A Safe Workplace User is defined as any User with the right to access the included applications in any way or Users receiving services supported within a Safe Workplace included application. This includes, but is not limited to, the following: make requests through a portal or mobile application, receive, and respond to surveys, request, or receive PPE, receive a health screen, or receive any other services managed by the included applications. Visitors that do not meet the definition of User are not included in the Safe Workplace User count and are not subject to Safe Workplace Subscription Product fees.</p> <p>Performance Analytics: Use rights apply only to Safe Workplace Applications and included Bundled Custom Tables.</p> <p>Bundled Custom Tables: Customer is granted the right to create or install up to 5 Custom Tables and to grant each Safe Workplace User the right to access those Custom Tables.</p> <p>The following application(s) became available according to the release indicated below.</p> <p>Madrid - Employee Readiness Surveys; Employee Health Screening; Workplace PPE Inventory Management; Workplace Safety Management</p>

#### Workplace Service Delivery (WSD)

PROD16885	Workplace Service Delivery - Unrestricted User v3	Unrestricted User	£6.40	<p>Included Applications: Workplace Case Management; Workplace Space Mapping; Workplace Space Management; Workplace Reservation; Workplace Safety Management; Workplace Visitor Management; Employee Readiness Surveys; Employee Health Screening; Workplace PPE Inventory Management; Contact Tracing; Employee Travel Safety; Health and Safety Testing; Vaccination Status; Predictive Intelligence; Virtual Agent; and Performance Analytics</p> <p>Usage of Workplace Service Delivery is limited by the number of purchased Unrestricted Users. An Unrestricted User is every User that is assigned a unique username and has a user profile in the Subscription Service designated as active.</p> <p>Predictive Intelligence; Virtual Agent; and Performance Analytics: Use rights apply only to Workplace Service Delivery Applications and included App Engine Starter Custom Tables.</p> <p>App Engine Starter 5: Customer is granted the right to create or install up to 5 Custom Tables and to grant each Unrestricted User the right to access those Custom Tables.</p>
PROD16884	Workplace Service Delivery - Workplace User v4	Workplace User	£6.40	<p>Included Applications: Workplace Case Management; Workplace Space Mapping; Workplace Space Management; Workplace Reservation; Workplace Safety Management; Workplace Visitor Management; Employee Readiness Surveys; Employee Health Screening; Workplace PPE Inventory Management; Contact Tracing; Employee Travel Safety; Health and Safety Testing; Vaccination Status; Predictive Intelligence; Virtual Agent; and Performance Analytics</p> <p>Usage is limited to the number of Workplace Users. A Workplace User is defined as any User with the right to access one or more of the Workplace Service Delivery Applications above. A Workplace User may perform any or all functions within the Workplace Service Delivery Applications.</p> <p>Predictive Intelligence; Virtual Agent; and Performance Analytics: Use rights apply only to Workplace Service Delivery Applications and included App Engine Starter Custom Tables.</p> <p>App Engine Starter 5: Customer is granted the right to create or install up to 5 Custom Tables and to grant each Workplace User the right to access those Custom Tables.</p>

Product Code	Full Name (Internal Version)	License Model	Base Price GBP	Product Description
<b>MetricBase</b>				
PROD15352	MetricBase Starter - Series	Series	£9,600.00	<p>MetricBase includes entitlement to 100,000 series stored on the MetricBase server.</p> <p>A MetricBase series is a set of data points for a metric indexed in a time order and stored for a defined retention policy.</p>
PROD15353	Metric Base – additional 50,000 Series - Series	Series	£1,380.00	<p>MetricBase includes entitlement to 50,000 series stored on the MetricBase server.</p> <p>A MetricBase series is a set of data points for a metric indexed in a time order and stored for a defined retention policy.</p>
PROD15356	Metric Base – additional 100,000 Series - Series	Series	£2,400.00	<p>MetricBase includes entitlement to 100,000 series stored on the MetricBase server.</p> <p>A MetricBase series is a set of data points for a metric indexed in a time order and stored for a defined retention policy.</p>
PROD15355	Metric Base – additional 250,000 Series - Series	Series	£5,200.00	<p>MetricBase includes entitlement to 250,000 series stored on the MetricBase server.</p> <p>A MetricBase series is a set of data points for a metric indexed in a time order and stored for a defined retention policy.</p>
<b>Automation Engine and Integration Hub</b>				
PROD17159	Automation Engine Professional – Unattended Robot	Unattended Robot	£8,333.34	<p>Included Application(s): RPA Hub; Integration Hub Professional; Orchestration Core; Activity Designer; Activity Packs; entitlement for up to 5 Unattended Robots; entitlement for 15 Attended Robots; and entitlement for 3,000,000 Integration Hub Transactions annually (unused Transactions expire annually without credit or refund). Automation Engine Professional includes Protocols and Spokes as set forth in the Integration Hub Overview on <a href="http://www.servicenow.com/upgrade-schedules.html">www.servicenow.com/upgrade-schedules.html</a>, which IS EXPRESSLY DEEMED INCORPORATED HEREIN BY THIS REFERENCE. Customer may request printed copies of the documents incorporated herein by reference by emailing us.</p> <p>An Unattended Robot is defined as a form of business process automation that allows the execution of workflows without human supervision through the development and management capabilities offered by Automation Engine. Unattended Robot entitlements are consumed when a robot of type Unattended is assigned to a Virtual Machine in the RPA Hub Application.</p> <p>An Attended Robot is defined as a form of business process automation that allows the execution of workflows as a direct result of a human action and under human supervision. Attended Robot entitlements are consumed when a robot of type Attended is assigned to a user in the RPA Hub application.</p> <p>Additional Attended Robots and Unattended Robots require the purchase of a separate Attended Robot bundle and/or Unattended Robot bundle.</p> <p>An Integration Hub Transaction is an external call originating from, initiated by (including record updates triggering a business rule), or part of a flow or workflow.</p> <p>Additional annual Transactions require the purchase of a separate Integration Hub bundle.</p>

