

UK HC AIA Offerings

Modern healthcare must integrate virtual and physical care across multiple use cases

Offerings Portfolio

**Multi-channel
customer
engagement**

Virtual Health Suite

**Medical data
repositories
(analytics)**

**Care management
Insights**

**Data Estate
Modernisation**

**Experience design
(physician and patient)**

**Data & digital
engineering**

**Stakeholder experience
optimization**

**Health data management
and analytics**

**Administrative/
financial cost
optimization**

**Government program
expansion**

**Data Sharing &
Interoperability**

Offering 1: Virtual Health Suite

- The pandemic has accelerated the need for anytime, anywhere care – 2020 was a tipping point
- Virtual health is now a competitive imperative as consumers demand improved and personalized experiences
- Leaders are extending traditional care through virtual means – allowing for a scaled, integrated care model, that is continuous and responsive

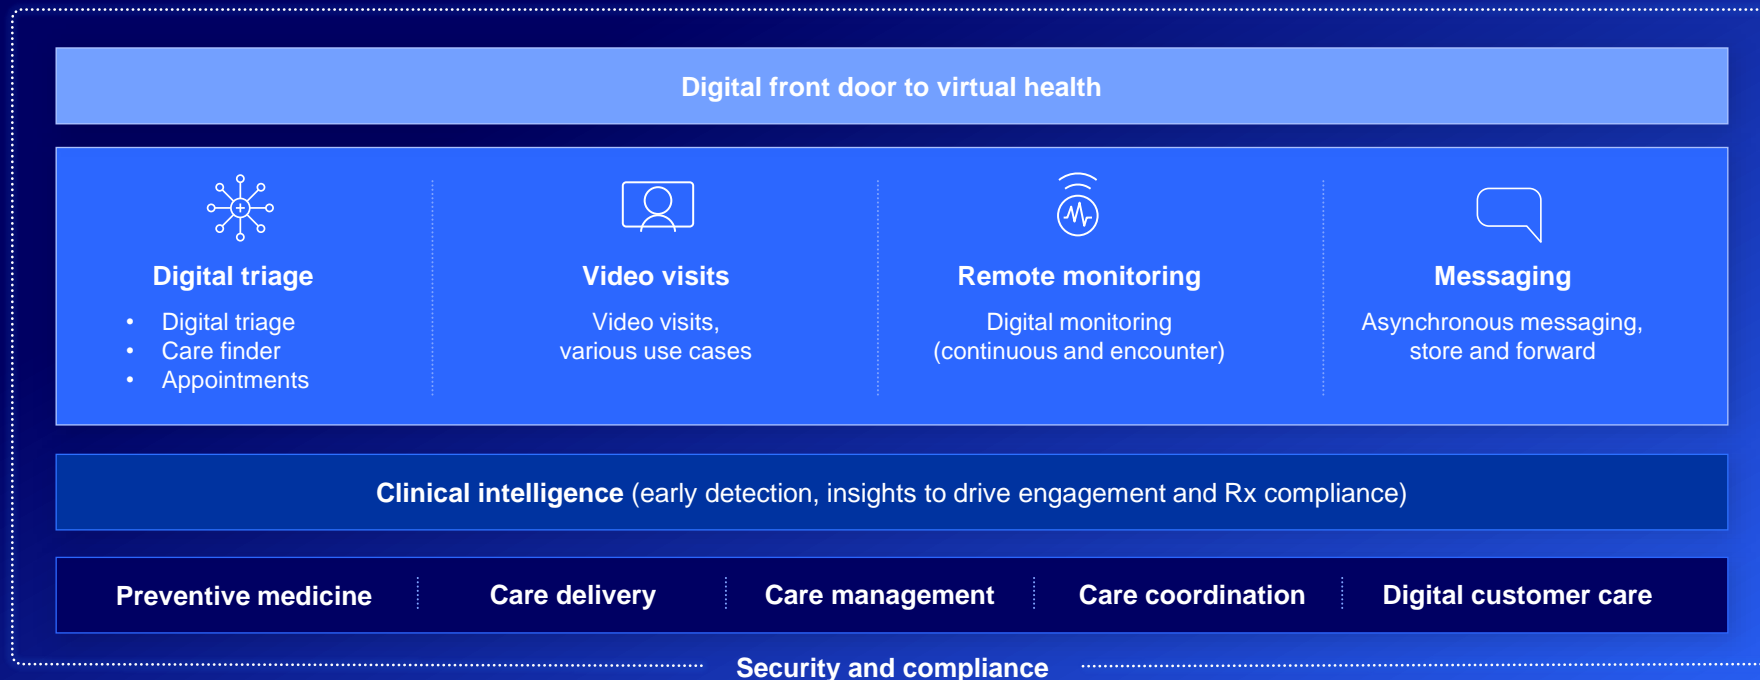

“20% of ambulatory and home health (\$246B) could have been virtualized in 2020 alone.”

