Yes

- Hosting or software services the planning service works with

- Microsoft SQL (on premises and cloud solutions)
- Microsoft Azure
- Bedrock

## • Setup and migration

### Setup and migration

- Setup or migration service available

Yes

- How the setup or migration service works

Trustmarque has tools and experience developed over a number of years in rapid deployments of data as either primary use – live databases – or for secondary use – summarised, normalised, cleansed and with history as needed. These use a range of modern tools to take existing data, live line of business data sets or internet of things (IoT) data sources. Through Trustmarque's use of its Big Data Pump, it is able to deliver all levels of data assimilation from high volume real time data in bursts through regular transactional updates or mass lift and shifts. Trustmarque's tools and experience also helps its customer to validate and check data transfers and updates in real time. Trustmarque's fast and iterative project approach allows for regular technical and commercial validation, making sure the right data is being transported reliably.

- Setup or migration service is for specific cloud services

Yes

- List of supported services
  - Microsoft Azure
  - Microsoft Platform as a Service SQL
  - Bedrock

## **. Quality assurance and performance testing**

### **Quality assurance and performance testing**

- Quality assurance and performance testing service

Yes

- How the quality assurance and performance testing works

By using the initial business and technical requirements, Trustmarque can help customers validate that they are meeting their goals. In addition, technical metrics and security processes will can also be confirmed by the Trustmarque delivery team. Dedicated test resource is available to help customers prove that solutions are fit for purpose. Trustmarque's dedicated portal service can also be used to help track cost benefits over time.
