

CYBER ESSENTIALS PLUS

Enabling your organisation to achieve the nationally recognised Cyber Essentials Plus certification at a speed that is right for you.

CYBER SECURITY

HOW DOES THE SERVICE WORK?

We work with you to define the scope of your assessment, understanding your business requirements for achieving certification, as well as ensuring the scope aligns to the delivery objective. An expert consultant will conduct a gap analysis against the current certification standard and issue a report detailing the results of this analysis remediation advice that is bespoke to you. Once this remediation is achieved, we pass the gap analysis results to our dedicated certification partner, who completes the final checks and issues the certificate.

Achieving certifications can be a daunting process for organisations, especially if you haven't been exposed to the rigour of regulatory and legal compliance on a regular basis. We provide support from the start, until you receive your certification.

BENEFITS TO YOU

People

Providing support to you every step of the way. Achieving this nationally recognised cyber security certification demonstrates the security excellence of your team.

Technology

Evidencing how your infrastructure and security platforms are contributing to achieve your organisation's compliance objectives. Keeping your infrastructure to a recognised security level.

Commercials

Show prospective and current customers that their data is safe with your organisation, through upholding this cyber security certification. Demonstrate a continued commitment to security.

SUITABLE FOR YOU IF...

- ✓ You're looking to achieve Cyber Essentials Plus certification.
- ✓ You need bespoke advice and ongoing support.
- ✓ You're not sure how to start the process of working towards a Cyber Essentials Plus certification.
- ✓ You want your infrastructure to have a top security level.
- ✓ You need to demonstrate your commitment to security to your customers.

WORKS WELL WITH

Governance Risk and Compliance

Helping you meet regulatory obligations, address key risks, and ensure your information security strategy is aligned with your business objectives.

Penetration Testing

Helping to identify weaknesses in your IT infrastructure so you can take steps to fix vulnerabilities.

Security Baseline Assessment

Providing a 'point-in-time' look at your organisation's cyber security posture in comparison with industry best practice.