Virtual Health Suite

Many virtual health components sit behind the digital front door

We provide on-going support to achieve the full potential of virtual health

Offering 2: Remote patient monitoring

Our Solution

- We created a solution that enabled pregnant women to carry on with their daily routines, while being able to keep track of vitals, activities and diet
- The IoT solution enabled physicians to get patients vital signs and critical alerts
- Physicians were able to provide remote care by communicating or taking actions via the application

Outcomes

- Hi-touch, hi-tech care enabled for high risk pregnancies
- Remote monitoring of pregnant woman enabled, ensuring health and wellbeing of the patient
- Reduced cost of care for insurance company

Offering 3: Connected solution for medical devices for home therapy & virtual wards

Our Solution

- Created a connectivity roadmap to accelerate development through IoT strategy, staff augmentation, user experience and technical expertise
- Addressed data storage challenges with PLM experts
- Designed easy to use UX, so patients can operate the device from home and transmit data from device
- Deployed RFID for capturing data into supply chain system

Outcomes

- 240 days reduced time to market
- \$1 million ROI within one year
- Improved patient experience
- Reduced device downtime

Offering 4: Transforming physician and patient engagement

Our Solution

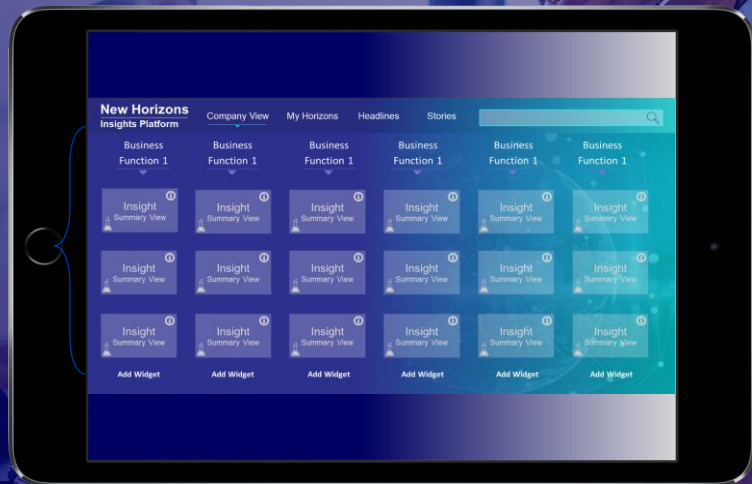

- We created an engagement platform that would offer PCPs an easy way to connect with hospital-based providers so they could exchange notes and engage hand-offs
- The platform was designed to help patients follow post-discharge orders. A call center nurse contacts the patient to answer questions, review care instructions, coordinate medicine deliveries and even organize transportation

Outcomes

For targeted congestive heart failure (CHF) population, client experienced:

- **21.5% reduction** in 30-day readmission
- **15% reduction** in no-shows

Offering 5: Insights Marketplace – Public Health Control Tower

Our Solution

An optimised actionable portal for data & insight access and visualisation that aligns with business priorities and persona-based requirements connecting to multiple data sources and federated data platforms

Outcomes

- Users interacted with the dashboard using Chatbot with Multilingual support
- On-demand access to critical business intelligence and actionable insights inspired accounting for the changing metrics
- 24/7 access to insights from any device

Offering 6: Hybrid Health Data Mesh Framework

Our Solution

A Federated Data Mesh framework that can be deployed across multiple cloud and/or on-premise data platforms with a common governance, ontology and data sharing capabilities – enabling seamless data sharing across Trusts and ICSs, agencies and departments via standardized APIs

Outcomes

- Users interacted with the dashboard using Chatbot with Multilingual support
- On-demand access to critical business intelligence and actionable insights inspired accounting for the changing metrics
- 24/7 access to insights from any device

Thank you
