

What We Do

AtkinsRéalis consultants work alongside organisations to provide digital Programme Management Offices (PMOs) with services optimised for smarter programme delivery of Cloud adoption, migration, and Cloud service improvements. Our PMOs are tailored to the specific challenges of Cloud, providing PMO services focussed on flexibility, scalability and innovation, fast deployment, and responsive cost management to support realising the benefits of Cloud transformation. Our digital PMOs provide performance data where availability, trustworthiness, and accountability are central, and the organisation can rely on the data they are analysing and using to drive decisions.

Our PMOs for Cloud use leading data management approaches to form the foundation of a data driven PM organisation. We support the need for flexibility, scalability, and innovation using data environments built for simplicity, prioritising collaboration over integration to minimise pipeline engineering, and fast deployment through Agile delivery. We use Many

Truthful Slices to boost value, enhance flexibility, and optimise re-use, and data products created and managed by those who best know the data using their familiar tools. Our data democratisation approach makes data available for self-service, re-use, or adaptation. We combined vendor solutions and an Agile data product operating model to create an environment where trustworthy advanced analytics can flourish.

AtkinsRéalis PMOs for Cloud provide adaptive cost management services optimised for pay- as- you- go Cloud pricing models and resource allocation, with clear governance to support responsibility for security and compliance shared with Cloud providers.

Why us?

AtkinsRéalis has deep PMO expertise in multiple industry domains across portfolios, programmes, and projects combined with enterprise data management for advanced analytics. We have extensive experience designing, implementing, operating, and optimising digital PMOs across UK Government departments, aligned with the Project Delivery Profession and Infrastructure and Projects Authority (IPA) guidance.

AtkinsRealis PMOs for Cloud are founded on best practice approaches and delivery frameworks such as LeSS (Large Scale Scrum), Scrum@Scale and SAFe (the Scaled Agile Framework), DSDM (Dynamic Systems Development Methodology), Lean (SixSigma), P30 (methodology for design and operation of PMOs), MoR (Management of Risk), PRINCE2 and MSP (Managing Successful Programmes). Our PMOs are delivered by experienced PMO professionals qualified to industry standards ChPP (Chartered Project Professional) and FAPM (Fellow of the Association of Project Management).
