SECURITY BASELINE ASSESSMENT

Providing a 'point-in-time' look at your organisation's cyber security posture in comparison with industry best practice.

HOW DOES THE SERVICE WORK?

Our experts will run an assessment of your existing internal controls, while externally assessing the posture of your organisation. This allows our consultants to understand your organisation's current exposure to cyber risk and suggest routes for improvement.

We identify internal and external risk profiles; provide a tailored report through our assessment portal with simple steps to help you improve security maturity; and build a plan that's tailored to your organisation, aligned with your business objectives. You can view your results and scoring on a single, easy-to-use dashboard, enabling you to quickly understand your current levels of security.

It's important to understand your current exposure to cyber risk in order to keep your organisation as secure as possible. Security risks continuously change as new services are launched, and a Security Baseline Assessment allows you to see what you're doing well and where improvements can be made quickly.

BENEFITS TO YOU

People

The service provides a point-in-time view of any resource constraints affecting your cyber security posture. We help you understand your current exposure, allowing you to take steps to protect your infrastructure and workforce.

Technology

We identify security controls and steps to improve your security posture with existing cyber platforms, offering a plan to protect your infrastructure.

Commercials

Our recommendations will help you to focus investments strategically to improve your security posture, minimising your reputational and financial risk. We offer fixed-price engagements, so you're assured of the cost.

SUITABLE FOR YOU IF...

✓ You're looking for a thorough assessment of your existing internal controls.

✓ You want tailored reporting that's easy to understand.

✓ You need a comprehensive external assessment of the posture of your organisation.

✓ You're looking for reassurance from cyber security experts.

✓ You're interested in how your organisation compares with cyber security industry best practice.

WORKS WELL WITH

Breach Assessment Service

Helping you understand the potential impact of a range of cyber-attacks, allowing you to strengthen your security architecture.

Governance, Risk and Compliance

Helping you meet regulatory obligations, address key risks, and ensure your information security strategy is aligned with your business objectives.

Managed SIEM Service

Reducing cyber risk by monitoring for, and detecting, security threats – enabling you to respond quickly, with guidance from cyber analysts.

WHAT'S INCLUDED

Tailored support – We provide expert consultants who take time to understand your security setup.

Recognised standards – Using an internationally recognised model, we offer reassurance that you're being assessed to universally accepted standards.
