

Change Management

Service description details

Change Management

Change Management as a Service comprehensively navigates organisational change complexities, leveraging proven methodologies, expert guidance, and tailored strategies. It ensures smooth transitions and transformations, maximising benefits realisation, mitigating risks, and minimising disruptions and resistance for successful implementation. Our tailored approach caters to diverse organisational needs, ensuring sustainable change outcomes.

What is the Service

According to a study published by Forbes and McKinsey around 70% of transformation initiatives fail due lack of adequate change planning and management. Several studies cite that the typical delivery focussed approached fails to consider, account for and address the human element of change, and fails to understand the intrinsically linked relationship between effective change management and maximised and successful benefits realisation.

At Methods we are committed to addressing that change deficit. We want to enable organisations to realise their strategic goals and to take their employees and customers on a positive journey of transformation.

We can help you understand your readiness for change, assess the change required and the change capabilities needed to support it (including change roles and resources) and to build an achievable plan to deliver your change. We can then help you to implement your change either through our skilled team directly or through co-delivery and knowledge transfer, before helping you to embed your change, realise the planned benefits of change and ensure you have the capabilities to sustain the change benefits.

We have consultants experienced in running a range of change initiatives both for and with the public sector. We are practical and pragmatic making sure change feels real, understandable and achievable, integrating it as part of your change delivery, blending project/programme, benefits management and change management methodologies. We take theory, but apply pragmatism, experience, neuroscience, and human-centred design.

We provide practical Change Management skills, approaches, tools and knowledge transfer, throughout your entire change lifecycle, enabling the realisation of your benefits, and maximising your return on investment. Collaborating with your teams to assess, plan, communicate, implement and embed change through people-focused change integrated with your change delivery, we help you build sustainable change capabilities.

What can it do for you

Public services are under more pressure and scrutiny than ever to provide better services more efficiently, whilst making significant savings. Managing and embedding change to fully realise your intended benefits and bringing your staff on the change journey is crucial to these challenges. Methods can support you through your entire change lifecycle, building a sustainable capability through knowledge transfer and accessible toolkits. We help you maximise the benefits of your planned changes, reducing delays, developing the behaviours and culture required to embed and sustain your change and increasing uptake of change by working with you to effectively identify, understand, plan, deliver and embed the changes required by your initiatives.

Our teams bring practical experience, advice and knowledge to help build your change capability. We collaborate with your teams to analyse, co-design, implement, enable and sustain change initiatives, building in knowledge and skills transfer as part of our core offering. Our people-centric focus, underpinned by relevant skills, tools and approaches support you to effectively engage with those affected to plan, communicate and embed the changes required by your organisation. Our practical and pragmatic approaches, based on evolving and leading change management methodologies, can be integrated into your project and/or programme management to ensure full alignment between the two.

Service Features

- 9. Accelerate change delivery using skilled, experienced resources for efficiency
- 10. Increase likelihood of change adoption with clear communication, support

Contact details

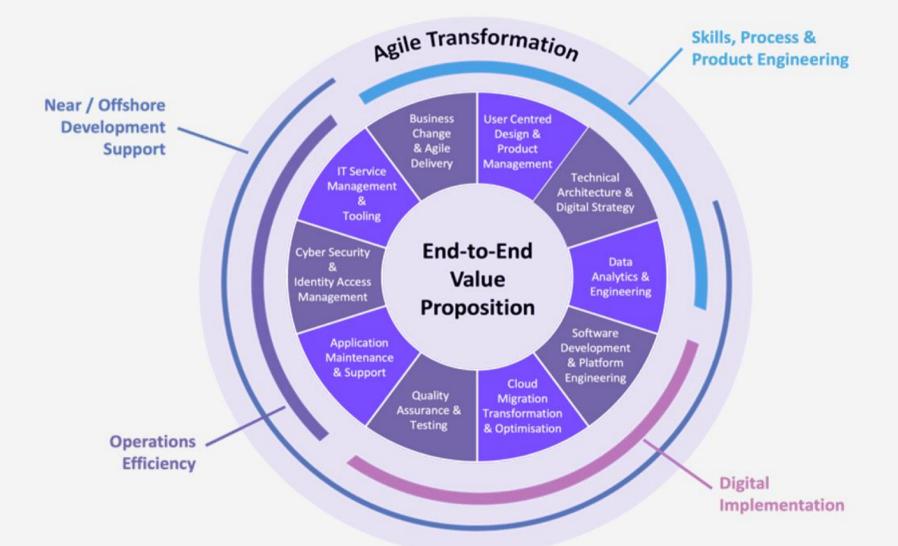

End-to-end transformation and innovation experts

Applying our skills in innovation and collaboration from across the Methods Group, to deliver end-to-end business and technical solutions that are people-centred, safe, and designed for the future.

