

DR BOOST

Minimise downtime and recover faster

Minimise downtime and limit data loss to ensure business continuity when the worst happens

Enhance security

Improve business continuity

Minimise downtime

Reduce recovery costs

This service establishes and tests the DR process for a particular workload or application, ensuring there is a defined action plan to follow during a real disaster so your stakeholders know what needs to be done to recover the workload or application.

Well Architected Review

Playbook Management

Bi-Annual DR Test
