CROWDSTRIKE SERVICES

OVERVIEW

Service Description

CrowdStrike Services delivers incident response, technical assessments, training, and advisory services that help you prepare to defend against advanced threats, respond to widespread attacks, and enhance your cybersecurity practices and controls.

Key Features for our Customers

- ❖ Tabletop Exercises
- ❖ Adversary Emulation Exercise
- ❖ Red Team / Blue Team Exercise
- ❖ Penetration Testing Services
- ❖ Incident Response
- ❖ Compromise Assessment
- ❖ Endpoint Recovery
- ❖ Network Security Monitoring
- ❖ Security Assessments
- ❖ Technical Risk Assessments

Key Benefit for our Customers

- ❖ Accelerated Forensic Analysis
- ❖ Rapid Technology Deployment
- ❖ Intelligence-led rapid response
- ❖ Minimize downtime
- ❖ Reduced adversary impact
- ❖ Lower cost remediation
- ❖ Accelerated investigation
- ❖ Recover systems with real time response
- ❖ Greater visibility for better decision making
- ❖ Avoid business interruption

CROWDSTRIKE SERVICES

OVERVIEW

Our Experience

Computacenter have built substantial experience over the last five years in helping our customers to create the cultural and technological foundations required to succeed with their DevOps initiatives. Whilst every customer engagement is unique, there are common patterns to container platforms maturity that we undertake on behalf of our customers. These patterns include organisational change, with the creation of new team structures, to bring development, security and platform stakeholders together with the business, eradicating barriers to collaboration. Another frequent pattern is the consolidation of software development lifecycle technology sprawl, which creates unnecessary cost and friction in the development and deployment process. We have supported numerous programmes of this nature, increasing the velocity with which development teams can operate, increasing deployment frequency and reducing lead time for change.

Why choose Computacenter?

Computacenter have vast experience in working with Enterprise organisations and count many of the UK's most high-profile public sector and commercial organisations as customers. This Enterprise experience is essential in supporting our customers with DevOps and Container platforms maturity. Driving organisational and technological change within large, complex team structures is hard; it requires deep understanding of how to approach and engage stakeholders to ensure new concepts are implemented and adopted by the organisation successfully. Many organisations do not deliver programmes of this nature on a regular basis and as such, our experience is a valuable asset. In addition, we have substantial capability across a number of different competencies; applications software & platforms, private cloud, public cloud, security and compliance. We are therefore very well equipped to support customers on all aspects of Container platforms adoption. Finally, we are a key partner for many of the leading Kubernetes technology vendors and we therefore understand the skills required to use these tools effectively.

CROWDSTRIKE SERVICES

PRICING OVERVIEW

For current pricing which accurately reflects your requirements, please contact your Account Manager, call us on 01707 631000 or send an email to government@computacenter.com.

Please ensure you reference the GCloud 14 Service ID number in all communication.

CROWDSTRIKE SERVICES

ORDERING & INVOICING PROCESS