PROD17160	Automation Engine Enterprise – Unattended Robot	Unattended Robot	£16,666.66	<p>Included Application(s): RPA Hub; Integration Hub Enterprise; Orchestration Core (Activity Designer; Activity Packs; Password Reset; and Client Software Distribution Application); entitlement for 15 Unattended Robots; entitlement for 45 Attended Robots; and entitlement for up to 6,000,000 Integration Hub Transactions annually (unused Transactions expire annually without credit or refund). Automation Engine Enterprise includes Protocols and Spokes as set forth in the Integration Hub Overview on <a href="http://www.servicenow.com/upgrade-schedules.html">www.servicenow.com/upgrade-schedules.html</a> and IS EXPRESSLY DEEMED INCORPORATED HEREIN BY THIS REFERENCE. Customer may request printed copies of the documents incorporated herein by reference by emailing us.</p> <p>An Unattended Robot is defined as a form of business process automation that allows the execution of workflows without human supervision through the development and management capabilities offered by Automation Engine. Unattended Robot entitlements are consumed when a robot of type Unattended is assigned to a Virtual Machine in the RPA Hub Application. An Attended Robot is defined as a form of business process automation that allows the execution of workflows as a direct result of a human action and under human supervision. Attended Robot entitlements are consumed when a robot of type Attended is assigned to a user in the RPA Hub application. Additional Attended Robots and Unattended Robots require the purchase of a separate Attended Robot bundle and/or Unattended Robot bundle.</p> <p>An Integration Hub Transaction is an external call originating from, initiated by (including record updates triggering a business rule), or part of a flow or workflow.</p> <p>Additional annual Transactions require the purchase of a separate Integration Hub package.</p>
PROD11415	IntegrationHub Starter - Transactions	Transactions	£0.00	<p>IntegrationHub Starter includes entitlement for up to 1,000,000 IntegrationHub Transactions annually (unused Transactions expire annually).</p> <p>IntegrationHub Starter includes Protocols and Spokes as set forth in the IntegrationHub Overview on <a href="http://www.servicenow.com/upgrade-schedules.html">www.servicenow.com/upgrade-schedules.html</a> and ARE EXPRESSLY DEEMED INCORPORATED HEREIN BY THIS REFERENCE. Customer may request printed copies of the documents incorporated herein by reference by emailing us.</p> <p>An IntegrationHub Transaction is defined as any external call originating from, initiated by, or part of, a flow within Flow Designer.</p> <p>Additional annual Transactions require the purchase of a separate IntegrationHub package.</p>
PROD17161	Automation Engine RPA Hub Bundle - 5 Unattended Robots	Unattended Robot	£1,666.66	<p>Unattended Robot Bundle- 5 Unattended Robots includes entitlement for up to 5 Unattended Robots annually.</p> <p>An Unattended Robot is defined as a form of business process automation that allows the execution of workflows without human supervision through the development and management capabilities offered by Automation Engine. Unattended Robot entitlements are consumed when a robot of type “Unattended” is assigned to a Virtual Machine in RPA Hub Application.</p>
PROD17162	Automation Engine RPA Hub Bundle - 15 Attended Robots	Attended Robot	£1,666.66	<p>Attended Bundle - 15 Attended Robots includes entitlement for up to 15 Attended Robots annually.</p> <p>An Attended Robot is defined as a form of business process automation that allows the execution of workflows as a direct result of a human action and under human supervision. Attended Robot entitlements are consumed when a robot of type “Attended” is assigned to a user in the RPA Hub application.</p>
PROD17167	Automation Engine Bundle - 100 Million Integration Hub Transactions - Transaction Pack	Transaction Pack	£12,000.00	<p>Automation Engine Bundle - 100 Million Integration Hub Transactions includes entitlement for up to 100,000,000 Integration Hub Transactions annually (unused Transactions expire annually without credit or refund).</p> <p>An Integration Hub Transaction is an external call originating from, initiated by (including record updates triggering a business rule), or part of a flow or workflow.</p>
PROD17166	Automation Engine Bundle - 50 Million Integration Hub Transactions - Transaction Pack	Transaction Pack	£8,000.00	<p>Automation Engine Bundle - 50 Million Integration Hub Transactions includes entitlement for up to 50,000,000 Integration Hub Transactions annually (unused Transactions expire annually).</p> <p>An Integration Hub Transaction is an external call originating from, initiated by (including record updates triggering a business rule), or part of a flow or workflow.</p>

