

Cyber Threats Exposure and Risk Assessment

Empowering Your Security Decisions with Robust Cyber Security Consulting

Introduction

In the face of escalating cybersecurity threats, organizations grapple with the challenge of maintaining a strong security posture that enables high-speed business operations. One significant barrier to fully unleashing their security potential is understanding and controlling their cyber risk.

That is where Check Point Consulting Services steps in. We understand these challenges from the inside out and can help you overcome them with our Cyber Threats Exposure and Risk Assessment.

We can help you understand -

What is your attack-surface?

What is your risk level?

Are you compliant with new regulations?

And are you properly prioritizing budget and resources?

Check Point Consulting is empowering CISOs and security team managers to achieve and sustain a resilient security posture.

Strategic Cyber Consulting Benefits

A proactive approach to enhance your current security and safeguarding of critical data and systems. Significant reduction in the likelihood and impact of potential security incidents.

Proactive Risk Assessment and Threat Mitigation:

- Identifying and assessing potential vulnerabilities and risks within an organization's digital infrastructure.
- Validate security controls and run a security architecture zero trust maturity review.
- Run penetration tests to measure security readiness and business impact, proactively pinpoint security gaps and weaknesses, and enable businesses to address threats before they materialize.

Boost Trust through Compliance:

- Stay compliant with relevant regulatory standards (NIS2, DORA) and frameworks like ISO, NIST, CIS, and other industry benchmarks.
- Demonstrate your commitment to cybersecurity, thereby building trust with clients, stakeholders, and regulatory bodies.
- Avoid penalties and legal complications and enhance your company's reputation as a secure and reliable entity.

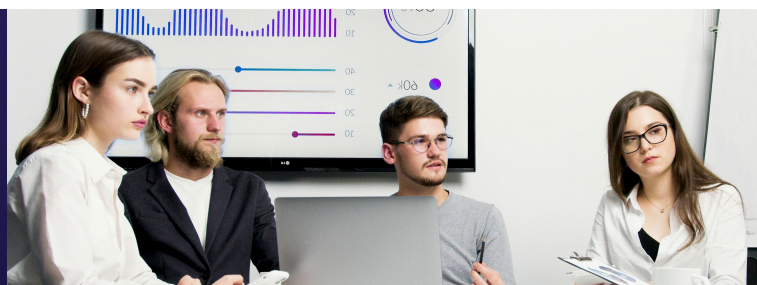

Strategic Advisory for Long-Term Cyber Resilience:

- Strategic advisory that provides security insights and tailored recommendations for strengthening the overall security posture.
- Blueprint for adopting advanced security architectures and implementing cybersecurity best practices that enable you to keep up with the evolving threat landscape.
- Empowering security and IT leadership with informed decision-making capabilities and ensuring the organization's cyber resilience for the long run.

The process

Scoping	Assessment	Analysis	Reporting
4-6 weeks before the engagement	1-3 days on-site	2-4 weeks	1 day
Understand requirements and create scope of work, agenda and list.	Data gathering, interviews, white boarding and review.	Data analysis, findings review and recommendations.	Report delivery with findings analysis and remediation.

Our Core Services

Cyber Risk Assessment

Security Controls Gap Analysis

Attack Surface Review and Penetration Testing

Cloud Cyber Security Assessment

Ransomware Protection Readiness

Compliance Readiness Service

Threat Intelligence and Brand Reputation

Security Architecture Review and Recommendations

Cyber Security Advisory and CISO Consulting

Methodology

Our Cyber Consulting Services are designed to address the evolving landscape of cyber threats, providing tailored solutions that align with industry-leading frameworks such as NIST CSF/800-53, CIS v8, Zero Trust, Cloud Security Maturity Model (CSMM) and Cloud Controls Matrix (CCM), SABSA and more.

