

Softcat G-Cloud AWS Pricing

Pricing calculator

G-Cloud customers can calculate the estimated hourly or monthly costs for using AWS utilising AWS' Pricing Calculator - <https://calculator.aws/#/>

This calculator will show costs for products, example scenarios, saved estimates and provide an FAQ to support customers through the calculator.

The screenshot displays the AWS Pricing Calculator's 'Add service' interface. It features a sidebar with two steps: 'Step 1: Add service' and 'Step 2: Configure service'. The main content area is titled 'Add service' and includes a search bar for 'AWS services (142)'. Below the search bar, there are filters for 'Choose a location type' (set to 'Region') and 'Choose a Region' (set to 'Europe (London)'). A 'Find Service' search bar is also present. The interface shows a grid of service cards, including 'AWS Application Migration Service', 'Amazon API Gateway', 'Amazon AppFlow', 'Amazon AppStream 2.0', 'Amazon Athena', and 'Amazon Augmented AI'. Each card provides a brief description and a 'Configure' button. At the bottom, a cost summary is displayed: 'Upfront cost: 0.00 USD', 'Monthly cost: 0.00 USD', and 'Total 12 months cost: 0.00 USD (includes upfront cost)'. A 'View summary' button is located in the bottom right corner.

Free Pricing Options

G-Cloud customers can gain free, hands-on experience with the AWS products and services through AWS Free Tier. There are three types of Free Tier Offers

Free Trials