PROD17165	Automation Engine Bundle - 10 Million Integration Hub Transactions - Transaction Pack	Transaction Pack	£4,000.00	Automation Engine Bundle - 10 Million Integration Hub Transactions includes entitlement for up to 10,000,000 Integration Hub Transactions annually (unused Transactions expire annually without credit or refund). An Integration Hub Transaction is an external call originating from, initiated by (including record updates triggering a business rule), or part of a flow or workflow.
PROD17164	Automation Engine Bundle - 1 Million Integration Hub Transactions - Transaction Pack	Transaction Pack	£2,400.00	Automation Engine Bundle - 1 Million Integration Hub Transactions includes entitlement for up to 1,000,000 Integration Hub Transactions annually (unused Transactions expire annually without credit or refund). An Integration Hub Transaction is an external call originating from, initiated by (including record updates triggering a business rule), or part of a flow or workflow.
PROD11780	Password Reset Limited - Transaction Pack	Transaction Pack	£1,600.00	Included Application: Password Reset Password Reset Limited includes entitlement for up to 12,000 Password Reset Transactions annually (unused Password Reset Transactions expire annually). A Password Reset Transaction is an integration call that originates from the Password Reset Application.
<b>Mobile Publishing</b>				
PROD15406	Mobile Publishing - Application	None	£3,333.33	Customer branding and mobile security SDKs for ServiceNow mobile applications.
<b>AI Search</b>				
PROD15338	AI Search Starter	Documents	£0.00	AI Search Starter includes entitlement to search and index up to 500,000 external Documents for a 12-month period (unused external Documents expire after a 12-month period). A Document is any item with a unique identifying field associated to it. Additional Document search and index capacity requires the purchase of an AI Search Document pack.
PROD15339	AI Search 1 Million Documents - Document Pack	Document Pack	£1,333.34	AI Search 1 Million Documents includes entitlement to search and index up to 1,000,000 external documents for a 12-month period (unused external documents expire after a 12-month period). A document is any item with a unique identifying field associated to it.
PROD15340	AI Search 5 Million Documents - Document Pack	Document Pack	£4,666.66	AI Search 5 Million Documents includes entitlement to search and index up to 5,000,000 external Documents for a 12-month period (unused external Documents expire after a 12-month period). A Document is any item with a unique identifying field associated to it.
PROD15341	AI Search 10 Million Documents - Document Pack	Document Pack	£13,333.34	AI Search 10 Million Documents includes entitlement to search and index up to 10,000,000 external Documents for a 12-month period (unused external Documents expire after a 12-month period). A Document is any item with a unique identifying field associated to it.
<b>App Engine</b>				
PROD13074	App Engine - Fulfiller	Fulfiller User	£120.00	Included Applications: App Engine Studio; Mobile Publishing; Performance Analytics; Virtual Agent; Universal Request Pro and Predictive Intelligence  App Engine provides the Customer with the right to deploy Custom Tables in a production instance.  Each Fulfiller User has the right to access an unlimited number of Custom Tables to perform the actions of a Fulfiller User.  Notwithstanding the definition of Fulfiller User above, an External App Engine Requester is defined as Customer external contacts, including, but not limited to Customer's accounts, consumers, households, partners or other contacts. Customer may grant External App Engine Requesters the right to access App Engine as Requester Users. External App Engine Requesters are not included in the App Engine Fulfiller User count and are not subject to App Engine Subscription Product fees.  Performance Analytics, Virtual Agent and Predictive Intelligence use rights apply only to App Engine.

