

**G-CLOUD PRICE LIST**

**MANAGED SIEM**

## MANAGED SIEM

A managed SIEM service enables expert SOC analysts to monitor logs from your applications, systems, networks and users and safeguard them from cyber threats 24/7. Get multi-layered cyber threat intelligence protection that can be deployed anywhere, anytime with smart runbooks and integrated machine learning.

Unit	Pricing
Log source	£10 to £50 per log source

Volume-based pricing is available depending on the number and type of nodes your organization needs to cover. A node is classed as any source of data that will be monitored for security events, such as individual workstations, servers, firewalls and switches. Cloud infrastructure coverage is scoped on an case-by-case basis.

We provide a tailored approach for all our clients and will work with you to scope your environment and deliver a custom approach.
