

Digital/ICT Business Case

Description

Channel 3 offers a range of strategic planning tools that provide added value, including collateral, benchmarking and established methodologies. Our business case development focuses on how to solve the quality, value and digital innovation challenges the public sector faces.

We have a highly engaged and structured approach to developing ICT business cases, ensuring buy-in and support from both the client and ICT functions. We establish the 'As Is' and the 'To Be' and the strategic options that form the case for change. We then present the most economically advantageous option in terms of the strategic, economic, financial, commercial and management cases that support such change.

Features

- Independent review and assessment of strategic ICT
- Appraisal of value, quality and digital innovation
- Identification of risk and opportunities to step change value, quality and digital innovation.
- Benchmarked against best practice and sector peers, savings opportunities identified
- Partner, business, region, citizen, service user and patient aligned
- Proven collateral and approach, expertise and track record

Benefits

- Solutions that are strategically aligned between business and technology
- Investment profiling delivering value for money
- Aligned to Government and Departmental 'digital by default' agendas
- Clarity of strategy, roadmaps, governance and performance
- Benefits and outcomes focussed
- Supports commercially provided (cloud) services leading to prodigious savings
