About this service

Leveraging the power of Drupal's service architecture, we build resilient, auditable, maintainable and reusable integrations that can be easily updated to reflect changing user needs. We have experience integrating with a large number of CRM systems to provide identity management, forms and other services.

Service features

- Design phase to find the best integration solutions
- Bespoke solutions that best suit your tech and users
- Integrations and platform consultancy
- Platform-agnostic API integration
- Experience integrating with popular CRM systems
- Information security
- Automated testing
- Use of open source solutions where possible
- Systems architecture consultancy
- GDPR compliance

Service benefits

- Streamlined communication with assigned developer and account manager
- Long-term service and support
- Improve your approach to data governance, process, storage and management
- Improve end user confidence in your systems and processes
- Leverage 100+ years of collective Drupal integration experience
- Utilise our extensive knowledge of APIs and systems architecture
- Seamless user journeys between systems
- Our requirements-led approach is focussed on user needs
- Save time, money and retain proven legacy systems where needed
- Improved collaboration extensive experience working alongside inhouse dev teams

\rightarrow Who we are

We're a different kind of digital agency.

Agile Collective is a purpose-driven business. We want our work to have a big, positive impact on the world, so we seek out clients whose values we share and whose mission we want to help deliver.

With Agile Collective, everyone you work with is a co-owner of the business, bringing an additional level of enthusiasm and commitment to each project.

Working in the open, collaboration and sharing our work are core values that ensure we deliver for our clients and enable us to thrive as a worker-owned cooperative.

Find out more agile.coop

\rightarrow What we do

Agile Collective has been delivering enterprise-scale digital services for over a decade, catering to organisations across the public, private and third sectors.

We have empowered hundreds of organisations at the local, national and international level to better understand and meet their users' needs.

We use Agile methodologies to design, build and support Drupal-powered websites, as well as providing a full suite of digital design and research services.

Our support team have been providing support, maintenance and development services for our clients for over a decade, whether the sites were built by us or another supplier.

Commitment to the Local Digital Declaration

We are passionate believers in the principles of the Local Digital Declaration, prioritising real user needs to ensure technology enables better public services for all.

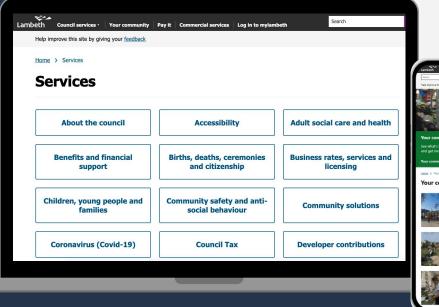

Agile Collective have been key partners in two flagship Local Digital Fund projects:

- As the Lead Technical Partner for LocalGov Drupal, we provided technical leadership for all stages of the project
- We provided communications and website development for Open Digital Planning

→ Our clients

Lambeth Council

Lambeth Council needed to redevelop its outdated website to serve its constituents better with a focus on a more intuitive and accessible online platform. Interested in LocalGov Drupal, they entrusted Agile Collective - the lead technical partner for LGD - to rebuild.

Accessibility training and support

Oxfordshire County Council

Oxfordshire County Council asked us to lead a series of workshops for their content team. Our workshops are informative, conversational and interactive. We illustrate concepts with real-life examples from the organisation's daily practice, tailored to the needs of the group we are working with.

- Scene-setting: understanding the vision, roadmap and current knowledge
- Empathy building: experiencing first-hand the barriers that web content can create
- Accessible content 101: the basics of writing and testing accessible content
- Accessible forms 101: the basics of designing and creating accessible forms
- Accessible PDFs 101: the pros of cons of PDFs and the basics for designing and creating accessible PDFs

> Emergency response

Climate and food crisis in East Africa

Amina, 50, arrived in the Gunagado displacement camp in 2017 in search of food and water after the drought killed her cattle and an outbreak of disease endangered her family. Pastoralist communities in the Somali region have been suffering 4 years of erratic rains and millions of people have lost their livestock. Photo: Pablo Tosco/Oxfam

Eastern Africa is in the grip of a devastating food crisis. More than 22 million people are in need of humanitarian aid as climate extremes have caused widespread food shortages. Millions more lives are at risk as the region

Support and maintenance

Oxfam International

We're proud to have been working with Oxfam International for many years, initially on their GROW campaign and then on the redevelopment of their main Oxfam.org website on Drupal 7 – including a major migration of content from their old CMS – a site that we subsequently supported, maintained, and continuously improved in line with Oxfam's strategic objectives.

www.oxfam.org

British Association of Social Workers (BASW)

www.basw.co.uk

The challenge

BASW's strategic goals were being hindered by a lack of systems integration between the membership database, member-facing websites, shop, CPD diary, events system, finance, and email marketing. A complete digital overhaul was required.

