SERVICE DESCRIPTION – CLOUD FINOPS AND COST OPTIMISATION

OVERVIEW

Service Description

The organic, large-scale adoption of AWS services leads to inefficiencies which can drive up costs and, if left unchecked, see your hosting budget quickly spiral out of control. Through a variety of optimisation techniques Computacenter can significantly reduce your AWS costs and recommend cost-effective services to use.

Key Features for our Customers

- ❖ Provide education on each AWS optimisation technique
- ❖ Provide detailed prioritised recommendations with associated cost savings
- ❖ Implement recommendations and establish ongoing cost optimisation standards
- ❖ Tag resources to add project context to billing data
- ❖ Provide reporting to produce key insights into your current spend
- ❖ Our cost efficiency scale highlights your level and potential savings

Key Benefit for our Customers

- ❖ Upskilling teams will reduce ongoing costs
- ❖ Reporting will provide visibility of the largest cost contributors
- ❖ Costs broken down by cost centres - teams, environments, services
- ❖ Enables more accurate forecasting of future spend
- ❖ Saves money to be spent elsewhere
- ❖ Reduce risk by engaging an experienced delivery partner

SERVICE DESCRIPTION – FINOPS AND COST OPTIMISATION

OVERVIEW

WHAT IS COMPUTACENTER PUBLIC CLOUD FOR ENTERPRISE?

Computacenter Public Cloud Services offers customers a way to optimise their public cloud adoption and implement its use in a structured, governed way across their entire enterprise. Our services are made up of 4 main solutions, supported by our unique Cloud Adoption Framework. As part of these solutions, we supply both professional consulting services and technology sourcing.

PLAN	CLOUD PLATFORM STRATEGY	We help our customers develop a bespoke modern platform strategy for public cloud, that is ready for the required enterprise scale, based on industry and Computacenter best practices.
APPLY	CLOUD ENTERPRISE FOUNDATIONS	Creating an enterprise-ready public cloud foundation, based on our 'best-architected' framework, aligned to our customers requirements for security, compliance, operational efficiency and scale.
APPLY	CLOUD OPTIMISATION	Helping our customers integrate and optimise their public cloud environments to realise the benefits, be commercially efficient and both technically and operationally aligned with best practice
SCALE	APPLICATION MIGRATION	Scale public cloud adoption efficiently using our migration factory, a completely governed process to transform workloads across the whole business

WHAT ARE OUR CORE SERVICES?

The core services that we provide in public cloud to customers are as follows:

- Marketplace sourcing
- Strategy and Roadmap
- Commercial Guidance
- Cloud Center of Excellence
- Landing Zones
- Well Architected Reviews

WHAT IS OUR CLOUD ADOPTION FRAMEWORK?

Our Adoption Framework is a unique public cloud methodology, designed to provide a structured but adaptive approach to adopting an enterprise cloud IT services model, whether that's building and migrating to private, public or multi-cloud platforms.

The framework provides our customers with key tactical and strategic activities needed to spark large scale adoption, maintain the velocity of their cloud migration, and ensure the longevity of their operations. Its flexible, modular approach allows businesses to enter at a point relevant to their needs and stage of cloud adoption, conduct only those activities needed to move them forward, and build a programme of execution tailored to their IT requirements.

WHY COMPUTACENTER?

At Computacenter, we know enterprise, we know cloud and we know what it takes to get the public cloud fully in-line with an enterprise's digital strategy to keep their business accelerating in the long term:

- Enterprise & Public Sector focused
- Performance-based outcomes
- Delivery at scale
- Vendor independence
- Partner ecosystem
- Global reach

OUR PARTNERSHIPS

We are proud to have built powerful partnerships with the world's leading technology providers.
