligations/costs the Buyer is subject to that are not identified anywhere else in the Supplier's Application or on the Platform.

5 Service Management

This service can be delivered as a defined project or on a day rate basis.

6 Protection of Data

This service is based on a security classification of 'Official', however should you have a requirement for a different security classification that you would like us to consider, please contact us to discuss.

7 On-boarding and Off-boarding

Prior to the execution of the Order, the Supplier and the Buyer will agree the scope of the exit plan for the Services and a timescale for delivering an exit plan to ensure continuity of service.

Capgemini shall undertake on-boarding and off-boarding activities agreed within the Order Form and an exit plan in line with the Call-Off Contract terms which will be charged for in accordance with the Pricing section for this service.

8 Skills and Knowledge Transfer

Capgemini recognises that skills and knowledge transfer is a critical element in the provision of G-Cloud services to public sector clients. Where possible and applicable, this forms part of the delivery plan for the service agreed at the start of the engagement. Our consultants and engineers are experienced in providing skills and knowledge transfer for major private and public sector clients.

Where appropriate, we may use a standard approach, tailored to topic, skills-gap and individual, to ensure consistency and effectiveness. The approach, Capgemini's Assess-Plan-Implement framework, has been used repeatedly by our teams to structure the work involved in transferring skills and creating new teams capable of driving and sustaining change long after the end of the formal programme. The framework can be applied throughout a project to understand knowledge transfer objectives, plan training delivery methods and materials, and deliver and evaluate success.

9 Partnerships/Alliances
