

Digital/ICT Supply Chain Optimisation

Description

Channel 3's Supply Chain Optimisation ensures that you attain best value and rationalisation of your supply chain, focusing specifically on quality (risks, supply classification) and efficiency (costs, benefits, performance). Our supply chain optimisation has been engaged by many public sector organisations and will always result in savings and a step change in quality of supply chain management.

This is achieved by comprehensive due diligence and requirements gathering to fully map out the organisation's situation and opportunities moving forward. We can then manage the supply chain engagement assuring both immediate and strategic outcomes are fulfilled.

Features

- Independent review and assessment of strategic ICT
- Appraisal of value, quality and digital innovation
- Risks and opportunities identified
- Benchmarked against best practice and sector peers, savings opportunities identified
- Partner, business, region, citizen, service user and patient aligned
- Proven collateral and approach, expertise and track record
- Strategic partnerships, fixed price and discount engagements

Benefits

- Solutions that are strategically aligned between business and technology
- Investment profiling delivering value for money
- Aligned to Government and Departmental 'digital by default' agendas
- Clarity of strategy, roadmaps, governance and performance
- Sourcing and supply chain strategies, aligned to savings opportunities
- Supports commercially provided (outsourced) services leading to savings