PROD13076	App Engine - Unrestricted User	Unrestricted User	£16.00	<p>Included Applications: App Engine Studio; Mobile Publishing; Performance Analytics; Virtual Agent; Universal Request Pro and Predictive Intelligence</p> <p>App Engine provides the Customer with the right to deploy Custom Tables in a production instance.</p> <p>Each Unrestricted User has the right to access an unlimited number of Custom Tables and perform any or all functions within these Custom Tables. For the avoidance of doubt, additional use rights are required for subscribed usage of any ServiceNow created application.</p> <p>Notwithstanding the definition of Unrestricted User above, an External App Engine Requester is defined as Customer external contacts, including, but not limited to Customer's accounts, consumers, households, partners, or other contacts. Customer may grant External App Engine Requesters the right to access App Engine as Requester Users. External App Engine Requesters are not included in the App Engine Unrestricted User count and are not subject to App Engine Subscription Product fees.</p> <p>Performance Analytics, Virtual Agent and Predictive Intelligence use rights apply only to App Engine.</p>
PROD13079	App Engine for IT Service Management - Module	Module	20% of IT Svc Mgmt + Bus Stakehldr ACV	<p>Bundled Custom Tables: Customer is granted the right to create or install an unlimited number of Custom Tables and to grant each separately subscribed IT Service Management (ITSM) Fulfiller User the right to access those Custom Tables.</p> <p>The annual subscription fee for Now Platform App Engine for IT Service Management ("App Engine Subscription Fee") is based on the total of the annual subscription fees of ITSM products subscribed to by Customer. As Customer exceeds capacity of purchased ITSM Fulfillers, or if Customer purchases additional ITSM Fulfillers, additional App Engine Subscription Fees shall apply.</p>

#### Procurement Service Management

PROD16928	Procurement Service Management - Procurement User	Procurement User	£16.00	<p>Included Applications: Procurement Case Management; Shopping Hub; Purchase and Receipt Automation; Virtual Agent; and Performance Analytics.</p> <p>Usage is limited to the number of Procurement Users. A Procurement User is defined as any User with the right to access one or more of the Procurement Service Management Applications above. A Procurement User may perform any or all functions within the Procurement Service Management Applications.</p> <p>Virtual Agent includes 1000 Virtual Agent Conversation Transactions per Procurement User per month (unused Virtual Agent Conversation Transactions expire monthly). A Virtual Agent Conversation Transaction is defined as any structured conversation between a chatbot and user on a pre-built or custom topic.</p> <p>Additional monthly Virtual Agent Transactions require the purchase of Virtual Agent Transaction Pack(s).</p> <p>Virtual Agent and Performance Analytics: Use rights apply only to Procurement Service Management Applications and included App Engine Starter Custom Tables.</p> <p>App Engine Starter 5: Customer is granted the right to create or install up to 5 Custom Tables and to grant each Procurement User the right to access those Custom Tables.</p>
PROD16930	Procurement Service Management - Unrestricted User	Unrestricted User	£4.80	<p>Included Applications: Procurement Case Management; Shopping Hub; Purchase and Receipt Automation; Virtual Agent; and Performance Analytics.</p> <p>Usage of Procurement Service Management is limited by the number of purchased Unrestricted Users. An Unrestricted User is every User that is assigned a unique username and has a user profile in the Subscription Service designated as "active". An Unrestricted User may perform any or all functions within the Procurement Service Management Applications.</p> <p>Virtual Agent and Performance Analytics: Use rights apply only to Procurement Service Management Applications and included App Engine Starter Custom Tables.</p> <p>App Engine Starter 5: Customer is granted the right to create or install up to 5 Custom Tables and to grant each Procurement User the right to access those Custom Tables.</p>

#### Performance Analytics

PROD01623	Performance Analytics For Security Operations - Application	Application	20% of ACV for contributing products	<p>Performance Analytics For Security Operations.</p> <p>Performance Analytics use rights apply to Security Operations, Business Management and Governance, Risk and Compliance applications ("Security Operations Subscription Products").</p> <p>The annual subscription fee for Performance Analytics ("PA Subscription Fee") is based on the total of the annual subscription fees of Security Operations Subscription Products subscribed to by Customer. As Customer exceeds capacity of purchased Security Operations Subscription Products, or if Customer purchases additional Security Operations Subscription Products, additional PA Subscription Fees shall apply.</p>
PROD01624	Performance Analytics For Customer Service Management - Application	Application	20% of ACV for contributing products	<p>Performance Analytics For Customer Service Management.</p> <p>Any User may use Performance Analytics with a Customer Service Management application for which he or she has use rights.</p> <p>The annual subscription fee for Performance Analytics ("PA Subscription Fee") is based on the total of the annual subscription fees of Customer Service Management offers subscribed to by Customer. As Customer exceeds capacity of purchased Customer Service Management Users, or if Customer purchases additional Customer Service Management Users, additional PA Subscription Fees shall apply.</p>
PROD01627	Performance Analytics - Enterprise - Application	Application	20% of ACV of contributing products	<p>Performance Analytics - Enterprise.</p> <p>Performance Analytics use rights apply to all Subscription Products.</p> <p>The annual subscription fee for Performance Analytics ("PA Subscription Fee") is based on the total of the annual subscription fees of all Subscription Products subscribed to by Customer. As Customer exceeds capacity of purchased Subscription Products, or if Customer purchases additional Subscription Products, additional PA Subscription Fees shall apply.</p>
PROD12788	Performance Analytics For IT Operations Management (NY) - Application	Application	20% of ACV of contributing products	<p>Performance Analytics For IT Operations Management.</p> <p>Performance Analytics use rights apply to ITOM Visibility, ITOM Health, and ITOM Optimization ("ITOM Subscription Products").</p> <p>The annual subscription fee for Performance Analytics ("PA Subscription Fee") is based on the total of the annual subscription fees of ITOM Subscription Products subscribed to by Customer. As Customer exceeds capacity of purchased ITOM Subscription Products, or if Customer purchases additional ITOM Subscription Products, additional PA Subscription Fees shall apply.</p>
PROD02229	Performance Analytics For IT Business Management - Application	Application	20% of ACV of contributing products	<p>Performance Analytics For IT Business Management.</p> <p>Any User may use Performance Analytics with an IT Business Management application for which he or she has use rights.</p> <p>The annual subscription fee for Performance Analytics ("PA Subscription Fee") is based on the total of the annual subscription fees of IT Business Management Subscription Products subscribed to by Customer. As Customer exceeds capacity of purchased IT Business Management Users, or if Customer purchases additional IT Business Management Users, additional PA Subscription Fees shall apply.</p>
PROD03426	Performance Analytics For IT Service Management - Application	Application	20% of ACV of contributing products	<p>Performance Analytics For IT Service Management</p> <p>Any User may use Performance Analytics with IT Service Management for which he or she has use rights.</p> <p>The annual subscription fee for Performance Analytics ("PA Subscription Fee") is based on the total of the annual subscription fees of IT Service Management subscribed by Customer. As Customer exceeds capacity of purchased users or purchases additional users of IT Service Management, additional PA Subscription Fees shall apply.</p>

