

AWS SECURITY AND HEALTH ASSESSMENT

ENSURING YOUR AWS ENVIRONMENT IS SECURE AND RUNNING EFFICIENTLY BY IDENTIFYING POTENTIAL SECURITY RISKS AND SAVINGS.

Why do you need the service?

Many cloud environments are poorly configured and at risk of security breaches. It is vital to ensure your AWS environment is secure, as well as operating efficiently and cost-effectively. This allows your organisation to achieve the desired business objectives.

How does the service work?

Our AWS Solutions Architects armed with industry-leading tools work to uncover hidden areas of risk, assessing your AWS environment to understand your concerns and pain points.

We evaluate key areas of your environment to identify potential improvements and then focus on how to resolve them. This ensures that your

workloads are aligned with the AWS Well-Architected Framework best practice for cloud.

This deep dive workshop offers detailed recommendations and suggested actions to remedy these challenges, offering cost savings and a robust security stance.

How can we help?

We take time to understand your business goals alongside your areas of concern, to ensure our experts tailor an assessment to suit your organisation's requirements.

We take the strain out of the process, with technical skill and experience to pinpoint

potential cost savings and security improvements.

Our experts will then offer recommendations based on the areas of improvement discovered, ensuring you have a properly maintained and protected environment.

WHAT'S INCLUDED?

- **Thorough understanding** – We take the time to understand your security scope, focusing on quantity and size, determining areas of concern to ensure we provide the best service.
- **Deep dive workshop** – We will provide you with a 1 - hour workshop where we will look at your pain points and concerns in detail to understand your current security posture and recommendations for improvements.
- **Award-winning tools** – Equipped with powerful tools, our experts evaluate key areas of your environment, as well as an assessment on your desired environment (s) using 3rd party tooling and AWS Security Service.
- **Detailed recommendations** – With clear actions to improve your security stance and harness efficiencies, we will provide a report outlining the assessment findings in addition to any remediation advice.
- **Bespoke service** – Aligning your business objectives with the assessment so you can regain control quickly.

SUITABLE FOR YOU IF...

- You are looking to move to AWS
- You want to make the most of your cloud environment
- You are concerned about potential security breaches
- You are looking for cost savings within your AWS environment
- You need a robust plan to make efficiencies within your AWS environment
