

# Digital Clinical System Readiness Assessment

## Description

The most successful clinical system implementations are based on the development of localised implementation plans which reflect the risk profile and readiness of the organisation to transform and the capability and capacity to deliver. In preparation for these complex implementations Channel 3 work with clinical and non-clinical stakeholders in order to undertake an EPR Readiness Assessment.

Using our established EPR readiness assessment methodology we will engage with key stakeholders in the Trust and review relevant artefacts, in order to assess the readiness of the organisation against “what good looks like” in 5 key areas: strategic, programme, change, commercial and technological.

## Features

- Strategic readiness assessment
- Technological readiness assessment
- Programme delivery readiness assessment
- Change and transformation readiness assessment
- Commercial readiness assessment
- Review of priority processes
- EPR/Clinical system workshops
- EPR/Clinical system roadmap

## Benefits

- A better understanding of the organisation baseline and digital maturity
- Improved planning capability
- Mitigation for key areas of risk identified
- Benefits baseline
- Improved Governance
- Resource plan for Programme Team
- Engaged workforce
- Increased chance of achieving strategic digital objectives