PROD03427	Performance Analytics For Governance, Risk and Compliance - Application	Application	20% of ACV of contributing products	<p>Performance Analytics For Governance, Risk and Compliance</p> <p>Any User may use Performance Analytics with Governance, Risk and Compliance application for which he or she has use rights.</p> <p>The annual subscription fee for Performance Analytics ("PA Subscription Fee") is based on the total of the annual subscription fees of Governance, Risk and Compliance subscribed by Customer. As Customer exceeds capacity of purchased users or purchases additional users of Governance, Risk and Compliance, additional PA Subscription Fees shall apply.</p>
PROD03432	Performance Analytics For Field Service Management - Application	Application	20% of ACV for contributing products	<p>Performance Analytics For Field Service Management</p> <p>Any User may use Performance Analytics with Field Service Management for which he or she has use rights.</p> <p>The annual subscription fee for Performance Analytics ("PA Subscription Fee") is based on the total of the annual subscription fees of Field Service Management subscribed by Customer. As Customer exceeds capacity of purchased users or purchases additional users of Field Service Management, additional PA Subscription Fees shall apply.</p>

## PRODUCT OVERVIEW

ServiceNow Applications	
Activity Designer	Provides capabilities to construct reusable Workflow activities based on an organization's business needs.
Activity Packs	A collection of related orchestration activities in a scoped application that allow Orchestration Core to connect to, and automate work with, external systems from Workflow. Customers have the ability to create their own Activity Packs with the Activity Designer.
Agent Intelligence	Provides the capability to use supervised machine learning to train solutions with Customer's historic ServiceNow data to predict an outcome, such as a field value in a record.
Agile Development	Provides capabilities to manage the software development process including story definition, backlog management, sprint planning, test planning, enhancement requests, defect prioritization and definition of release content.
Application Portfolio Management	Provides capabilities for organizations to inventory and manage application portfolios in a single central location, capturing relevant information such as costs, risk, projects, lifecycle dates, ownership, and health assessments. This inventory facilitates the identification of business benefits of each application and helps organizations make informed decisions on reducing costs, improving agility, and facilitating business alignment with the IT application portfolio.
Asset Management	Provides capabilities to track and manage the physical, contractual, and financial aspects of assets.
Audit Management	Provides a centralized process for internal audit teams to automate the complete audit lifecycle by providing the capability to plan, scope, and execute integrated, risk-based audit plans.
Basic Case Management	In support of HR Service Delivery, provides capability to log general inquiries between an employee and the HR service center.
Case and Knowledge Management (Formerly: HR Service Management)	In support of HR Service Delivery, provides capabilities to document and manage interactions between employees and HR. Also allows for the fulfillment of advanced case requests across various HR centers of excellence, supported by an HR Knowledge Base.
Change Management	Allows repeatable methods and procedures to be used for introducing change into the IT infrastructure by providing capabilities for creating, assessing, approving, and executing changes.

