1 Service Overview

Capgemini's Borders and International Trade Service provides UK Government clients with the End-to-End (E2E) advisory, design and delivery capabilities required to accelerate the transformation of the UK Border through the power of innovative digital services, cloud, data and AI platforms.

Our Borders and International Trade capability consists of 1,000+ resources deployed across 20+ digital programmes impacting border control and international trade systems across the UK, France, Germany, Netherlands, UAE and USA. Our Borders and Trade experts have supported both Public and Private Sector clients deliver several of the largest digital transformations at the Border, including rapid mobilisation of new cloud solutions to support EU Exit.

We combine the above domain expertise with our digital transformation capabilities to offer a unique E2E service for the design, delivery and implementation of innovative border solutions. Our solutions consider political, industry and technology trends, supported by our #1 ranked global think tank (Capgemini Research Institute) and Global Technology Partners.

1.1 Service Capabilities

Capgemini's Borders and International Trade Service provides clients with the expertise and resources to supplement existing digital transformation programmes across the following capabilities:

E2E Programme Management

We bring industry best practice in the design, delivery and governance of Border transformation programmes. This includes Target Operating Model design and implementation (business and IT) and delivery assurance reviews covering commercials, delivery milestones, resourcing and border technology.

Border Policy Lab

Using Capgemini's Accelerated Innovation Environment (AIE), Accelerated Solutions Environment (ASE) and Frog user centred design capabilities, we support the setup and implementation of Border Policy Labs to bring together cross-government/industry communities to evaluate border policy and its impact on technology solutions. This allows early strategic challenge to policy design and validation of policy impact through pilot programmes and data insights.

Strategy and Roadmap

Our Technology Strategy and Maturity Assessments supports the identification of digital, cloud, data and AI capabilities required to enable border transformation. In collaboration with our Global Technology Partners, we assess technology strategy in line with industry and government trends. We support the creation of technology roadmaps, highlighting foundational technical capabilities and pathways to leveraging border technology innovation e.g., IoT, Blockchain, Biometrics, AI.

Digital Service Design

Through our Frog creative consulting services, we apply creativity, strategy, design and data to re-invent border interactions that drive upstream compliance and sustainable economic growth. We provide digital service design expertise from over 2000 designers, technologists, data scientists, consultants and digital strategists, orchestrating customer-centric transformation of the border.

Sustainable Technology and Business Architecture

Technology and Business Architecture design and delivery is accelerated through our library of digital, cloud, data and AI reference architecture models.

In line with our commitment to creating a sustainable future, we provide Sustainable IT assessments providing you with insights on how to reduce the environmental impact of Enterprise IT across hardware, infrastructure, applications and data.

In collaboration with our Global Technology Partners, we provide architecture reviews across a variety of vendors (e.g., AWS Well-Architected Reviews) and support the optimisation of cloud costs.

Engineering

Where required, we provide full stack, e2e engineering capabilities to deliver digital, cloud, data and AI platforms that underpin immigration, border control, tax and customs solutions. This includes expertise in

DevSecOps, Cybersecurity and global interoperability standards (UN/EDIFACT, AEOL, eIDAS, e-CODEX, PSD2, XML, API, OAuth, EU/OECD).

Data Services

Our data services capabilities provide expertise to support the creation of border data strategies, data architectures and governance models that underpin innovative border solutions. We design and deliver data analytics, visualisation and AI/ML platforms that provide greater insight to immigration and customs processes and enable data sharing across government and industry.

AI Advisory

Our AI Advisory capability provides expertise in the adoption of GenAI solutions to support improvements in trade flow, passenger flow and security ports of entry. This includes establishing AI strategy, piloting and scaling AI based border solutions e.g., risking and compliance platforms that accelerate frontline border operations and back-office processing.

We design and deliver Digital Twin capabilities to bridge the gap between the Physical and Digital Border. This enables Government to scenario plan changes in passenger, goods and traffic flow, model the impact of policy changes, build a resilient workforce and proactively manage border/supply chain resilience.

Change Management

Our change management capabilities accelerate the adoption of border solutions across government and industry. We provide expertise in designing and implementing border stakeholder change programmes that enable the safe and controlled rollout of change across the Border, including the setup and execution of pilot programmes. This is encompassed through our Border Command Centre solution, that brings together key border stakeholders, data and insight to drive proactive management of change at the border.

2 Business Need

The UK Government has published its 2025 Border Strategy outlining its ambition to develop a world-leading Border that is frictionless and enables the economic prosperity of the UK.

Due to the shifting landscape of geo-political tensions, legal/illegal immigration, climate change, supply chain uncertainties and more complex security threats, the UK Government must invest in new border solutions to meet this ambition.

We believe the catalyst for the future UK Border is the adoption of innovative digital, cloud, data and AI services that integrate data across complex industry supply chains and Government. This is underpinned with advancements in border technology (AI, IoT, Blockchain, Biometrics) which are seamlessly integrated into border operations to support pre-emptive risk detection, improved border flow and resilience.

Capgemini's Borders and International Trade Service provides UK Government with an accelerator to understanding how technology can be used as an asset to drive border transformation and be delivered collaboratively with industry to maximise adoption. It provides an E2E capability to border transformation programmes that drive business outcomes and optimises value for money.