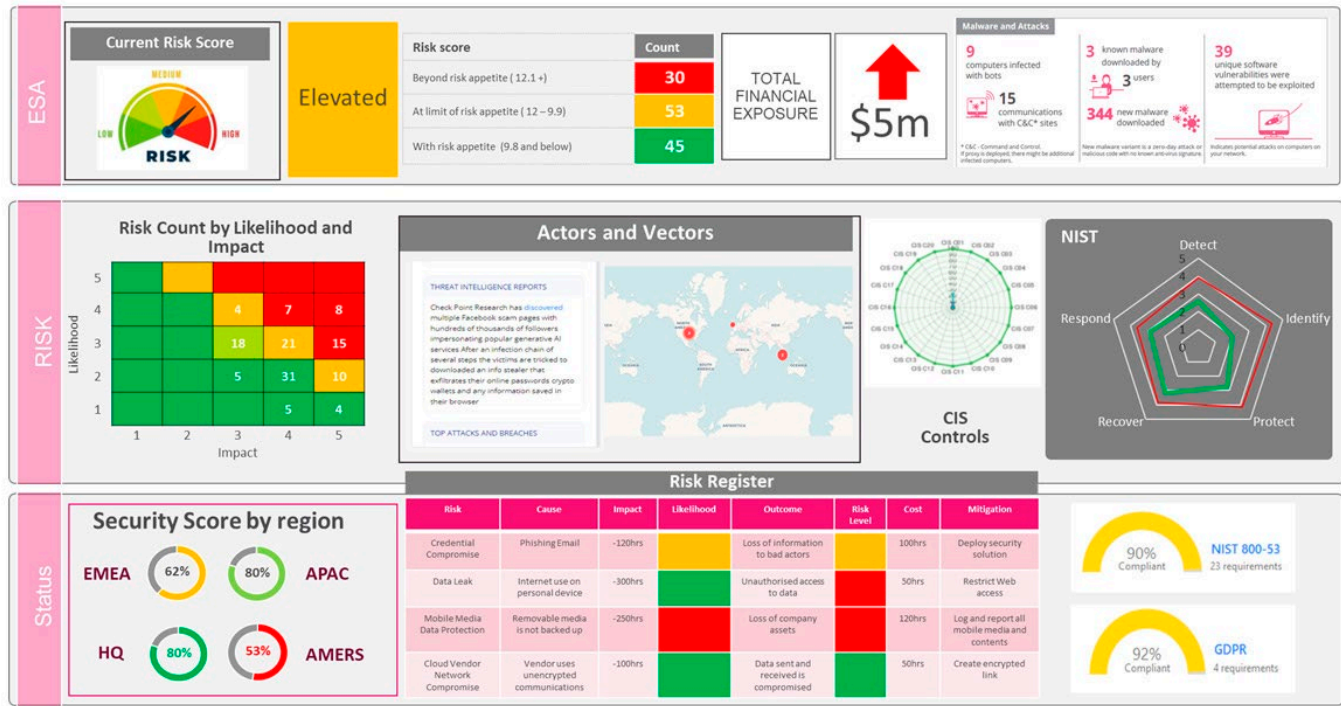

We have also developed a unique Check Point enterprise security framework ([CESFv2](#)), which provides our clients with an end-to-end practical approach to cyber security strategic planning and implementation.

Transform Your Cybersecurity Strategy

with Our Executive Assessment Dashboard

In today's complex cyber landscape, staying ahead of threats requires not just robust security measures but also strategic oversight and decision-making.

Introducing our cutting-edge Cyber Security Assessment Service, now delivered through an intuitive Executive Assessment Dashboard. Tailored for leaders who demand clarity and actionable insights, our service offers a comprehensive view of your organization's security posture.

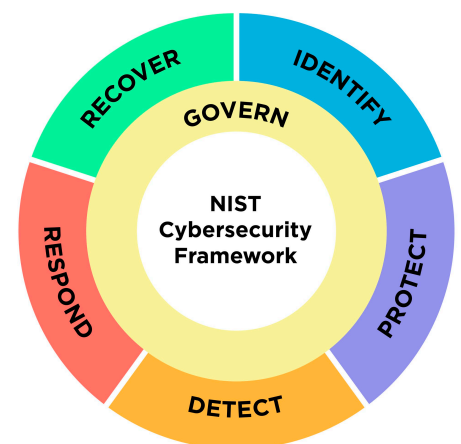

Experience the power of informed decision-making with our dashboard's real-time analytics and visually engaging reports. Leveraging the latest in cybersecurity intelligence, our assessments are meticulously aligned with top-tier frameworks such as NIST and CIS, and ensure not just compliance but a proactive stance against evolving threats. From identifying vulnerabilities to recommending strategic improvements, our dashboard presents critical data in an accessible, executive-friendly format.

Partnering for a Secure Future

Customized Service tailored to meet your unique business needs.

Expert consultants who bring years of industry experience and knowledge.

Ongoing Support through continued guidance to adapt to the evolving cyber landscape.