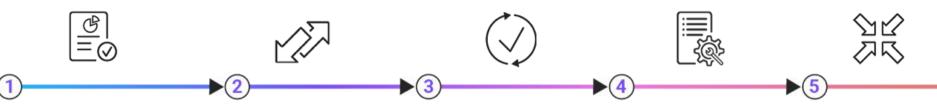

Methods provide collaborative and innovative solutions to help Central Government adapt to the changing landscape and deliver better outcomes for citizens.

With a focus on driving interoperability and innovation in UK Central Government, we have helped multiple organisations in the sector modernise their IT architecture, systems, strategy, and operating models to improve organisational resilience and service delivery.

Methods deliver wide-ranging services and thought leadership to support delivery including:

Onboarding and offboarding process

Understand Requirements

It is essential that we work with you to understand the requirement so that we provide the right resources with directly relevant experience at an appropriate level of seniority

Protect Team Availability

Having the right team on board from the start and maintaining continuity throughout the project ensures timely delivery of desired outputs

Work Synergistically and Innovatively

Drawing from our past experiences, we can frequently recommend optimal delivery methods and/ or alternative solutions which will deliver benefits (or costsavings) over time

Service Scope

Ensuring that the scope of the service to be delivered is properly quantified involves agreeing on logistics (e.g., deliverables, timelines, quality criteria, etc.) and understanding your constraints, sensitivities, and key drivers to match your expectations accurately

Review/Agree Engagement

After initial discussions and planning, you'll review and amend a draft Statement of Work(s)/Services to ensure mutual agreement and alignment of objectives before starting the assignment. We may iterate the Statement of Work(s) with you to finalise the requirements

Ordering and Invoicing

Once we have agreed a Statement of Work(s) we will sign the appropriate agreement and complete a Call Off contract with an attached Statement of Work(s), and submission of a Purchase Order. We will then set up a mutually acceptable start date and commence work.

Payment terms are 30 days or less as may be agreed.

Please note - we are unable to accept Government Procurement Card (GPC) payments.

Customer Responsibilities

For any given requirement, we will identify any dependencies on the customer (e.g. access to key stakeholders, facilities, documentation, etc.) and agree these at the start of the work.

Making a difference

The work we do each day is focused on delivering a positive difference for the public sector for the benefit of society as a whole.

Environment

We use the 'recycle, reuse, repair, refuse' approach to waste reduction to minimise landfill waste, support climate initiatives, and enhance biodiversity, creating a sustainable environment for our colleagues and community

Investment in Talent

We cultivate young talent through our GRAVITATE programme, championing vibrant apprenticeship and graduate schemes while aiding tech career exploration for individuals aged 14-24

Volunteering

We continue to support charitable causes that align with and support our values including our charity partner and VCSE initiatives

Diversifying our Supply Chains

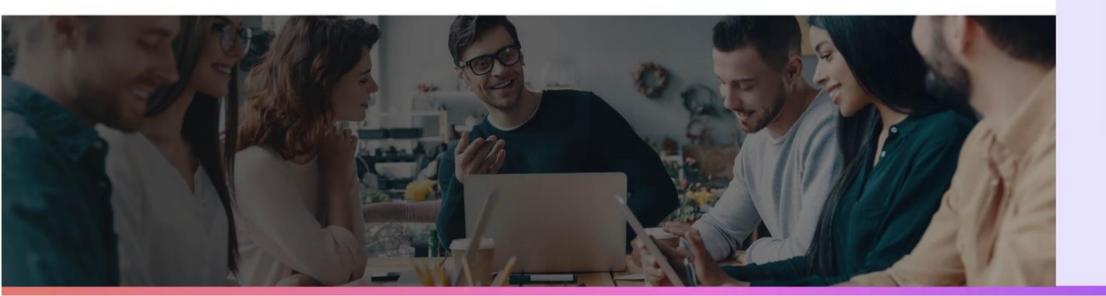

We diversify our local supply chains, promoting small business enterprise and engaging local people, SME, and micro-business suppliers

Staff Wellbeing

We offer career paths and continue to enhance our PDP processes, and maintain our commitment to the Armed Forces Covenant. Moreover, we continue to support our colleagues holistically, considering them as complete individuals at every career stage with Methods

Safeguarding Services

We continue to provide insightful thought leadership on leveraging modern technology to secure our public services for future generations. This involves speaking at industry events, educating youth on tech career paths, and offering pro-bono advice to senior policymakers

Customer stories

Stopped a Central Goverment high-severity Cyber threat in its tracks with a Threat Management solution that continuously monitors the security posture and responds to active cyber security incidents and vulnerabilities fast

Simplified 230+ service
offerings with no disruption
to live service to deliver
service management maturity
that was standardised to be
more efficient, and optimised
