

AWS FastStart

G-Cloud 14

## SERVICE OVERVIEW

Every journey into the cloud is different, and when adopting and migrating applications and services to AWS (Amazon Web Services), you want to have the confidence that what you put into the cloud is secure and governed. Telefónica Tech's experienced consultants will take you through a structured planning and building approach using our AWS Landing Zone to accelerate your deployments with visibility and security for the AWS services you need. Our Gartner-rated enablement framework and collaborative approach mean that we will partner with your organisation to envision, plan, design, and build a robust, secure, and scalable foundation in AWS, empowering your IT teams to innovate and modernise quickly and confidently.

### Key Features

- Access to industry expertise on demand, with solutions tailored to your needs.
- Design and deployment by an AWS Advanced Consulting Partner.
- Rapidly deploy a best-practice and solid AWS foundation to accelerate the adoption of cloud services.
- A fixed-price engagement model lets you control cloud-related costs from the start.
- Cost, governance, identity & access, management, and security controls are designed and deployed to meet your needs without preventing progress.

### Key Benefits

#### Real-World Experience & Expertise

Telefónica Tech's AWS-accredited experts can provide valuable insight into best-practice design and operation, using experience gained by working to help organisations across diverse markets to adopt AWS cloud services quickly, securely, and confidently.

What's more, we help your IT teams upskill quickly, making the most of their existing, valuable skills.

#### Best Practice by Design

Our AWS FastStart offering includes best-practice implementation from the beginning, giving your IT teams the tools, expertise, and support needed to migrate mission-critical applications and services to the cloud.

#### Flexible, Optimised, and Scalable

Your AWS Landing Zone will be designed to enable you to scale quickly, easily, and securely.

We apply industry-specific controls to enable you to do more faster and provide the tools and knowledge needed to ensure that you can maintain control over costs without compromising agility.

#### Hybrid-Ready Enablement

We will design and deploy your AWS Landing Zone to facilitate straightforward, rapid migration of your existing application and data workloads, regardless of where they are hosted. We will also identify the right cloud resources, specifications, and configurations to meet your needs.

#### On-ramp to Managed Services

In addition to designing and deploying your AWS Landing Zone, Telefónica Tech offers managed services for AWS so we can support your organisation's strategy from conception through to production-ready operation.

### Additional Services

Telefónica Tech provides secure digital enablement to organisations through our portfolio of managed and professional services, which span Hybrid and public Cloud, Cyber Security, Modern Workplace, Networking and connectivity, Applications, Data, and AI.
