

nimbus Service Definition

Digital & Technology Innovations Accelerating your journey to the cloud with confidence.

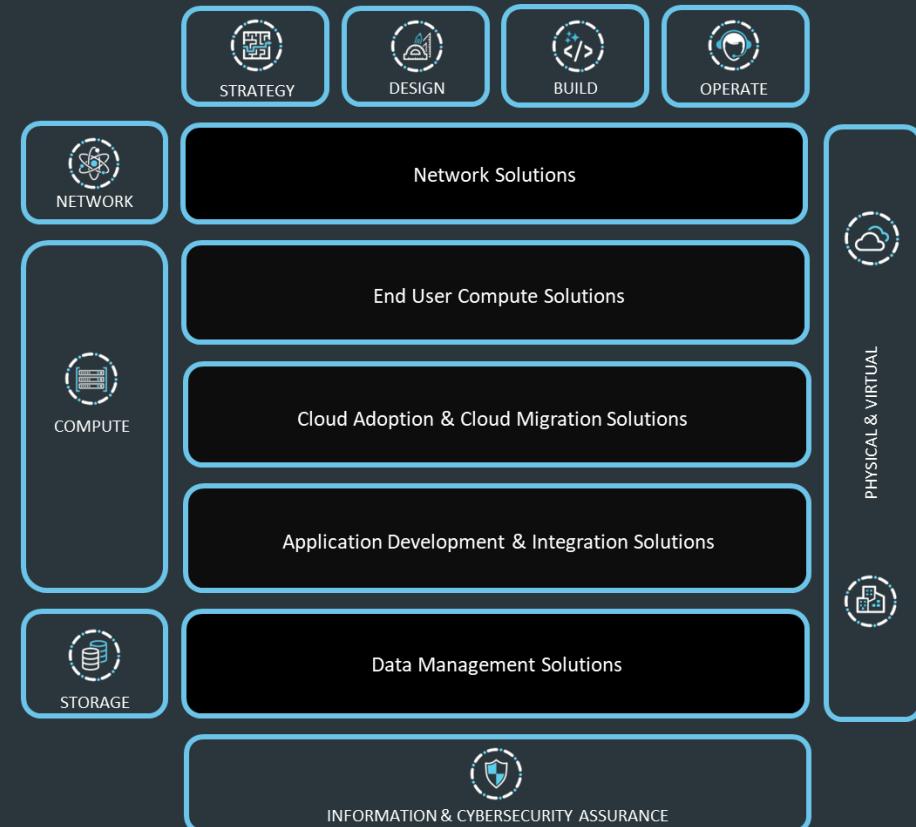

Nimbus provides a comprehensive portfolio of digital and technology services, including expertise in strategy development, design, build, and operation of our customers' applications and services running in the cloud.

Our services can be used individually or collectively to support your digital and technology optimisations and transformations. Enabling you to move your existing legacy workloads into the cloud while supporting you to design, build and operate your next generation of business and IT services in and for the cloud.

We provide an end-to-end collection of services, underpinned by our experience agile architects, designers, developers, infrastructure engineers, testers, and support engineers, including:

- Cloud Hosting Services for Microsoft Azure
- Cloud Software Services for all Microsoft Technologies
- Cloud Support Services
 - Cloud Centre of Excellence (CCOE) Services
 - Cloud Readiness Assessment Services
 - Cloud Service Design & Service Management Services
 - Cloud Adoption, Migration & Transformation Services
 - Cloud Network Design, Implementation & Support Services
 - Cloud End User Compute (EUC) Design, Implementation & Support Services
 - Cloud Application Migration & Support Services
 - Cloud Data Migration & Support Services
 - Cloud Integration & Support Services
 - Cloud Security Operations (SecOps) Support Services
 - Cloud Development Operations (DevOps) Support Services
 - Cloud Technical Operations (TechOps) Support Services

Whether you are considering moving to the cloud or are already in the cloud, we can help you keep up with the fast-changing pace of cloud technologies.

nimbus Service Definition

Digital & Technology Innovations Accelerating your journey to the cloud with confidence.

Service Name

Cloud Adoption, Migration & Transformation Services

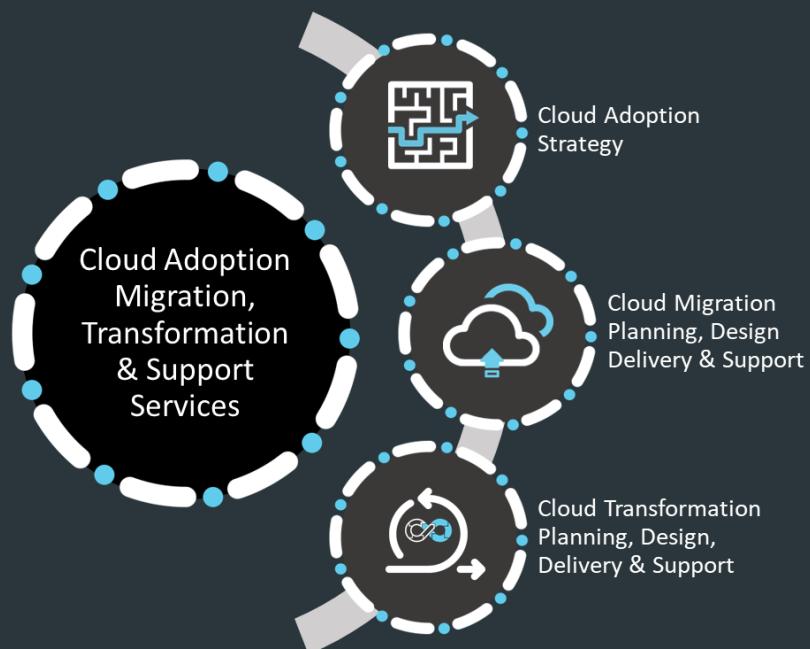

Service Description

Nimbus delivers expert Cloud Adoption, Migration, Transformation and Support Services to help public sector organisations modernise securely and efficiently. Our certified Cloud practitioners guide you through every stage, from strategic adoption planning and secure migration to agile transformation and long-term Support.

We specialise in migrating and transforming legacy systems into scalable, cloud-native environments across hybrid cloud platforms. Accelerate digital transformation, reduce operational risk, and optimise performance through proven frameworks, automation, and continuous improvement. Whether you're starting your cloud journey or scaling existing workloads, we ensure resilient, compliant, and future-ready Cloud Services.

Service Overview

Our Cloud practitioners will work with you to define how to design and operate your applications in the cloud, helping you to achieve business and technical agility through the innovative use of modern cloud services.

We can provide experienced experts and leaders to support your Cloud Adoption, Cloud Strategy, and Cloud Governance, alongside Architects and Engineers to design, build, operate, and automate your Cloud platform securely in alignment with modern DevOps principles and practices.