Our approach

Agile Collective were commissioned for brand development and website redevelopment. We began by immersing ourselves in BASW's business: their brand identity, the membership model, existing digital estate, back office systems, processes and content workflows.

British Association of Social Workers

www.basw.co.uk

The work

We designed a new information architecture to support BASW's strategic priorities, and gave structure to the review, de-duping, re-structuring and classification of legacy content. We led a creative process to unify the fragmented brand across national sub-brands.

The outcome

The redeveloped, responsive website showcases a fresh and unified BASW identity. With Drupal, the content team have a powerful set of editorial tools to help them create engaging content within the new IA, and the new self-service portal allows members to manage their renewals, subscriptions, CPD and preferences.

CALP Network

The CALP Network commissioned us for an accessibility and usability audit of their digital communication channels. Our approach focused on enabling lasting change in the organisation.

- Audits: conducted accessibility and usability audits and testing
- Report: an overview of the website's state based on both audits, with recommendations for improvements and fixes
- Roadmapping: we worked with the CALP team to prioritise work into achievable and logical streams
- Training: a whole-team training session looking at the intersection of multiple factors (e.g. poverty, health, digital literacy, gender), with first-person accounts of accessibility barriers and a demonstration of how people with different disabilities might experience the site; a dedicated content accessibility session with the comms team; a final session to discuss practical tips and tricks for implementing our recommendations

Accessibility training and support

UNICEF / WHO Joint Monitoring Programme

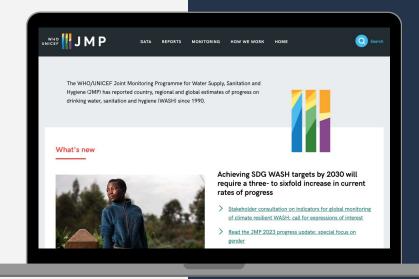

washdata.org

The work

The Joint Monitoring Programme (JMP) is the global guardian of water, sanitation and hygiene data (WASH). The JMP's site was difficult to navigate, content management was complicated, and it lacked accessibility, security, and mobile optimization.

The outcome

We put a project team together with the skills to produce complex data visualisations as well as to securely host, rebuild, re-architect and support the JMP website. We delivered the project in collaboration with fellow CoTech members, Outlandish, who brought their skills and experience to bear on the development of the data analytics tool.

Here's what our clients have to say about working with us

I would have absolutely no hesitation in recommending Agile Collective and have genuinely found them fantastic to work with.

I think you'd be hard pushed to find another whole team of people like this. I usually have one or two people within suppliers I use that I prefer to work with, but I would happily go to any team member at Agile Collective and know that I would receive great service.

Chrissie Duxson

Communications Manager, BISA

Agile Collective understood and shared our objectives and our values as an organisation.

It was great to work with skilled, motivated people who take real ownership of the project and were invested in its success. I'm only sad we were too scattered across the globe to have a beer after work.

Ed Crompton

Web Developer, Oxfam International

What really made a difference was the human side of the project.

We had a complex stakeholder context and Agile Collective always knew just what to do. Our project was deeply collaborative and delivered a wonderful website that everybody is over the moon with! I can't thank them enough.

Rob Safar

Digital Producer, ActionAid

We've been delighted with their expertise, vision and dedication to the task.

As a group of councils, we didn't have any expertise in collaborative working with open source code. It was essential that our suppliers could guide us, and Agile Collective has been more than equal to the challenge. We recommend Agile Collective wholeheartedly. They are very capable Drupal builders and thinkers, and all round good people to have on your team.

Will Callaghan

Delivery Manager, Croydon Council Digital Service

We found Agile Collective to be a fantastic co-operative to work with.

They have been helpful and supportive all through the web build process, offering detailed explanations and advice where necessary and also responding quickly to requests and issues as they have arisen. We now have a much quicker website, that has **100%** uptime. Their work on our e-commerce has improved sales by just over **80%** year on year while other metrics have also shown improvement including bounce rates and time on site.

Tim Hunt

Co-Editor and Director, Ethical Consumer
