

Palantir Foundry Support

G-Cloud Service Definition Document

Palantir Foundry Support

Cognizant can provide assistance to customers planning to migrate to the cloud and/or from other cloud platforms to Palantir's cloud-based platforms. Our engineers can assist with this process and build/maintain the data pipelines and transformations on Palantir cloud-based platforms.

Service Features:

- AI-driven medical image analytics & diagnostics
 - Patient stratification & cohort insights generation
 - Treatment adherence & adverse event analytics
 - Disease progression & patient journey profiling
 - Health data quality & validity assessment
 - AI-driven Preventive healthcare analytics
 - AI-driven Personalised medicine analytics
-
- **Service benefits:**
 - Various service types from consulting, prototyping, solutioning, to implementation/integration
 - Application of evolutionary AI algorithms for predictive and prescriptive analytics
 - Advanced analysis and comprehensive visualisation of patient & cohort insights
 - Automated disease/medical identification, classification, and prediction
 - Advanced exploration and prediction of treatment journeys and responses
 - Patient disease risk assessment, onset prediction, and progress forecast
 - Recommendation of personalised treatments for individual patients/groups

About Cognizant
