Pricing structure

S117 is based on a flat cost pricing model. This model considers costs to NECS of running the tool. Third party costs currently relate to both hosting and governance support.

Cost is based on number of users per annum, exclusive of VAT (where applicable).

This cost includes:

- The cost of implementation (set up and deployment) services
- Full-service support (see Service Definition document)
- Training in the use of S117
- Hosting
- Product Manufacturer governance

Prices will increase in line with the official rate of inflation in subsequent financial years.
