SERVICE DESCRIPTION – AWS LANDING ZONE AND CONTROL TOWER

OVERVIEW

Service Description

Computacenter's Cloud Foundations service provides a managed production-ready, pre-configured AWS Landing Zone with control tower hybrid connectivity, giving your teams access to native AWS IaaS, PaaS and SaaS. With preconfigured guardrails around network, access, compliance and cost, Cloud Foundations gets you up and running on AWS quickly, securely, and successfully. Optionally, we also provide AD integration and Account Factory for Terraform (AFT) for automating the account provisioning

Key Features for our Customers

- ❖ Around 20 preventive guardrails
- ❖ 2 detective guardrails
- ❖ 2 pre-configured organisational Units
- ❖ One or more private VPC's
- ❖ [Optional] Integration with the customers own Active Directory
- ❖ [Optional] Account Factory for Terraform integration using customer's own VCS

Key Benefit for our Customers

- ❖ Adoption of industry best practices to drive efficiency and quality
- ❖ Secure by design.
- ❖ Monitoring & Alerting
- ❖ Consolidated billing and Cost Management
- ❖ Can be tailored to the industry vertical compliancy rules
- ❖ Adherence to AWS Well architected principles

OVERVIEW

WHAT IS COMPUTACENTER PUBLIC CLOUD FOR ENTERPRISE?

Computacenter Public Cloud Services offers customers a way to optimise their public cloud adoption and implement its use in a structured, governed way across their entire enterprise. Our services are made up of 4 main solutions, supported by our unique Cloud Adoption Framework. As part of these solutions, we supply both professional consulting services and technology sourcing.

PLAN	CLOUD PLATFORM STRATEGY	We help our customers develop a bespoke modern platform strategy for public cloud, that is ready for the required enterprise scale, based on industry and Computacenter best practices.
APPLY	CLOUD ENTERPRISE FOUNDATIONS	Creating an enterprise-ready public cloud foundation, based on our 'best-architected' framework, aligned to our customers requirements for security, compliance, operational efficiency and scale.
APPLY	CLOUD OPTIMISATION	Helping our customers integrate and optimise their public cloud environments to realise the benefits, be commercially efficient and both technically and operationally aligned with best practice
SCALE	APPLICATION MIGRATION	Scale public cloud adoption efficiently using our migration factory, a completely governed process to transform workloads across the whole business

WHAT ARE OUR CORE SERVICES?

The core services that we provide in public cloud to customers are as follows:

- Marketplace sourcing
- Strategy and Roadmap
- Commercial Guidance
- Cloud Center of Excellence
- Landing Zones
- Well Architected Reviews

WHAT IS OUR CLOUD ADOPTION FRAMEWORK?

Our Adoption Framework is a unique public cloud methodology, designed to provide a structured but adaptive approach to adopting an enterprise cloud IT services model, whether that's building and migrating to private, public or multi-cloud platforms.

The framework provides our customers with key tactical and strategic activities needed to spark large scale adoption, maintain the velocity of their cloud migration, and ensure the longevity of their operations. Its flexible, modular approach allows businesses to enter at a point relevant to their needs and stage of cloud adoption, conduct only those activities needed to move them forward, and build a programme of execution tailored to their IT requirements.

WHY COMPUTACENTER?

At Computacenter, we know enterprise, we know cloud and we know what it takes to get the public cloud fully in-line with an enterprise's digital strategy to keep their business accelerating in the long term:

- Enterprise & Public Sector focused
- Performance-based outcomes
- Delivery at scale
- Vendor independence
- Partner ecosystem
- Global reach

OUR PARTNERSHIPS

We are proud to have built powerful partnerships with the world's leading technology providers.