Client Software Distribution	<p>Allows administrators to automate the distribution of software from the Service Catalog and manage software revocation. Integration with Microsoft System Center Configuration Manager (SCCM) is provided, and the extension framework enables additional third-party integrations, providing a single pane of glass for software distribution and license revocations on Windows and Apple devices.</p> <p>Customer is required to separately purchase any third-party integrated services.</p>
Cloud Management	Provides the capability to automate the provisioning, lifecycle, and cost management of public and private cloud resources.
Communities	Enables Customer's users to engage with peers to ask questions and provide answers on areas of their interest. Helps organizations to reduce support costs through crowd sourcing of knowledge and self-service enablement. Includes the following key features – forums and user management, personalized subscriptions, user community profile, and moderation.
Configuration Compliance	Integrates with third-party security configuration assessment (SCA) solutions to generate a set of test results for the Customer's environment. Allows Customer to create response tasks, change requests or problem tickets to address configuration issues, enabling security teams to perform further investigation or allowing IT to remediate.
Continual Improvement	Provides capabilities to define improvement initiatives and measure success by creating phases and tasks to meet performance goals and track progress.
Cost Management	Provides capabilities to track one-time and recurring costs of configuration items used by IT, and to allocate those costs to business units using allocation rules.
Financial Modeling (Formerly: Cost Transparency)	Provides insight for executives seeking to align spending to business goals. Customer can classify general ledger records, define reporting structures and allocation rules, and view summary reports.
Customer Service Management	Provides capabilities for omni-channel customer engagement across portal, chat, email, and phone (native telephony integration requires Notify); customer data model for accounts, partners, and contacts; case management with advanced skills-based routing, case assignment workbench; real-time service level agreement (SLA), service contracts and service entitlements; targeted communications; special handling notes; pre-packaged service analytics using both real-time data and snapshots for trend analysis (trend analytics requires Performance Analytics); and voice of customer feedback through online surveys and customer satisfaction reporting.
Demand Management	Provides capabilities to consolidate IT requests in a Service Catalog and route them through a Workflow to stakeholders who gather additional information to prioritize investment decisions.
DevOps	Provides capabilities to integrate with and collect data from ServiceNow instances; and third-party planning, source code control, and build execution

	tools. Allows collected data to be loaded into a unified DevOps data model where it can be used to provide insight and automation throughout the DevOps lifecycle.
Discovery	Locates physical and virtual devices connected to an enterprise network. When Discovery locates a device, it explores its configuration, status, software, and relationships to other connected devices, and updates the CMDB.
Edge Encryption	Provides capabilities to encrypt eligible data in transit and at rest. Customer retains sole control and management of encryption keys.
Employee Document Management	Provides electronic personnel file capabilities including configurable legal hold, purge process, data retention and security rule settings.
Employee Service Center (Formerly: Enterprise Service Portal – HR)	Provides capabilities to configure an employee portal interface to personalize employee experience. Includes targeted content delivery and automation guidance with predefined interaction interfaces and employee forums.
Enterprise Onboarding and Transitions	In support of HR Service Delivery, provides a mechanism for HR to configure complex employee processes that span departments, such as onboarding, offboarding, transfers, and other employee lifecycle events.
Event Management	Provides capabilities to aggregate events from monitoring tools used by Customer in its infrastructure, de-duplicates, and correlates inputs from such events to CMDB and provides the ability to filter and prioritize events to create incidents for remediation.
Facilities Service Management	Provides capabilities to manage the service delivery of a facilities department by offering self-service through a Service Catalog and assignment of requests based on fulfillment rules.
Field Service Management	Provides capabilities to create work orders and tasks for the repair and service of equipment; schedule and assign work to technicians; manage parts requirements; and inventory, manage, and complete work orders.
Finance Close Automation	Provides a centralized workspace for posting journal entries and capabilities to manage the finance close process by automating and managing timelines for close tasks and performing end-to-end procedures with built-in policy and compliance.
Financial Planning	Assists executives and budget owners in the automation of budget and forecast planning, helping to increase efficiency and simplify the planning process.
Financial Charging (Formerly: Financial Reporting)	Provides the capability to automate show-back and bill-back processes with Workflow and statement item types, helping to increase corporate financial visibility.

Incident Management	Facilitates the process of restoring normal IT operations by providing capabilities to record, classify, distribute, and manage incidents through to resolution. Includes Performance Analytics limited to 15 key performance indicators (KPIs), one dashboard, and 90 days of data captured by Incident Management.
IntegrationHub	Provides additional capabilities to allow Flow Designer to automate systems outside of a Customer's instance.
Lifecycle Events	Provides the capability to configure a collection of pre-defined activities for personal and professional employee life cycle events within the HR application.
MetricBase	Allows Customer to collect, analyze, and store a time series of data.
Notify	<p>Provides the capability to initiate notification from Customer's instance of the subscription service to a supported third-party platform for SMS, voice, and other communications protocols.</p> <p>Customer is required to separately purchase any third-party service required to work with Notify.</p>
Now Platform App Engine (Formerly: Now Platform – Custom Applications; Platform Runtime; CreateNow)	Provides the capability to create custom tables or develop new applications utilizing the Now Platform contextual development environment, platform features and shared system data.
Operational Intelligence	Provides the capability to aggregate raw data from disparate monitoring tools in Customer's infrastructure to proactively reduce service outages through machine learning and predictive analytics.
Orchestration Core	Provides additional capabilities to allow Workflow to automate systems outside of a Customer's instance and create codeless, reusable actions.
Password Reset	Provides the capability to reset user passwords that are stored and pre-authenticated in a supported credential store separate from Customer's instance of the subscription service, such as Microsoft Active Directory.
Performance Analytics	Provides advanced analytics and time series analysis for KPIs. Provides secure, simple access to Key Performance Indicators (KPIs) and metrics that companies can use to proactively optimize business services, improve processes, and align with organizational goals.
Planned Maintenance	Provides the capability to automatically create work orders and work order tasks via schedules that are triggered based on meters, usage, and/or duration.
Policy and Compliance Management	Provides a centralized process for creating and managing policies, standards, and internal control procedures that are cross-mapped to external regulations and best practices. Additionally, provides structured Workflows for the identification, assessment, and continuous monitoring of control activities.

