General

This Pricing Document provides generic pricing information for the service offerings included within G-Cloud. Digital Marketplace Buyers must confirm individual service pricing and availability from their Proact Account Manager or from Proact's general point of contact at bids@proact.co.uk.

Buyers should read this pricing document in conjunction with the specific service description, terms and conditions and SLA for the service, or services, required.

Minimum Commit Charges

Minimum commit charges are according to the types, sizes, configuration, and service level of the configuration items selected by the Buyer and the feature sets selected for those configuration items.

Upon request, Proact shall work with the Buyer to size the specific requested solution and associated service in line with the Buyer's specific requirements, sizing and/or technical and/or performance criteria to provide Buyer specific minimum commit charges for the services required.

All prices are subject to any supporting notes included in the relating service definition document and those agreed in the formal quotation provided to the Buyer based on the Buyer's specific requirement.

Where individual line prices are shown there may be circumstances where they cannot be purchased other than with, or in conjunction to, another line item to form part of a functioning service.

Flexible Charges

Flexible charges according to the types, sizes, configuration, and service level of the configuration items selected by the Buyer and the feature sets selected for those configuration items.

Bespoke or Complimentary Services and Service Upgrades

The Buyer should contact their Proact Account Manager to discuss the available options.

Volume discounts

Volume discounts may be requested via the Proact Account Manager. Examples of the basis for such a request may be for a multi-organisation procurement or combinations of multiple services.

Data extraction costs

Data extraction costs may apply if the Buyer requires Proact to perform a migration away and onto any replacement platform. This would be defined before the contract with Proact commences.

What isn't included in the price

- Professional services attributed to implementation and onboarding are not included in any pricing listed. The total effort required will depend on the size of the service.

- Any costs, pricing or charges for implementation services shall be calculated in accordance with Proact's standard daily rate in whole days only.
- Proact shall be entitled to charge its higher standard daily rate (typically double) where the services are carried out either partly or in whole outside of normal business hours.
- To the extent that any services delivered by Proact under the Contract take longer to deliver than would otherwise have been the case as a consequence of the Buyer's failure to comply with any prerequisites or other requirements set out in the Contract, Proact shall be entitled to charge for such additional time at Proact's standard daily rates.

Billing Profiles

- Charge based on milestones or time & materials for set-up charges
- Monthly or quarterly in advance for Minimum commit charges
- Monthly or quarterly in arrears for Flexible charges

Other considerations

- Pricing excludes VAT.
- Public Cloud charges, where shown, are estimates only, actual charges will be based upon actual consumption in any given period. Charges have been converted from US Dollars at the conversion rate applicable at the date of this estimate. Charges for Public Cloud services will be billed in US Dollars.
- Charges are based on usage information provided and assumptions made on that basis; all of which forms part of the contractual agreement. Prolonged and significant variation in usage may require a reassessment of the charges.
- Dedicated communications links may attract increased charges.