3 Our Approach

Capgemini uniquely combines its digital transformation capabilities and domain expertise across immigration, border security, tax, customs and international trade to deliver this service. Our approach is underpinned with 3 key principles:

Collaboration

Collaboration is central to the Capgemini philosophy and a pillar of our service delivery. From strategy development through to implementation, we employ our **Collaborative Business Experience™** to work beside Government, analysing challenges and guiding transformation to deliver business outcomes.

We work in multi-disciplinary and blended teams, collaborating across policy, business and IT teams across the organisation to support alignment to border change solutions. In addition, we work in lockstep with third party

suppliers, vendors, OGDs and Industry to deliver border solutions that drive the maximum value for all stakeholders and are adopted at pace.

Local Delivery / Global Reach

Our UK based delivery model enables us to rapidly mobilise and scale our engagements with security cleared resources to support UK Government transformation programmes. Where required, we have access to our global delivery model, providing a broad range of technical capabilities and skills to supplement your delivery requirements.

Recognising that UK Government border processes are required to be interoperable at a global scale, we bring a blend of UK and Global expertise in immigration, border security, tax, customs and international trade processes to our engagements. We build communities across our global borders, tax and customs clients to foster international knowledge sharing and co-development of border assets and accelerators. We believe this is key to ensuring global lessons learned are shared for border change programmes and value for money is achieved.

Innovation & Thought Leadership

We bring our global expertise in technology transformation and borders to support your teams, providing strategic challenge to policy, business and technical solutions. We de-risk your deliveries through our deep expertise in large scale border transformation programmes, leveraging our proprietary assets as delivery accelerators.

Our thought leadership from the Capgemini Research Institute (#1 global ranked think tank), brings domain relevant insight and most up-to-date thinking across intelligent industry supply chains, collaborative data ecosystems, digital identity, biometrics and AI.

Our Global Technology Partners supplement our capabilities to give you a holistic view of technology trends and practical application of innovation to border solutions. In combination with our Accelerated Innovation Environment (AIE), we bring a tested suite of capabilities to collaboratively design, prototype and scale innovative technologies that truly deliver a world-leading border.

4 Buyer Responsibilities

Please refer to the Supplier Terms listed with this service on the Platform. These may contain additional Buyer obligations/costs the Buyer is subject to that are not identified anywhere else in the Supplier's Application or on the Platform.

If these responsibilities do not match your expectations, then please contact us in order that we can explore options to vary our approach.

5 Service Management

Not applicable.

6 Protection of Data

This service is based on a security classification of 'Official', however should you have a requirement for a different security classification that you would like us to consider, please contact us to discuss.

7 On-boarding and Off-boarding

Capgemini shall undertake on-boarding and off-boarding activities agreed within the Order Form (including as a minimum an exit plan in line with the Call-Off Contract terms) which will be charged for in accordance with the Pricing section for this service.

8 Skills and Knowledge Transfer

Capgemini recognises that skills and knowledge transfer is a critical element in the provision of G-Cloud services to public sector clients. Where possible and applicable, this forms part of the delivery plan for the service agreed at the start of the engagement. Our consultants and engineers are experienced in providing skills and knowledge transfer for major private and public sector clients.

Where appropriate, we may use a standard approach, tailored to topic, skills-gap and individual, to ensure consistency and effectiveness. The approach, Capgemini's Assess-Plan-Implement framework, has been used repeatedly by our teams to structure the work involved in transferring skills and creating new teams capable of driving and sustaining change long after the end of the formal programme. The framework can be applied throughout a project to understand knowledge transfer objectives, plan training delivery methods and materials, and deliver and evaluate success.

9 Partnerships/Alliances

Capgemini will work with our leading technology partners to determine the optimal digital, cloud, data and AI services required to underpin UK Border processes. Our global core partners include:

Adobe | AWS | Dassault Systemes | Duck Creek | Google Cloud | Guidewire | IBM | Intel | Majesco | Microsoft | Mulesoft | Oracle | Pega | Red Hat | Salesforce | SAP | ServiceNow | Temenos | VMWare

10 Vendor Accreditations/Awards

For the 12th year in a row, Capgemini has been recognized as one of the World's Most Ethical Companies® by the Ethisphere® Institute. This is an acknowledgment of our ethical culture that makes us an employer of choice and responsible player in the eyes of our clients, shareholders, and the wider community.

ISO 9001 Quality Management for Management Consultancy and IT Implementation and services to the Public Sector

ISO 27001:2013 - Provision (Delivery) of IT services including business applications development, maintenance and Data, Digital and Cloud technologies.

NelsonHall has identified Capgemini as a Leader in its 2022 NEAT Vendor Evaluation for Learning Services due to its ability to meet future client requirements as well as its capability to deliver immediate learning benefits to them.

Capgemini is the first amongst consultancy and technology firms to be recognized six times in a row for its thought leadership reports.

2023 Ecovadis Platinum Rating: We maintained a platinum rating, recognising us as a responsible and sustainable business in the top 1% of companies assessed.

Better Society Awards: Our collaboration with Code Your Future to offer digital skills training won a Better Society Award in 2022. The awards celebrate efforts by commercial organisations to create a better society.

Inclusive Top 50 UK Employers List: We achieved second place in the Inclusive Top 50 UK Employers List 2022/23 – a list that assesses companies for best practice on diversity, equality and inclusion