Problem Management	Facilitates the process of identifying the root causes of errors in the IT infrastructure by providing capabilities to record, escalate, and manage problems through to resolution.
Project Portfolio Management	Provides capabilities to plan, organize, and manage projects and project portfolios including associated tasks and resources.
Release Management	Facilitates the planning, design, build, configuration, testing, and release of hardware and software into the IT infrastructure.
Request Management	Provides capabilities to approve and fulfill requests for goods and services defined and presented in the Service Catalog.
Resource Management	Provides a view of projects and the availability, allocation, and capacity of assigned resources.
Risk Management	Provides an executive view into risk to allow risk managers to quickly identify at-risk assets, perform assessments, and continuously monitor risk exposure.

  

Security Incident Response	Enables a security operations center, security incident response team, and IT to enact response plans to address security-related activities, events, or incidents. Facilitates response team collaboration, investigation of network and non-network related activities (e.g., intellectual property theft, criminal activities, etc.), including the capability for automated request assignment and remediation across security and IT teams.
Service Mapping	Discovers business services of the organization and builds a comprehensive map of all devices, applications, and configuration profiles used in these business services.
Service Management for Issue Resolution	Provides the capabilities within Incident Management, Problem Management, Change Management, Release Management, Request Management, Asset Management and Cost Management to support issue resolution within Customer Service Management.
Software Asset Management	Provides the capability to track and manage software assets, including normalization of discovered software, reconciliation of discovered software against license entitlements, and remediation actions to stay compliant. Facilitates identification of unused software for reclamation and allows Customer to automate harvesting of those licenses.
Targeted Communications	Provides the capability to create and send articles and emails to a specified list of internal and external customers.
Test Management	Provides a user acceptance testing framework to help project teams and business users align on project deliverables and provides visibility into the status of the project testing when used in conjunction with Project Portfolio Management and Agile Development. Project Portfolio Management and Agile Development are separately authorized.
Threat Intelligence	Provides the capability to support multiple threat intelligence feeds to enhance the context of a security incident by enabling analysts to see

	potential threats and related systems in an integrated view. Allows Customer to add its own custom feeds and to place confidence scores or weightings on each feed to accelerate the identification of legitimate security issues.
Trusted Security Circles	As part of Security Operations, provides Customer the option to share threat intelligence data with industry peers, suppliers, or a global circle of ServiceNow customers. Allows Customer to submit anonymous queries regarding security observables and automatically receive a count of sightings to determine whether suspicious activity may be part of a larger attack.
Vendor Performance Management	Enables Customer to manage, evaluate, and compare vendors based on predefined criteria.
Vendor Risk Management	Provides automated assessment capabilities and remediation processes for managing vendor risk, including reporting of risk levels and issues. All vendor interaction and communication may be centralized via a vendor portal enabling Customer to manage vendor responses, provide assessment status, and track issues and tasks.
Virtual Agent	Provides capabilities for Users to interact with a chat agent (bot or human) through the ServiceNow Service Portal, mobile environments, and various messaging services.
Vulnerability Response	Integrates with the National Vulnerability Database (NVD) and third-party solutions to generate a set of actionable reports of vulnerable assets in Customer's environment. Allows Customer to create response tasks, change requests or problem tickets to address vulnerabilities, enabling security teams to perform further investigation or allowing IT to remediate.
Walk-Up Experience	Provides capabilities to create and manage a requester queue at an onsite IT walk-up venue where requests and issues are fulfilled and solved by IT technicians in real time and in person.

#### ServiceNow Platform Capabilities

Assessments	Evaluates, scores, and ranks records from any table in the subscription service. Uses assessments to send custom questionnaires to selected users or writes scripts that query the database directly.
Automated Test Framework	Create and run automated tests during upgrades, application development, or instance configuration.
Business Service Maps	Graphically displays the configuration items related to a business service and indicates the status of those configuration items.
Chat	Provides real-time communication capability via instant messaging between users in a ServiceNow instance.
Coaching Loops	Provides the capability to monitor and provide feedback on a specific behavior of an individual or group.

