#### 1 Service Overview

Capgemini's Procurement Strategy service provides Design, Consultation and Business Analysis in support of the design and implementation of Cloud based services.

Capgemini's procurement strategy service is able to provide insight and expertise that can assist in the development of the procurement strategy. The procurement strategy can enable the client organisation to have the knowledge and capacity to make informed procurement decisions that can provide the best services to the end user. The procurement strategy can provide clear direction for all users and stakeholders and can be aligned to the strategic aims and objectives. This service can be used to help focus on specific aspects of an organisations procurement strategy such as procurement of Cloud based products and services.

The procurement strategy can help define the role of procurement across source-to-contract and purchase-to-pay.

This service supports Cloud based projects and services.

#### 2 Business Need

Organisations may need to define their procurement strategy in order to determine how goods and services can be purchased. This can enable legal and social commitments to be met and savings targets to be achieved. However many organisations do not have a clear view of what is their procurement strategy and how they as a department can support the rest of the organisation.

Capgemini has experience helping organisations to develop and implement their procurement strategy and can enable the strategy to meet the needs of the business and service owners and support the delivery of benefits to the organisation.

#### 3 Our Approach

Capgemini's approach is able to leverage its procurement methodology. Capgemini can define key stages and milestones and engage stakeholders.

The approach and plan for developing a procurement strategy can entail one or more of the following four stages:

- Strategy Definition & Preparation which can consist of understanding executive direction, hypothesis generation and development of key questions;
- Analysis & Validation which can consist of stakeholder interviews, artefacts analysis, constraints, weaknesses and critical success factors identification;
- Strategy Construct & Development which can consist of the development of key themes and Recommendations (including Cloud based solutions), introduction of the enterprise architecture and thought leadership on solution capabilities;
- Strategy Buy which can consist of developing the strategy reporting with the roadmap and additional recommendations.

#### 4 Buyer Responsibilities

Please refer to the Supplier Terms listed with this service on the Platform. These may contain additional Buyer obligations/costs the Buyer is subject to that are not identified anywhere else in the Supplier's Application or on the Platform.

## 5 Service Management

Not applicable.

#### 6 Protection of Data

This service is based on a security classification of 'Official', however should you have a requirement for a different security classification that you would like us to consider, please contact us to discuss.

## 7 On-boarding and Off-boarding

Prior to the execution of the Order, the Supplier and the Buyer will agree the scope of the exit plan for the Services and a timescale for delivering an exit plan to ensure continuity of service.

Capgemini shall undertake on-boarding and off-boarding activities agreed within the Order Form and an exit plan in line with the Call-Off Contract terms which will be charged for in accordance with the Pricing section for this service.

## 8 Skills and Knowledge Transfer

Capgemini recognises that skills and knowledge transfer is a critical element in the provision of G-Cloud services to public sector clients. Where possible and applicable, this forms part of the delivery plan for the service agreed at the start of the engagement. Our consultants and engineers are experienced in providing skills and knowledge transfer for major private and public sector clients.

Where appropriate, we may use a standard approach, tailored to topic, skills-gap and individual, to ensure consistency and effectiveness. The approach, Capgemini's Assess-Plan-Implement framework, has been used repeatedly by our teams to structure the work involved in transferring skills and creating new teams capable of driving and sustaining change long after the end of the formal programme. The framework can be applied throughout a project to understand knowledge transfer objectives, plan training delivery methods and materials, and deliver and evaluate success.

## 9 Vendor Accreditations/Awards

For the 12th year in a row, Capgemini has been recognized as one of the World's Most Ethical Companies® by the Ethisphere® Institute. This is an acknowledgment of our ethical culture that makes us an employer of choice and responsible player in the eyes of our clients, shareholders, and the wider community.