Configuration Management Database (CMDB)	Provides capabilities to identify, record, audit, and report on IT configuration items and their relationships.
Connect	Provides the capability to connect people, processes, and information into a unique and centralized collaboration workspace to cut down on resolution times. Features include Chat, document delivery, active lists to see who is working, and the ability to interact directly from the activity stream.
Content Management System	Provides the capability to create custom interfaces.
Delegated Development	Enables instance administrator to deploy and manage developer resources per application, providing them the ability to provide non-administrator development rights and limit the access rights to specific resources used by an application.
Flow Designer	Provides capabilities within a design environment to automate approvals, tasks, notifications, and record operations without requiring code.
Form Designer	Allows creation of forms and tables with visual controls.
Google Maps mapping service	<p>ServiceNow may make Google Maps available for use with the Subscription Service. If Customer uses Google Maps, Customer agrees to the following terms and conditions:</p> <p><b>(a)</b> If Customer's usage exceeds either 60,000 map views on an annual basis or 1,000 geocoding requests on a daily basis, Customer shall purchase map views and geocoding requests from Google subject to Google's terms and conditions, to which ServiceNow is not a party.</p> <p><b>(b)</b> Customer agrees, and shall cause its end users to agree, to the following:</p> <ul style="list-style-type: none"> <li>• Google's Maps Terms (<a href="http://maps.google.com/help/terms_maps.html">http://maps.google.com/help/terms_maps.html</a>) or a successor URL as provided by Google.</li> <li>• Legal Notices (<a href="http://www.maps.google.com/help/legalnotices_maps.html">http://www.maps.google.com/help/legalnotices_maps.html</a>) or a successor URL as provided by Google.</li> <li>• Acceptable Use Policy (<a href="https://enterprise.google.com/maps/terms/universal_aup.html">https://enterprise.google.com/maps/terms/universal_aup.html</a>) or a successor URL as provided by Google.</li> </ul> <p><b>(b)</b> Customer agrees that Google may use Customer Data in accordance with its privacy policy and that Google may provide its Maps services to Customer. Google Maps may not be available to Customer due to location availability and may not be available during Customer's entire Subscription Term. ServiceNow support terms and warranties do not apply to Google Maps.</p>
Guided Setup	Provides the categories and associated tasks to configure any product or application that provides a Guided Setup module.
Knowledge Management	Provides role-based tools to create, store, and publish information. Provides mechanisms for version control and approvals of documents in the review process.

Live Feed	Provides a place to post and share content.
Mobile Classic	Provides a customizable ServiceNow interface for mobile devices.
Mobile Studio	Provides the capability to configure a ServiceNow application or build a new mobile application within Studio.
OpenFrame	An interface technology that enables real-time communication channels such as telephone systems to be integrated into the ServiceNow Platform. Consists of UI elements as well as a set of APIs that support exchange of events and data between ServiceNow and the communications system.
Reporting	Provides the capability to create and share reports and dashboards.
Script Debugger	Enables debugging of script on non-production instances of the subscription service.
Service Catalog	Displays a listing of the goods and services that a Customer provides within the enterprise to its employees and contractors.
Service Creator	Provides capabilities for building Service Catalog items without writing code.
Service Level Management	Establishes and monitors status of service contracts and SLAs between Customer and its customers or third-party service providers.
Service Portal Designer	Provides the capability to build portals with a consumer-like experience using both ServiceNow out-of-the-box widgets and templates as well as Customer's own widgets and styles, while leveraging only HTML and CSS.
Skills Management	Assigns configured competencies to groups or users.
Studio	Provides web-based Integrated Development Environment (IDE) for professional and low-code (i.e., IT administration) application developers.
Subscription Management	Enables Customers to view and allocate use rights in the subscription service across the enterprise.
Survey Management	Allows for polling and collection of data, including configuration for specific events and/or conditions.
Time Cards	Records time worked on tasks either manually or automatically.
Visual Task Boards	Transforms the navigation of lists and forms into an interactive graphical experience including a Kanban-style workspace for either individual or team-based management of tasks.
Visualizations	Displays interactive 2-D and 3-D visual representations for any logical data relationships within an instance.
Web Services	HTTP-based web services allow Customer to interact with instances of the subscription service. Outbound (consumer) web services allow Customer to access remote endpoints and perform web service requests <b>from instances</b> of the subscription service. Web services include REST and SOAP APIs.

Workflow	<p>Provides a drag-and-drop interface for automating multi-step processes across the subscription service. Each Workflow consists of a sequence of activities such as generating records, notifying users of pending approvals, or running scripts, and the condition-based transitions between them.</p> <p>Customer is required to purchase Orchestration Core to orchestrate activities using a Workflow that interacts outside of Customer's instance of the subscription service.</p>
